

RATCHET STUD INSTALLATION AND ALIGNMENT

- A. Screw Ratchet Stud into rafter tube. Tighten with $\frac{1}{2}$ " end wrench so that a flat side of the body faces each end of the tube.
- B. Pull outward on the cap and rotate it until the pin in the cap faces the far end of the tube (the end with the claw casting).
- C. Using a pair of pliers, press the pin into the cap until it is flush with the top.
