Flew into vision, sat on a bush for five seconds and then deeper in a bush for five minutes of excellent views. Disappeared for 10 minutes before being relocated bathing in the swampy water. Forest Park, Queens, New York, USA: April 14, 2005 At the Water Hole again, quite the spot this year. The male Prothonotary warbler remains, probably the same one as was seen on April 6, although two others have been sighted. Only one present today, but the views were much better than previous. It seems quite used to birdwatchers as it searched for insects no more than 10 feet away. Brilliant yellow. Also, present, was **SWAINSON’S WARBLER** (new species for US), for which most birdwatchers were present. Views were amazingly close, the bird sometimes no more than five feet away searching the underside of leaves for insects. Occasionally, remained stock still for two or three minutes. Flew, but was relocated on east side of waterhole, but it was never in the company of the Prothonotary warbler, as it preferred drier material away from water hole. Also, Downy woodpecker

On the Pool, another Northern waterthrush, while along and above the Loch, Blue-grey gnatcatcher; American redstart; House wren; second Baltimore oriole, this one at head height, singing; right at the end of the day a wonderful male Rose-breasted grosbeak on the Great Hill. In total, 52 species

Central Park, New York City, New York, USA: May 6-8, 2005 Dull weekend, with bad light. Went running on Saturday instead of birding, a good move as reports for this day were low. Friday was dull, too, but there was some brightening up by Sunday. On Friday, highlights were Solitary sandpiper and Black-throated blue warbler, while on Sunday at the Maintenance Field saw a male **BLUE-WINGED WARBLER** (new species for US) singing and displaying with excellent views and, my own discovery, a male Orchard oriole, very low down and out in the opening. Both the warbler and oriole often disappeared into the thick but re-emerged several times. Also present in the Ramble were Northern flicker, Black-and-white warbler, Wood thrush, and Green heron, hunting at the Azalea Pond, while at Tanner's Spring were Eastern towhee and Northern parula

Central Park, New York City, New York, USA: May 10, 2005 A bright early evening in which I had no more than an hour to bird watch before a running class. In the Rambles, an American redstart; first Scarlet tanager of the year. Then a report came in of a species that was first seen in the Rambles at midday, which led to me running two miles in 15 minutes to see **KENTUCKY WARBLER** (new species for US) in the North Woods, off a path that led off right from the Loch. I think it was a male, but it did not show as much black marking to the head as perhaps a male might have but more than perhaps a female would do. The bird was jumping up continually on both sides of the path and gave great views

Central Park, New York City, New York, USA: May 13, 2005 A dull evening (one of many this year), in which the only notables were Red-eyed vireo, male and female Black-throated blue warbler, Cedar waxwing, Ovenbird, Black-throated green warbler, Magnolia warbler and Spotted sandpiper in the Turtle Pond

Forest Park, Queens, New York, USA: May 14, 2005 Arrived at 11:30 a.m. following the Queens half-marathon (1:29:12; 6:47 pace), but the day was productive. The waterhole in the park is a great deal smaller than when I came here in late March and mid-April, but an artificial bathing pool brought in many species, including Indigo bunting; Nashville warbler; Blackburnian warbler. Also around were Northern Parula; Lincoln's sparrow; female Downy woodpecker, American redstart, Scarlet tanager and first-year **SUMMER TANAGER** (new

species for US). Additional species included Northern waterthrush; Blackpoll warbler, and Chestnut-sided warbler

Fort Zachary State Park, Key West—Cattle egret; Grey kingbird; juvenile Blackpoll warbler

Key West Botanical Garden, Stock Island—**WHITE-CROWNED PIGEON** (new species) in two flocks of three birds. Also Great-crested flycatcher, and, so quickly, my second-ever Yellow-billed cuckoo

That it was a thrasher was not of concern, and then this morning I saw that one of Baja's endemics was this species, which goes no farther north, hence no inclusion in Sibley); Belted kingfisher (this was odd. Again, there was no mistaking what this was. Gravesend, Kent: September 29 (Startling discovery on 25 September and still there on the Saturday of the weekend, a Beluga whale, the southernmost sighting ever of this Arctic mammal. Perhaps along with a specimen seen in 1913, and some 3,100 kilometres south of its usual range. It has been swimming in the River Thames quite happily, and the authorities are happy to allow it to make its own mind as to where to go—at least for the moment.) Also seen, Black-tailed godwit; Dunlin and Common ringed plover

Margate, Kent, England: November 8, 2018 A failed attempt to see the White-billed diver that had been seen for several days and was seen later this day (the bird a week or so later was found dead on a beach in Suffolk). Crossness Nature Reserve, Belvedere, Kent: February 20, 2019 A 20-kilometre run from my home at 6:15 a.m. and a 30-minute window to see **PENDULINE TIT** (new species for U.K.), which another birder heard and I located. The view lasted 10 seconds, but the mask and red to the top of the back were evident. Then I needed to run to catch the train up to London to go to work. The bird was seen on another four occasions, but always fleetingly, during the day. It was found on February 18.

