

# STEMMLER ARCHERY

CATALOGUE NO. 163

L. E. STEMMLER CO., INC.  
MANORVILLE, LONG ISLAND  
NEW YORK

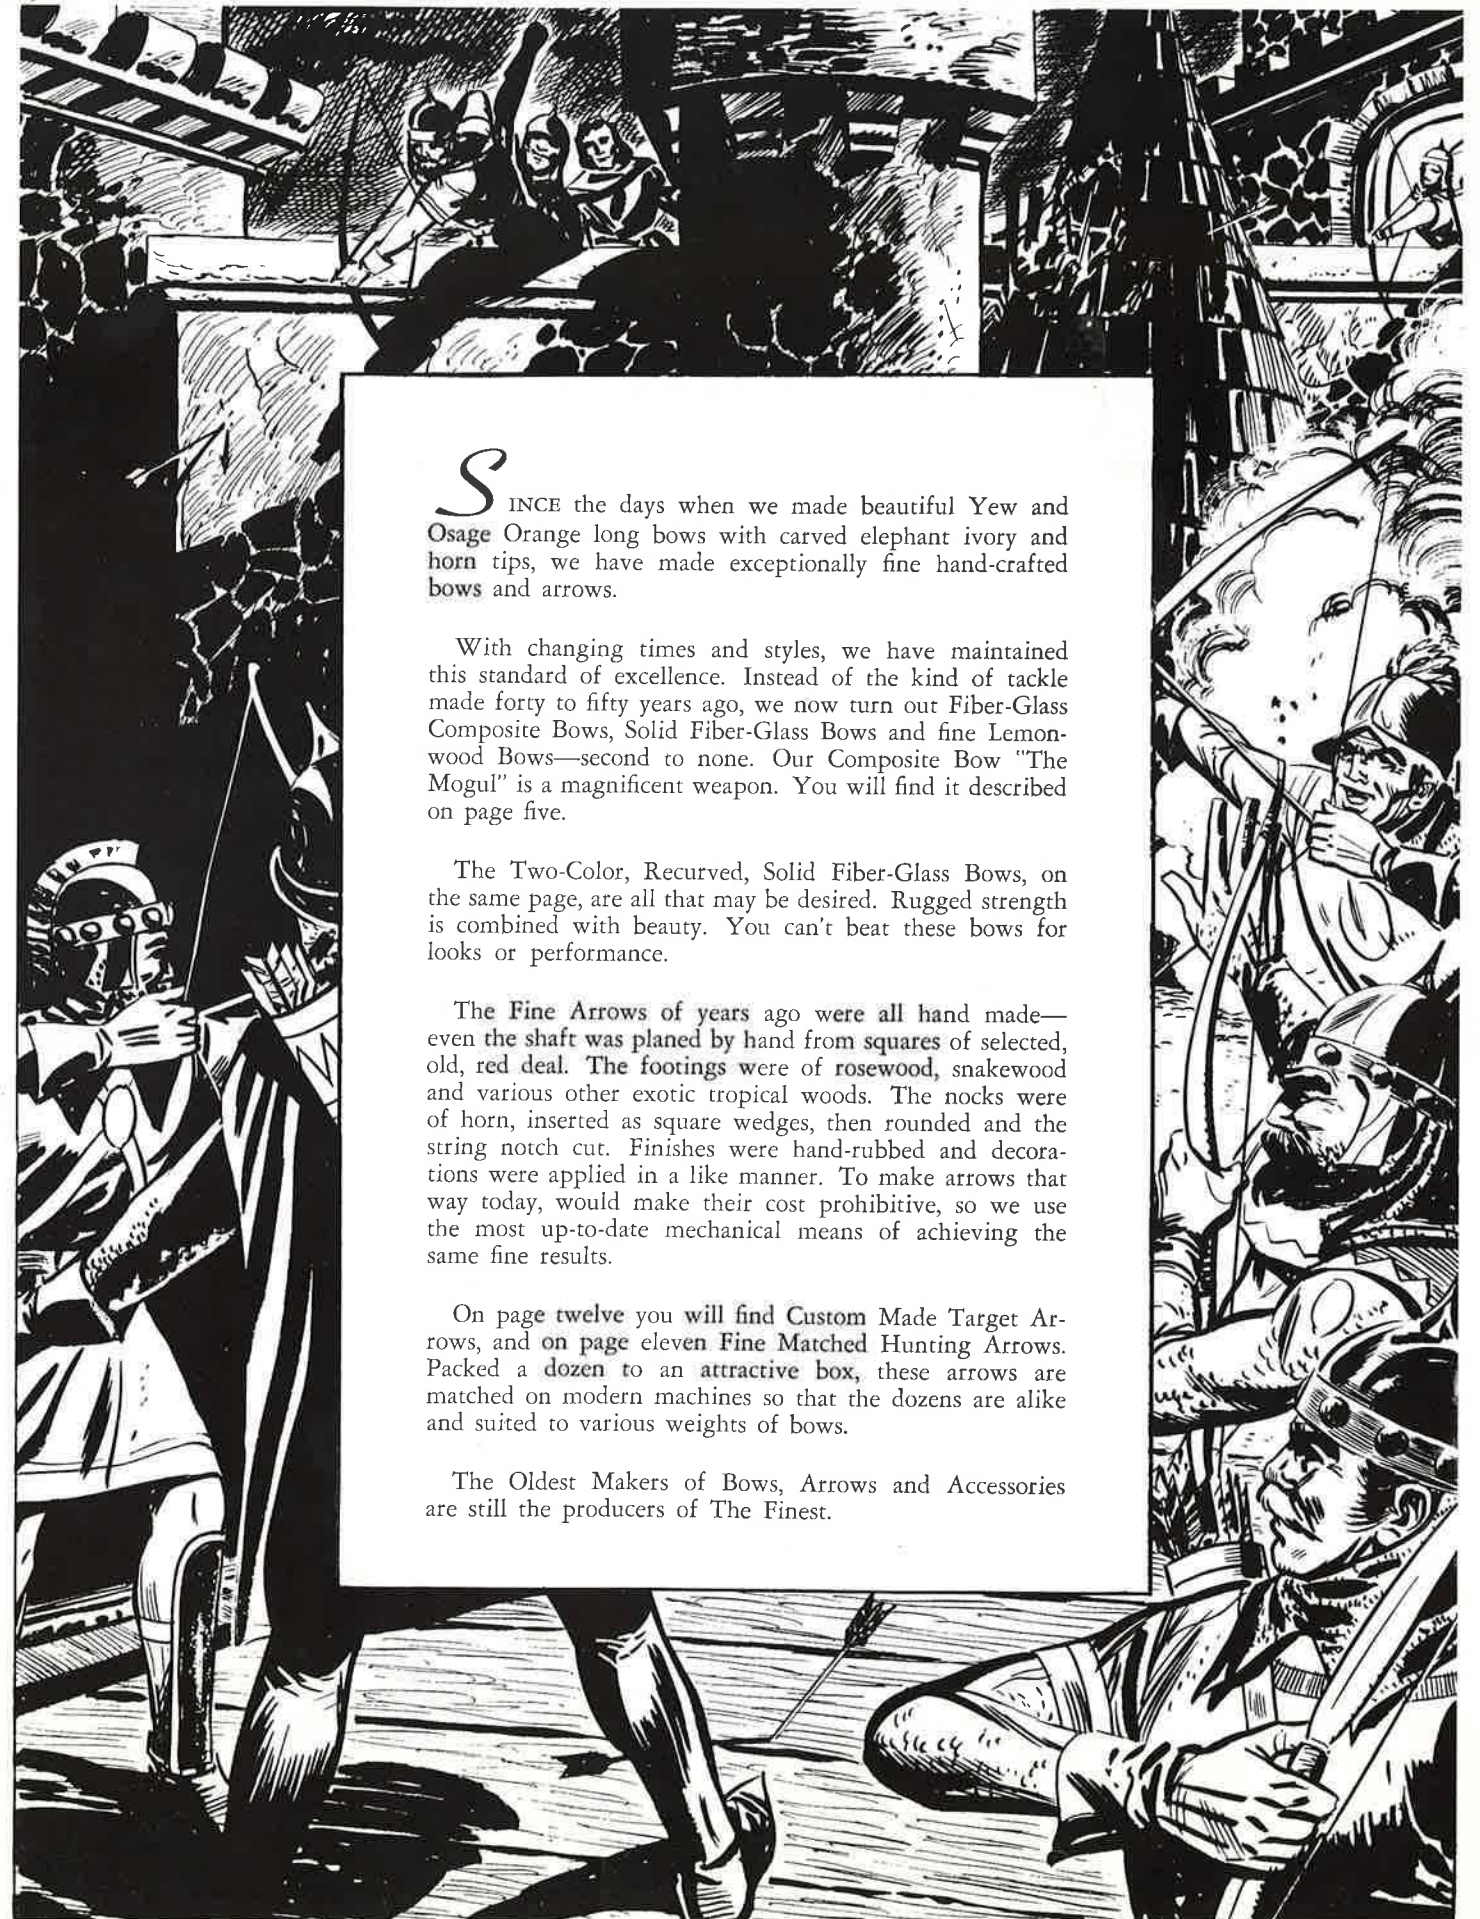

**W**E are enjoying a revival of Archery — the sport that has been the practice of kings and the glorification of races.

Rich in tradition, grounded in song and story, the charm of the bow and whispering arrow has survived an age which consigns old things to memory. Since the days when Nimrod was a mighty hunter before the Lord, the bow has sung the same low, sweet note. Expose its cord to the deep breath of centuries — you will hear it sing of the deeds of Robin Hood, the American Redman and the Cretan auxiliaries of the Roman Ceasar.

The Song of the Bow was loved by our biblical forefathers. The legends of William Tell and David and Jonathan redound forever to its glory. No sport so intrigues the imagination of old and young, man or woman. Archery has a courtesy uniquely its own and has been held a maker of character since the days of ancient Sparta and Persia. Its gear is simple and it owns the whole year as its season.

