| Polnocny Class | 8/2 | 6 | 6 | 4 | X | X | X |
| Zubr LCAC | 7/2 | 4 | 4 | 4 | 2 | X | X |

Combined Vehicle Capacity is the total number of vehicle steps of any class allowed. Actual composition may be any combination of V Class, Armor <, Armor > that totals the Combined Vehicle Capacity.

The steps listed for vehicle type is the maximum allowable steps for that particular type regardless of the Combined Vehicle Capacity; i.e. the CVC = 10 but the Armor Front > 10 = 2 steps; no more than 2 steps of the CVC may be Armor Front > 10 steps.