Vange March, Pitsea, Essex: March 30, 2019 Distant, bad views of one Garganey. Also, Avocet; 3 x Spotted redshank; Redshank, and Great egret

Wanstead Flats, Manor Park, London: April 1, 2019 Very happy bobbing around on the small, innocuous Jubilee Pond a male Garganey, providing the best views I have had of this wonderful duck species. Other birders reported it as having been skittish in the morning, hassled by other birds and flying way on at least one occasion, but for me, arriving at midday, it was very calm. On walk across the heathland, also Kestrel; Greenfinch singing, and Skylark displaying. The Garganey was present for only this one day

Albufera, Mallorca, Balearic Islands, and other sites: April 6-7, 2019

Crossness Nature Reserve, Belvedere, Kent: May 18, 2019 My second new species for the U.K. in 2019, and both have been in this somewhat innocuous site that when I was a child was not birded but is increasingly being so and this bringing up exciting finds. Today it was a **GREAT REED WARBLER** (new species for U.K.), which is the first for the London birding area. I saw it very soon after arriving, and heard its fairly loud croaking call. Somewhat a challenge to see and photograph as the view was from behind a metal fence with reeds in between me and the reeds in which it was flitting. Also reed warbler, Sedge warbler, and two Whitethroat feeding young

Dungeness, Kent, and other Kentish spots: May 26, 2019 Essentially a day out with my parents to show my Mum orchids, and we went to Park Gate Down and Yocklett’s Bank. At the first we saw Monkey orchid; one or two Early purple orchid still in near enough good shape and Common twayblade. At the latter we saw Lady orchid, two Fly orchid and one, my first ever, Greater butterfly orchid, and in bloom, perhaps early for this species. A quick trip down to Littlestone, near Old Romney, failed to produce the Serin that has been reported most of the week, mostly because for the first time in that week the wind picked up. A quick visit to Dungeness to get a cup of coffee produced Common gull on nest box right by the visitor centre; Oystercatcher; Common tern; Pochard; Great crested grebe, and Little stint.

London Wetland Centre, Barnes, London: May 27, 2019

Quite quiet. Redshank; Ringed plover; Little ringed plover on eggs (a wire cage has been placed around the pair); two Common tern; Sand martin; Swift; Blackcap, and two Stock dove. (Disappointing in butterflies, too, with only a Red admiral, Brimstone and Large white seen.)

Dungeness, Kent, and other Kentish spots: June 1, 2019

I caught up with the **SERIN** (new species for U.K.) on a very much calmer day, the bird still in the conifer tree by a house and singing. In total, 51 species, including Lesser whitethroat; Whitethroat; Sedge warbler; Reed warbler; Cuckoo; Hobby; Whimbrel; Linnet, and one Mediterranean gull

Rainham RSPB Reserve, Purfleet, Essex: June 2, 2019 Warm and still. Barn owl; Redshank (three perched on posts, two of them on consecutive perches); Curlew; Cettis warbler; Cuckoo, and 3x Avocet

Lea Valley, Seventy Acres Lake/Fishers Green, Essex: June 2, 2019 drake Ring-necked duck. It took a while to find, hidden behind an island, after a search around the whole lake. Good views, and far better than the one other time I have seen it

Ditchling Common Country Park, near Burgess Hill, East Sussex: June 22, 2019 Garden warbler, Chiffchaff; Lesser whitethroat and male Bullfinch. (Also, my reason for coming here, Black hairstreak, a new species for me and my 45th U.K. butterfly, in a recently discovered colony for this rare butterfly; also Common blue, Ringlet; Red admiral; Meadow brown, Speckled wood and Painted lady. It took a while to see the Black hairstreak, but one was quite docile at ground level, another paused for some while in the branches maybe two metres above head height)

