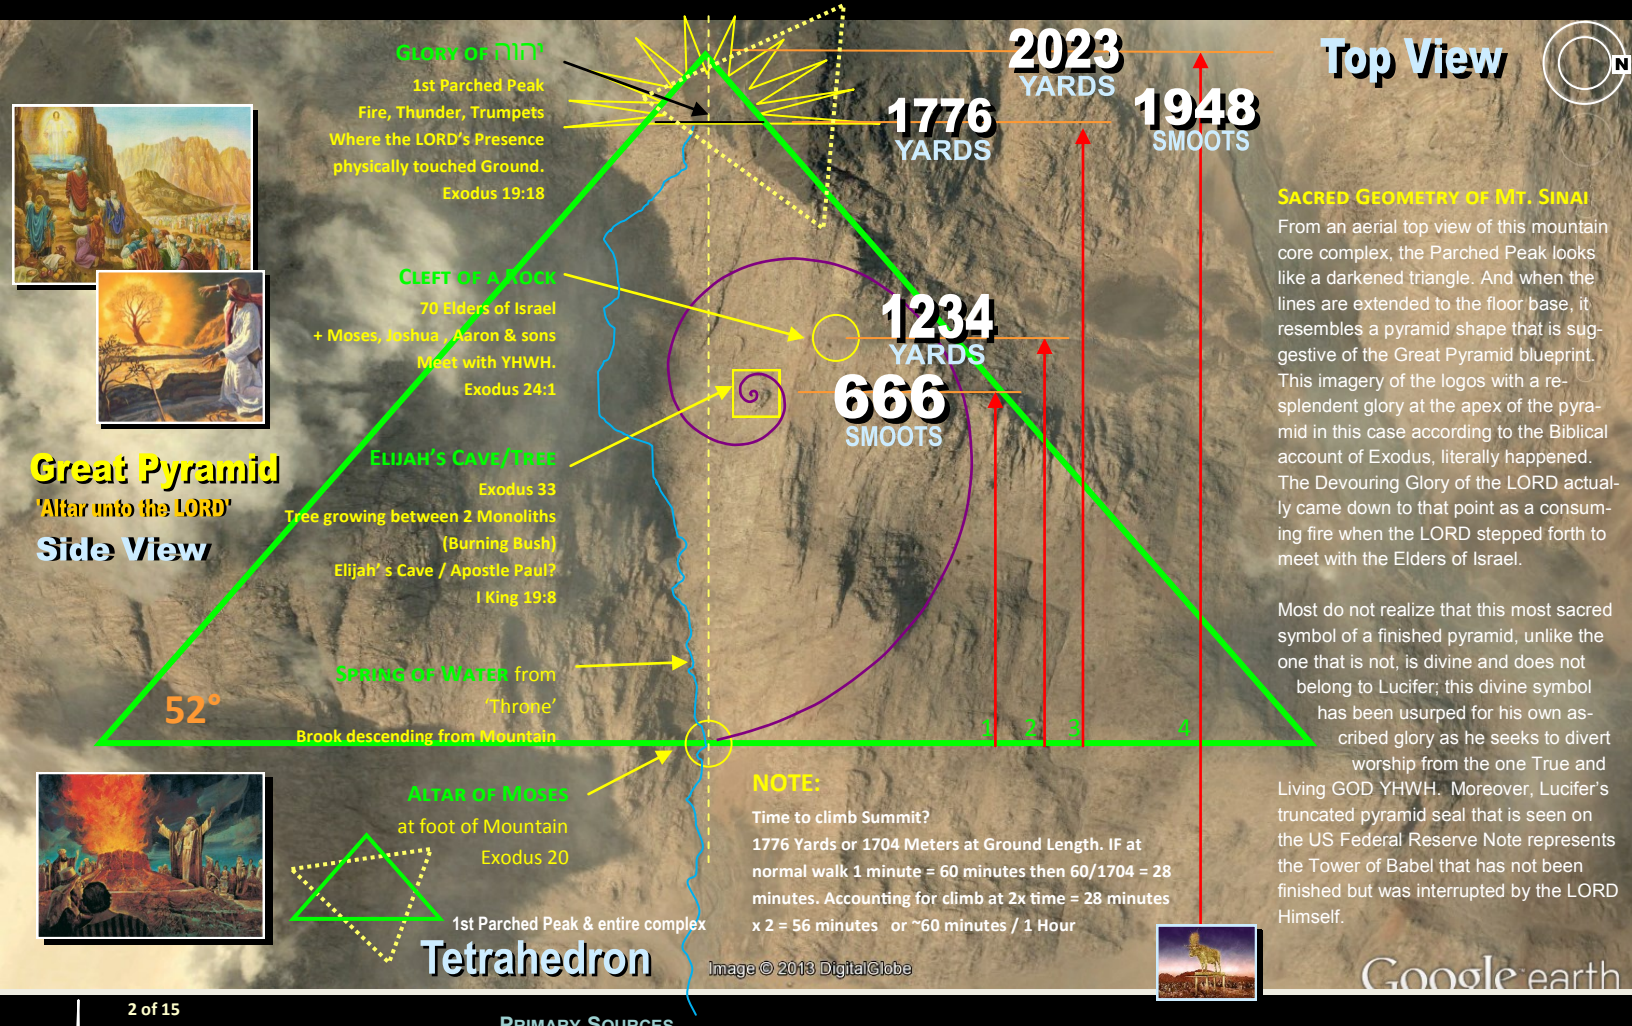
GREAT PYRAMID PATTERN OF MT. SINAI



Sacred Geometry of Mt. Sinai

From an aerial top view of this mountain core complex, the Parched Peak looks like a darkened triangle. And when the lines are extended to the floor base, it resembles a pyramid shape that is suggestive of the Great Pyramid blueprint. This imagery of the logos with a resplendent glory at the apex of the pyramid in this case according to the Biblical account of Exodus, literally happened. The Devouring Glory of the LORD actually came down to that point as a consuming fire when the LORD stepped forth to meet with the Elders of Israel.

Most do not realize that this most sacred symbol of a finished pyramid, unlike the one that is not, is divine and does not belong to Lucifer; this divine symbol has been usurped for his own ascribed glory as he seeks to divert worship from the one True and Living GOD YHWH. Moreover, Lucifer's truncated pyramid seal that is seen on the US Federal Reserve Note represents the Tower of Babel that has not been finished but was interrupted by the LORD Himself.
