

# The Young Brain:

## The Impact of Mental Health & Substance Use

February 27, 2019

9am - 4pm

Beaver Valley Intermediate  
Unit

147 Poplar Drive

Monaca, PA 15061

Adolescence is a time for significant growth-physically and emotionally. Because the young brain is not fully developed, it responds differently than an adult brain.

It is important to understand this development and how it is impacted by mental health and substance use issues.

### Objectives:

- Participants will understand the basic development of adolescents
- Participants will recognize the signs and symptoms of mental health and substance use disorders in adolescents
- Participants will develop skills to work with adolescents with co-occurring issues

#### Presented by:

Jill Perry

Counselor, MS, NCC, LPC, CAADC, SAP