East Blean Woods, near Hoath, Kent: June 23, 2019 (And another rare species, my 46th U.K. butterfly, Heath fritillary. Quite easy to see once in the right black, the species seeming to be jittery in flight and more than happy to alight on bracken at about one metre above the ground. I might have seen 15 individuals in 30 minutes; also Painted lady (quite numerous on my walk to the woods from Herne Bay), Red admiral and Ringlet)

Hutchinson's Bank/Chapel Bank, New Addington, Surrey: July 6, 2019 (Butterflies along the chalk escarpments—one Small blue; Common blue; Ringlet; hundreds of Marbled white, and a dozen Dark-green fritillary)

Fairmile Common, Cobham, Surrey: July 13, 2019 (Within the M25 London orbital road but on heathland with bell heather, my 47th U.K. butterfly species, both male and female Silver-studded blue; also my first Gatekeeper of the year)

Oare Marshes Nature Reserve, Oare, Faversham, Kent: July 14, 2019 My third-ever Lesser yellowlegs and second-ever Bonaparte's gull, very likely the same adult that has been wrongly migrating here for seven or eight years and also likely remains somewhere in the U.K. all year and comes to Oare to moult. In mid-July, though, it is in full summer plumage; also Spotted redshank; Common redshank; Black-tailed godwit (500); one very early Golden plover; Bearded tit; Peregrine, and three male Ruff in close to summer plumage

Headley Heath, Tadworth, Surrey: July 20, 2019 (Butterflies on heath and chalkside, including a new species, my 48th U.K. butterfly species, one single White-letter hairstreak, and on a white flower on a chalk hillside, not near elm or bramble; also Brown argus; White admiral; Dark-green fritillary; Silver-washed fritillary; Large skipper; Small skipper; Gatekeeper; Painted lady, and Grayling on stony soil among the gorse. No luck with the Silver-spotted skipper, of which a few reports have come in.) Juvenile green woodpecker

Rainham RSPB Reserve, Purfleet, Essex: July 28, 2019 Water dredged from some of the marsh area. Wood sandpiper; 3 x Ruff; Avocet; 200 x Black-tailed godwit; Lapwing; 10 x Little egret, and Curlew. (Grey seal basking on the river shore)

Oare, Uplees and Conyer marshes, Faversham, Kent: August 5, 2019 More of a wonderful walk with Francesca, my wife, than a birding excursion, but the Bonaparte's gull remains, although now heavily moulted. Also Curlew; Whimbrel; 10 x Common sandpiper; 5 x Oystercatcher; Marsh harrier, and 3 x Kestrel, but not much on the East Flood due to maintenance. (Also Clouded yellow butterfly and several Painted lady)

Hutchinson's Bank, New Addington, Croydon; 25 August, 2019 A visit to see if I could spot a Glanville fritillary butterfly (I did not), which for the first time in this introduction site reputedly started by person or persons unknown in 2011 had a second brood, albeit probably lesser in number than the first brood in April/May. But as I and another birder-turned-summer-butterfly-watcher searched a steep-sided paddock I spotted a **GOSHAWK** (new species for U.K.) that floated over the tree line scattering pigeons. A juvenile, it showed large broad wings, pear-drop-shape splotches running from neck to belly, pale belly and correct banding on the tail. It was also large, with all the ID marks together ruling out Common buzzard and/or female Sparrowhawk. (Also Chalkhill blue, Brown argus; Small copper; Dark-green fritillary, and Silver-washed fritillary butterflies; and a Common shrew, a species I do not remember seeing before.)

Oare Marshes Nature Reserve, Oare, Faversham, Kent: August 31, 2019 A Peregrine spent much of the day pestering the pigeons and waders. Also a Kestrel; 2 x Curlew sandpiper, with one adult retaining some summer plumage; Knot; Golden plover; Grey plover; a juvenile Wood sandpiper; 300 x Black-tailed godwit; Water rail; 30 x Dunlin, also some retaining summer plumage, and the Bonaparte's gull remains, although I was lucky to pick it out in its autumn plumage as I was searching for Curlew sandpiper

Titchfield Haven, Stubbington, Hampshire: September 21, 2019 **BLUETHROAT** (new species for U.K.), seen from the Meon Hide, with two good views of a minute or so each out in the open, and some more half-hidden views within the reeds. Also, Turnstone by the harbour

Somerset (West Hay; Chew Valley Lake): Oct. 5-6, 2019 Little egret, Great egret and Cattle egret all in the same telescope view. All told, 13 x Great egret; 6 x Little egret, and 3 x Cattle egret, two of which showed yellow blush to head. Also 2 x Yellow-legged gull; Pintail; Little grebe, and numerous Gadwall
