Good Afternoon Team,

The N95 masks are available and being distributed to use at your discretion. The N95 mask is easy to use. You take the straps and put them over your head, the mask will fit snug, you adjust it on your face and squeeze the metal part over your nose. The mask can be reused especially during a shortage. When the mask is not in use, wrap it in a cloth or a paper towel to avoid additional soil from getting on it.

Employees are still asked to practice social distancing during this time. Please contact the Safety Team if you have any questions.

Thank you,

Safety Team

Thanks for all you do in helping making BWW a success.

Thanks,
Joyce S. Perry, DD, MEng
