COMMITMENTS

SIGNIFICANT ACCOUNTING POLICIES

These annual consolidated financial statements of the Company were prepared using accounting policies consistent with IFRS. A summary of significant accounting policies under IFRS is presented in Note 3 of the consolidated financial statements of the Company for the year ended December 31, 2018.

RISK FACTORS AND RISK MANAGEMENT

SEGI shareholders and potential investors in SEGI should carefully consider the following risk factors and all the other information contained in this MD&A when evaluating SEGI and its common shares.

An investment in the Company's shares involves a number of risks, many of which are beyond its control. The risks and uncertainties set out below are all of the known risks, which are deemed to be material to the Company's business or the results of its operations. When reviewing forward-looking statements and other information contained in this prospectus, investors and others should carefully consider these factors, as well as other uncertainties, potential events and industry-specific factors that may adversely affect the Company's future results. If any of these risks should actually occur, the Company's business, financial condition, results of operations, cash flows and prospects could be harmed. Such risks and uncertainties are not the only ones the Company faces. Additional risks and uncertainties of which the Company is currently unaware or that are deemed immaterial may also adversely affect the Company's business, financial condition, results of operations, cash flows and prospects.

Liquidity and Negative Cash Flows

The Company's cash on hand, marketable securities, loan receivable and public investments at December 31, 2018 was \$4,203,000. This amount should be adequate to continue to fund the Company's operations for the foreseeable future. If the Company had to raise capital to fund its operations or to make further investments in its businesses, it would have to sell assets or raise funds through the sale of additional equity or a combination of those two things. There may not be a ready market for the sale of its assets, and it may not be possible to issue additional shares or other securities, if it were to be possible may result in significant dilution to the interests of existing shareholders.

The Company's principal asset is its investment in the shares of SEGL which owns a number of film production businesses in Korea and certain other related investments. The film production businesses are at an early stage of development and will likely require additional funding to continue operations or

to develop their business plans until they become self-funding. Revenues from the film production businesses owned by the SEGL are very unpredictable and SEGL may experience negative cash flow from operating activities. If that is the case, SEGL would have to fund its operations with its cash on hand and marketable securities.

Limited Diversification of Investments

Due to the small size of the Company and the fact that it has only a limited number of investments, the Company is subject to a greater risk of a downturn in one or more of its investments. A concentration of the Company's invested funds in a limited number of businesses –in particular in the film production business in Korea through the shares of SEGL - means that in the event that any such business or industry or investment is unsuccessful or experiences a downturn, this will likely have a material adverse effect on the Company's business, results from operations, and financial condition. It also means that the Company is more exposed to business cycles than it would be if it owned a larger number of investments, which were diversified over various industries with differing business cycles in different geographic areas.

Industry Risks

Each of the Company's investees is subject to the risks inherent in the industry in which it operates. In the case of SEGL, its businesses are very dependent on the strength of the Korean film industry and SEGL's ability to continue to finance and make successful, profitable movies. Illegal piracy of films and illicit internet downloads of films are also risks which will continue to threaten the Korean film industry.

Competition

The Korean film production companies owned by SEGL face intense competition in their respective markets, including competition from other companies some of whom have greater financial and other resources, and more advanced technological development. The movie production industry is a world-wide industry and films made in Hollywood, India and many other countries compete with Korean films on the worldwide stage for viewership. There can be no assurance that they will be able to successfully compete against their respective competitors or that such competition will not have a material adverse effect on their businesses, financial condition, results of operations and cash flows.

Currency Fluctuations

The Company is exposed to fluctuations in the value of the currencies of the Republic of Korea, the Special Administrative Region of Hong Kong, Singapore, Canada and the United States. The Company does not use currency derivatives to hedge against adverse currency fluctuations.

Legal Claims and Other Contingencies

The Company and its investee companies may become parties to law suits, claims and litigation arising in the ordinary course of business. Such law suits could result in significant costs and the outcome of such law suits could have a material negative impact on the Company's financial position, operating results, or the Company's ability to continue to carry on its business activities.

Lack of Market for the Company's Shares

Although the Company's common shares are listed and traded on the TSX Venture Exchange, there may not be a liquid market for the shares and any market price for the shares may not reflect the underlying value of the Company's business and assets.

