CELESTIAL GATES OF HEAVEN

TIME MARKERS OF THE SUN DETERMING THE CIRCUIT

This depiction is of the 4 Main Astronomical Gates of the Heavens. They consist of the 2 Solstices and the 2 Equinoxes. Incorporated into this array is the Lion's Gate, which would tally a total of 5 Gates. Enoch in Chapter 72 spoke about there being 6 Gates of Heaven, at least comprising Half of the Mazzaroth or the Zodiac Constellations. In essence, each of the Constellations in that respect would be or is considered a 'Gate' onto itself. These 5 Principle Gates are Time Markers where the Sun is in the Position relative to the other Signs and Gates from Earth's Perspective. Note that this is the Astronomical Precession of the Sun, not the Astrological one. The Astronomical Precession of the Sun is relative to the Sign or Constellations corresponding to the Dates of the Modern Gregorian Calendar. The 12 Zodiacs are not in perfect circle. This is different from the Astrological Season of the 12 Constellations that will be about 1 Month off or shifted forward. Note that the 4 Solar Gates are 3 Months apart for a total of a 12 Months or a 360 Day Factor. Then from the June 21 Summer Solstice to the Lion's Gate of July 23 (723) is 33 Days. This Number is associated with the Age of Jesus, the Lion King.