There is no reason why this rich inheritance of the ages should not be the property of this.

**L. E. STEMLER CO.** is the oldest established manufacturer of Archery Tackle in the U.S.A. Over forty-five (45) years ago we made the traditional Long Bow and Arrows for your fathers. Now we'd like to make modern bows and arrows for you.

**S**INCE the days when we made beautiful Yew and Osage Orange long bows with carved elephant ivory and horn tips, we have made exceptionally fine hand-crafted bows and arrows.

With changing times and styles, we have maintained this standard of excellence. Instead of the kind of tackle made forty to fifty years ago, we now turn out Fiber-Glass Composite Bows, Solid Fiber-Glass Bows and fine Lemonwood Bows—second to none. Our Composite Bow "The Mogul" is a magnificent weapon. You will find it described on page five.

The Two-Color, Recurved, Solid Fiber-Glass Bows, on the same page, are all that may be desired. Rugged strength is combined with beauty. You can't beat these bows for looks or performance.

The Fine Arrows of years ago were all hand made—even the shaft was planed by hand from squares of selected, old, red deal. The footings were of rosewood, snakewood and various other exotic tropical woods. The nocks were of horn, inserted as square wedges, then rounded and the string notch cut. Finishes were hand-rubbed and decorations were applied in a like manner. To make arrows that way today, would make their cost prohibitive, so we use the most up-to-date mechanical means of achieving the same fine results.

On page twelve you will find Custom Made Target Arrows, and on page eleven Fine Matched Hunting Arrows. Packed a dozen to an attractive box, these arrows are matched on modern machines so that the dozens are alike and suited to various weights of bows.

The Oldest Makers of Bows, Arrows and Accessories are still the producers of The Finest.

