

**GeorgiaBehavioral**  
HEALTH PROFESSIONALS

The behavioral health providers at Savannah Psychiatry are excited to announce that we have partnered with Georgia Behavioral Health Professionals (GBHP). In order to better meet the needs of the individuals and families who have placed their trust in us and for the communities we serve, the providers at Savannah Psychiatry searched for a partner who could provide the resources our community so desperately needs.

GBHP was founded in 1993 with the goal of providing the best comprehensive behavioral health care in a private practice setting with the most well-trained mental health professionals available. GBHP provides integrated care with psychiatrists, addiction medicine doctors, psychologists, interventional psychiatrists, nurse practitioners, physician assistants, and masters level therapists to treat a wide range of behavioral health disorders. With over twenty-three locations serving in Georgia, GBHP is the largest behavioral health group in the state. By partnering with GBHP, Savannah Psychiatry will have access to their staff of specialists and will be able to offer a diverse service of behavioral health care under one roof.

You will continue to see the same smiling faces. All of our providers will continue to work with you and assist you in any possible manner. As always, we will continue to treat our patients as a member of our family. Our phones will continue to be answered by a caring staff member and every attempt will be made to answer all questions regarding your care.

If you do have any questions, please let us know.
