

Do you have a child between the ages of 3 and 6 years old? Are you interested in participating in research? We are a research team working at St. Mary's College of Maryland to understand how children think about others. The study is designed to feel like a fun, **~15 minute game** for your child to play. This study will take place **entirely online**. Parents schedule a zoom appointment with researchers. During the study, your child will watch a couple short videos of puppets and will then be asked questions about the puppets (For example: how nice was the puppet? Which puppet do you want to play with? etc.) The study is designed to help researchers, parents, and teachers have a better understanding of children's social knowledge and preferences.

If you are interested or have any questions, please email duck.lab.smcm@gmail.com.
