## SECTION A. DEMOGRAPHICS

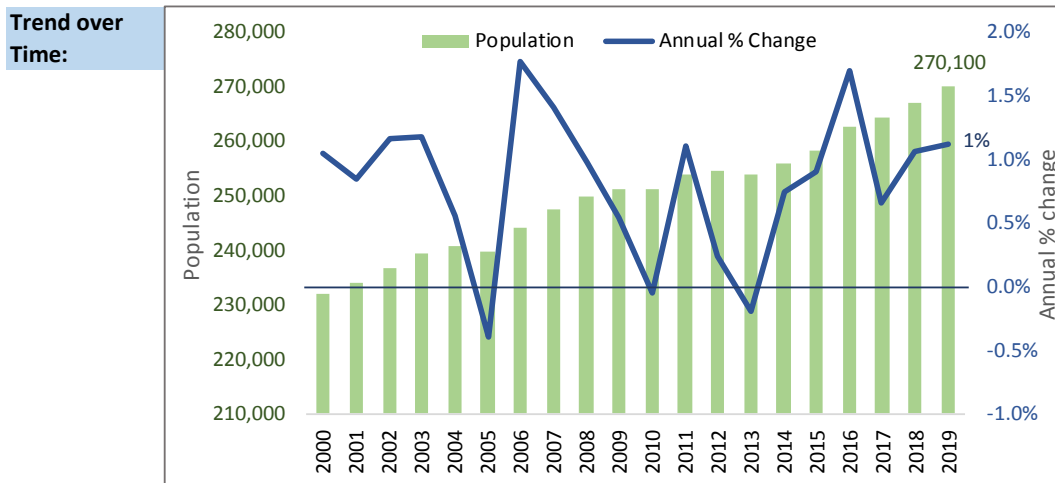

### SUBSECTION A.1. POPULATION

#### TOTAL POPULATION AND GROWTH RATE

Source: US Census and WA State Office of Financial Management, Population Estimates

Summary: The population of Kitsap County has increased 16% since 2000 to approximately 270,100 in 2019. On average from 2000 to 2019, the population increased about 1% every year. From 2018 to 2019, the annual population increase was 1.1%.

	Early year 2000	2010	Recent year 2019	Statistical trend since 2000	
<b>Kitsap County</b>	231,969	251,133	270,100	Increasing	Annual change: 1%
<b>Washington State</b>	5,894,143	6,724,540	7,546,410	Increasing	Annual change: 1%

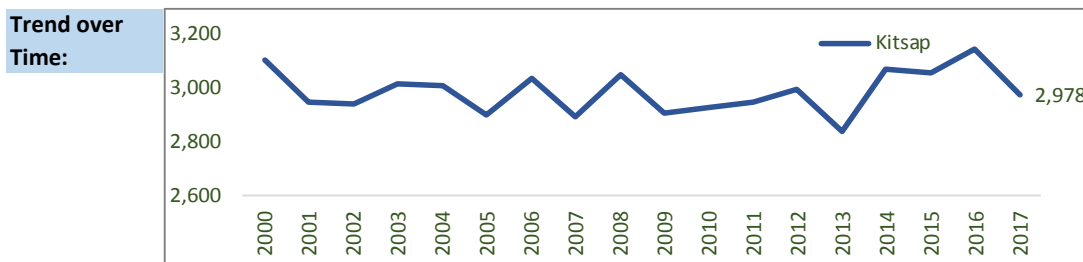

#### COMPONENTS OF POPULATION GROWTH

Natural change rate is the percent increase or decrease in population due to births and deaths combined. Estimated migration rate is the percent increase or decrease in population due to movement of people into or out of the area.

Source: US Census and WA State Office of Financial Management, Population Estimates; WA Department of Health, Center for Health Statistics, Vital Statistics Databases

Summary: From 2000 to 2017, births have remained relatively unchanged in Kitsap County, while deaths have been increasing steadily, resulting in a slowly decreasing natural change rate. In 2017, there were still more births than deaths, which means that natural change was positive, although very small (0.3%). In addition, the estimated migration rate of people into Kitsap County has remained at a steady low rate from 2000 to 2017, accounting for the majority of Kitsap's population growth.

