AMVETS Suwannee River Post #422 Salutes Its WWII Vets

Mike Stacey

Charlie Roach

Louise Johnson

Paul Robert

On Monday, May 26, 2014 AMVETS Suwannee River Post #422 saluted four of its six living WWII Veterans. Prior to saluting its WWII Vets, a small service was held to salute all of our deceased Veterans. A huge cake with the pictures of all of AMVETS Post 422 WWII Vets was presented for all to enjoy.

We owe a special debt of gratitude to them as well as all of our veterans. There were over 16 million men and women who fought in WWII and over 400,000 never made it home. We are honored to have six of them as members of our Post: Ms. Louise Johnson, Mike Stacey, Paul Robert, Charlie Roach, Penrose Dietz and Gene Stedman. Of these six, all but Gene Stedman and Penrose Dietz showed up for the Salute. We also had the oldest WWII Veteran in our area, US Marine John Howell and Mr. Bob Ziller show up for the ceremony. They heard we were the only Post especially honoring WWII Vets and asked if they could join in the Salute. *Thank You All for Your Service and Your Sacrifice*! I would like to thank everyone in the Post for your participation in saluting our WWII Vets.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Otter Creek WTP Has Levels of Disinfection By-Products Above Drinking Water Standards
What happened?

Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Testing results we received from samples taken February 25, 2014, when averaged with the quarterly results from the past year, show that our system exceeds the standards, or maximum contaminant levels (MCL), for Disinfection By-Products (DBPs), which includes Total Trihalomethanes (TTHMs) and Haloacetic Acids [Five] (HAA5s). The standard for TTHMs is 80 micrograms per liter (µg/L) and the average level of TTHMs over the last year was 139.36 µg/L. The standard for HAA5s is 60 µg/L, the average level of HAA5s over the last year was 103.24 µg/L.
What should I do?

Some people who drink water containing TTHMs in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

Some people who drink water containing HAA5s in excess of the MCL over many years may have an increased risk of getting cancer.

Any customers who are concerned about their exposure to DBPs may choose alternative sources of water for ingestion.
What does this mean?

This is not an immediate risk. If it had been, you would have been notified immediately.
What is being done?

This is what we are doing to lower our DBPs levels: We are flushing the system. We are reducing the chlorine residual to help reduce DBPs. We are increasing sampling for DBPs. We will inform you when additional samples show levels of DBPs below the MCLs. We have an engineer evaluating the situation. He will be making a recommendation in the coming weeks. There are several options available to us.

For more information, please contact the town clerk, Connie Caldwell, at Town Hall (352) 486-4766.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