Economic Conditions in Korea

The principal asset of the Company is its investment in the shares of SEGL and the majority of SEGL's operations and assets are located in the Republic of Korea through its ownership of film production companies based in Korea and other investments in Korea. As a result, the Company is subject to

political, economic, legal and regulatory risks specific to Korea. From early 1997 until 1999, Korea experienced a significant financial and economic downturn, from which it has now recovered.

Tensions with North Korea

Relations between the Republic of Korea and North Korea have been tense throughout Korea's modern history. The level of tension between the two Koreas has fluctuated and may increase or change abruptly as a result of current and future events. In recent years, there have been heightened security concerns stemming from North Korea's nuclear weapons and long-range missile programs and increased uncertainty regarding North Korea's actions, particularly in light of the recent leadership change, and possible responses from the international community. Tensions have escalated on the Korean peninsula, and there can be no assurance that the level of tension will not escalate further in the future.

Any further increase in tensions which may occur, for example, if military hostilities occur or North Korea experiences a leadership or economic crisis, could have a material adverse effect on the Company's operations and the market value of its common shares.

Financial Instability in Other Countries

The Korean market and the Korean economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has adversely affected the Korean economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries. A loss of investor confidence in the financial systems of emerging and other markets may cause increased volatility in Korean financial markets. It is possible that the financial events of the type that occurred in emerging markets in Asia in 1997 and 1998 will happen again which would have an adverse effect on the market value of the Company's common shares.

INTERNAL CONTROLS

Disclosure controls and procedures

Management of the Company is responsible for establishing and maintaining disclosure controls and procedures for the Company as defined under National Instrument 52-109 issued by the Canadian Securities Administrators. The Company as a venture issuer is not required to certify the design and evaluation of the issuer's disclosure controls and procedures.

Internal controls over financial reporting

Management of the Company is responsible for designing internal controls over financial reporting for the Company as defined under National Instrument 52-109 issued by the Canadian Securities Administrators. The Company as a venture issuer is not required to certify the design and evaluation of the issuer's disclosure controls and procedures.

International Financial Reporting Standards

The Company's financial statements for the year ended December 31, 2018 and the comparative information presented in the financial statements for the year ended December 31, 2017 have been prepared in accordance with IFRS applicable to the presentation of financial statements.

STRATEGY AND FUTURE DIRECTION

The Company's initial strategy and focus was to (i) identify and acquire small/medium-sized growth companies, primarily in the Republic of Korea, that possess proprietary know-how or technologies and a track record of profitable operations; (ii) assist the management of each acquired company to enhance

its value; (iii) originate collaboration amongst the portfolio of acquired companies to create new opportunities for one another and leverage off each others' capabilities and resources; and (iv) reflect the collective value derived from the performance of the acquired businesses on the share price of the Company. As a result of the implementation of this strategy the Company made a number of investments in the Korean film and entertainment business through SEGL.

The Company's principal asset is its 14.45% interest in the shares SEGL that are listed and trade on the Catalist of the Singapore Exchange. On the trading day immediately prior to the date of this MD&A, the shares closed at a price of SGD \$0.023, and the market value of the Company's investment in SEGL was SGD \$3,426,333 (CAD \$3,430,102) or CAD \$0.023 per SEGI share. SEGI's strategy and focus will continue to be to work with the management of SEGL and its other investee companies to enhance the value of their businesses and thereby improve the value of the Company's investment.

SEGI may also opportunistically make investments in selected small-capitalization publicly-traded companies that the Company believes are attractive investment propositions or undervalued relative to their underlying financial fundamentals and operating performance. After making an investment into such publicly-traded companies, SEGI plans to encourage and implement such measures as changes in management strategy, business diversification, cost cutting, strategic mergers & acquisitions, capital restructuring, improvements in investor relations activities, and other initiatives typically undertaken by corporate restructuring specialists, in order to seek capital appreciation. Such small-cap stocks targeted by SEGI are investment opportunities that are normally overlooked by institutional investors (i.e. private equity funds, hedge funds, special situations funds, etc.) due to their small size and relatively negligible presence in the market, making such opportunities an attractive niche for SEGI to exploit without significant competition.

The ultimate objective of the Company will be to reflect the collective value derived from the performances of SEGL, SMGL and other investments in the Company's share price for the benefit of the Company's shareholders.

OUTSTANDING SHARE DATA

The Company has authorized an unlimited number of common shares. At December 31, 2018 and the date of this MD&A there were 148,900,183 outstanding common shares and options to acquire an additional 1,300,000 common shares.