BIRTHS	Early year 2000	2010	Recent year 2017	Statistical trend since 2000	
<b>Kitsap County</b>	3,108	2,931	2,978		n/a
<b>Washington State</b>	81,004	86,480	87,508	Increasing	Annual change: 1%

## SECTION A. DEMOGRAPHICS

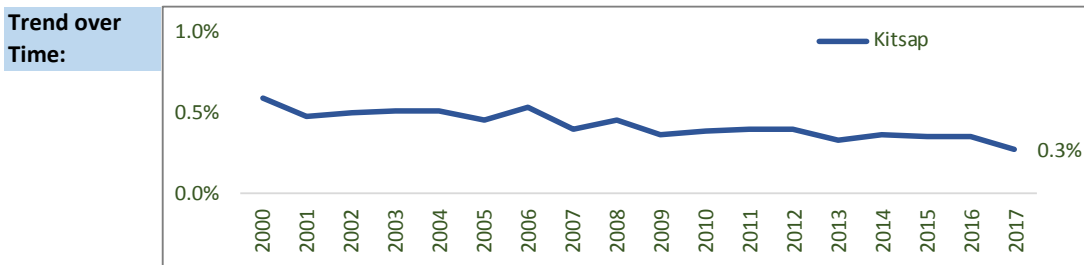

### SUBSECTION A.1. POPULATION

#### POPULATION PROJECTIONS

Source: US Census and WA State Office of Financial Management, Population Estimates

Summary: Kitsap County's population is projected to increase steadily.

#### POPULATION MOVING WITHIN OR INTO KITSAP COUNTY IN PAST YEAR

The percentage of residents who moved within Kitsap County or came into Kitsap County from another county, state or country.

Source: US Census and American Community Survey

Summary: During 2013 to 2017, about 10% of Kitsap's population moved within the county. Three percent moved in from another Washington county, 5% moved in from another state and about 1% moved here from abroad.

	2013-17		
	#	% of county	Median Age
Moved within Kitsap	25,073	10%	28
Moved from different WA county	7,931	3%	30
Moved from other state	12,792	5%	26
Moved from abroad	1,791	1%	30

## SECTION A. DEMOGRAPHICS

### SUBSECTION A.2. POPULATION BY SUBGROUP

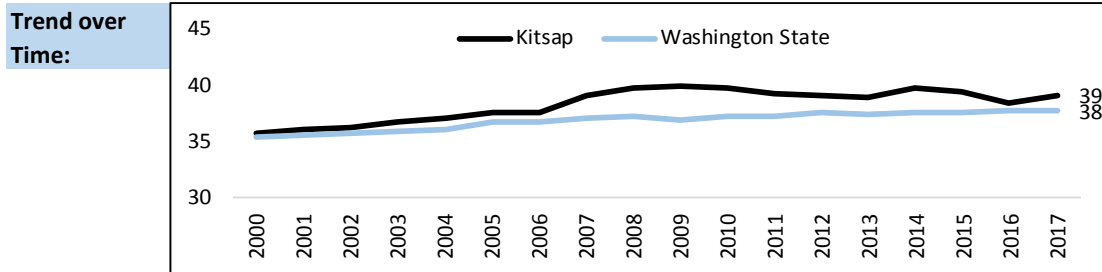

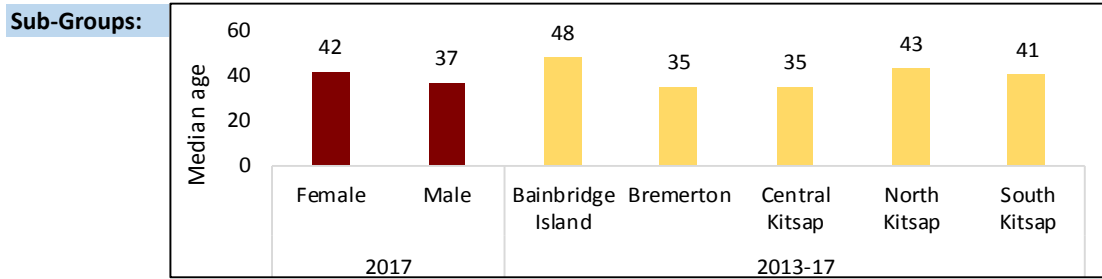

#### MEDIAN AGE

Age

Source: US Census and American Community Survey

Summary: The median age in Kitsap is 39 years, which is a statistically significant increase since 2000. Kitsap County has the 23rd highest median age of all the counties in Washington. The median age is slight higher for females and for those living on Bainbridge Island and in North Kitsap. Bremerton and Central Kitsap have the lowest median ages.

Age	Early year 2000	2010	Recent year 2017	Statistical trend since 2000	
Kitsap County	36	40	39	Increasing	Annual change: 0.6%
Washington State	35	37	38	Increasing	Annual change: 0.4%
Kitsap County ranking within Washington (2013-17):			23rd highest

## SECTION A. DEMOGRAPHICS

### SUBSECTION A.2. POPULATION BY SUBGROUP

#### POPULATION BY AGE AND GENDER

Source: US Census and WA State Office of Financial Management, Population Estimates

