

# SAY HELLO TO A **BREAK THROUGH** IN AIR DUCT TECHNOLOGY

Announcing an innovative breakthrough in mechanical lock construction! Our new Smooth-Lock technology:

- Improves Air Flow
- Reduces Friction Loss
- Improves Overall Duct Performance
- Results in a Reduction in Energy Usage

The traditional mechanical lock construction require that one edge of the interlocked fabric be exposed to the air stream, this can cause increased friction loss and a reduction in performance. Our new process retains the physical properties of the mechanical lock and removes that inside edge. The result is a smooth interior, less friction loss, improved air flow and a reduction in energy usage.

*The product is available exclusively from Peppertree Air Solutions, a licensed manufacturer of Flexmaster Company Ltd.*

9094 Leslie Street, Unit #7  
Richmond Hill, Ontario L4B 3L9  
(905) 771-8898