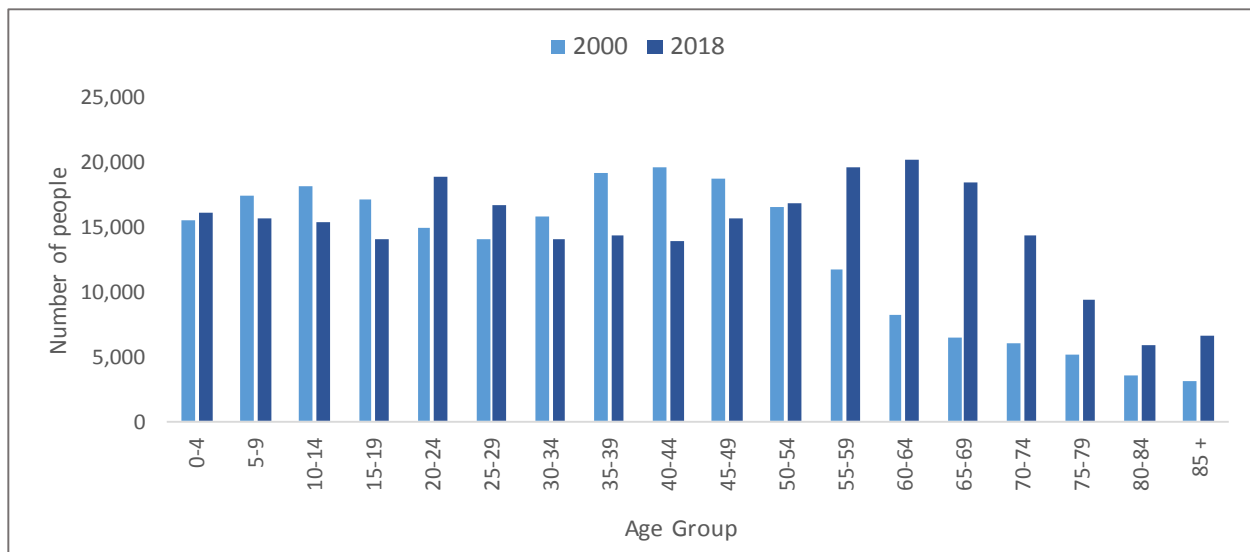

Summary: Kitsap's population has been slowly aging from 2000 to 2018. Please note the increased numbers of males ages 20-29 and the increase in the older population, especially the older female population.

#### POPULATION BY AGE GROUP OVER TIME

Source: US Census and WA State Office of Financial Management, Population Estimates

Summary: Kitsap County's population has been slowly shifting from the majority being age 35 to 49 in 2000 to the majority being age 55 to 69 in 2018. Note the increase in age 20-29 from 2000 to 2018. Although in general the child population has been decreasing, 2018 saw a slight increase in those ages 0-4 compared to 2000.

#### RACE AND ETHNICITY OF STUDENTS ENROLLED IN PUBLIC SCHOOL Percentage

Population by race (White, Black/African American, American Indian/Alaska Native, Asian, Native Hawaiian/Other Pacific Islander, and 2 or more races) and ethnicity (Hispanic).

Source: Office of Superintendent of Public Instruction

Summary: Students enrolled in public school are more diverse than the general population, with 64% being non-Hispanic White. All minority races have higher proportions among students than among the general population, except for non-Hispanic American Indian and Alaska Native. Hispanic and students of 2 or more races, in particular, are much higher proportions of the student population than of the general population. Bremerton and Central Kitsap are the most diverse school districts, while Bainbridge Island is the least diverse.

### YOUTH WITH A PARENT IN THE MILITARY

Source: Healthy Youth Survey

Summary: The percentage of 8th and 10th grade students reporting having had a parent in the military has been decreasing from 2012 to 2018, and was about 40% in 2018.

Percentage	Early year	Recent year	Statistical comparison	
8TH GRADE	2012	2018	of 2012 and 2018	
Kitsap County	47%	41%	Decreasing	n/a
Washington State	28%	24%	Decreasing	n/a
Statistical comparison: Kitsap vs. Washington:		Higher		
Estimated number of Kitsap County students:		1,108		

Percentage	Early year	Recent year	Statistical comparison	
10TH GRADE	2012	2018	of 2012 and 2018	
Kitsap County	44%	40%	Decreasing	n/a
Washington State	26%	22%	Decreasing	n/a
Statistical comparison: Kitsap vs. Washington:		Higher		
Estimated number of Kitsap County students:		1,101		

### VETERAN POPULATION

Percentage

Source: US Census and American Community Survey

Summary: The proportion of the population who are veterans has been decreasing from 2005-09 to 2013-17, but remains higher than the state. Central and South Kitsap have the highest veteran populations. The veteran population is almost 90% male. The majority (78%) has at least some college education, and the veteran population is slightly less diverse than the county population overall. The majority are veterans from the Vietnam era (36%), the Gulf War era pre 9/11 (33%) and the Gulf War era post 9/11 (28%).

Percentage	Early years	Recent years	Statistical comparison	
	2005-09	2013-17	of 2005-09 to 2013-17	
Kitsap County	20%	17%	Decreasing	n/a
Washington State	13%	10%	Decreasing	n/a