Both the Straight and Recurved Bows are ground from hand-laid, pre-stressed, properly cured, Fiber-Glass blanks. Years of experience go into the making of these blanks, and they are acknowledged to be the best Fiber-Glass bow stock on the market. Stemmler SAMSON Solid, Fiber-Glass Bows are practically unbreakable. All are beautifully finished.

# Stemmler

# SAMSON Solid Fiber-Glass Bows

# ARROW MATERIAL

## SPINED PORT ORFORD CEDAR ARROW SHAFTS

The most important part of an archer's equipment is arrows. No matter how good a bow is, if arrows do not fly the same, one cannot do good shooting. Of course, one can learn the vagaries of each arrow, and compensate for each shot, but the closer shafts group, the better. Arrows that fly the same, have the same spine. "Spine" is stiffness, plus the ability of the arrow to curve around the bow and straighten out promptly. Different pulls or weights of bows, need differently spined shafts. The demand for REGULAR and SPINED Arrowshafts is growing, and we are constantly being called upon to furnish them.

**REGULAR.** Hand picked for grain and straightness. **No. 75.** 5/16" x 30". **No. 97.** 11/32" x 30" long.

### SPINED.

**No. 76.** 5/16" x 30", for bows to 45 lbs. pull.

**No. 78.** 11/32" x 30", Spined for 55 lb. bows.

**No. 77.** 11/32" x 30", Spined for 45 lb. bows.

**No. 79.** 11/32" x 30", Spined for 60 lb. bows and over.

**PORT ORFORD CEDAR SHAFTS, LACQUERED IN COLORS.** 26" and 28". Precision fine line cresting. Finger-Formed Plastic Nocks on. Tips with 5 degree taper to take any standard head. All one has to do is put on feathers and heads to have beautiful arrows.

**No. 75-PC.** 5/16" Diameter.

**No. 97-PC.** 11/32" Diameter.

## LEMONWOOD BOW STAVES

The best Lemonwood comes from the Cuban uplands; from the mountains of Santiago. It belongs to the gardenia family, and, in the Spring, the Dagame tree (its Indian name) is covered with small, white, sweet smelling blossoms. It is close-grained, tough and springy; its color is lemon color. Because it is so straight grained, staves may be sawn from the spars. Blue Ribbon Lemonwood Staves are the best that Nature grows. They have been very carefully selected from mountain grown logs and the air seasoning rigidly regulated. If you want the best in Lemonwood Staves, BLUE RIBBON STAVES will meet your requirements.

### BLUE RIBBON SEMI-FINISHED FLAT LEMONWOOD BOW STAVES WITH HANDLE RISERS

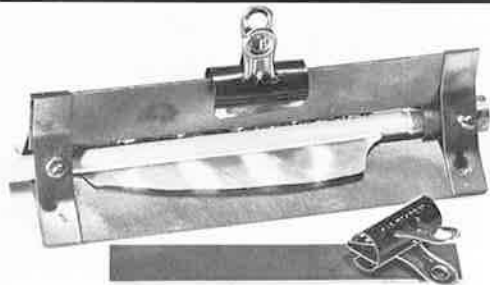

**No. B-1—5'0" Long**

**No. B-2—5'6" Long**

**No. B-3—Longer**

These staves are so nearly finished you can't go wrong. During our part of the process, any stave that develops a flaw is rejected, so that, when you buy a semi-finished stave you are getting a proven piece of wood.

## FEATHERING JIGS

### FEATHERING JIGS

- No. FJ-1.** For 5/16" Shafts.

- **MAILABLE VIA PARCEL POST** — Please specify type of rack when ordering. Arrow shafts sent separately via parcel post.

# TARGETS - FACES - STANDS

## REGULATION HAND COILED RYE STRAW TARGETS WITH SKIRTED OILCLOTH FACES

	No. 48	No. 36	No. 24
Diameter .....	48"	36"	24"
Approx. Weight lbs. ....	65	30	15

Our Regulation Archery Targets are made of long fibered rye straw by hand. They are very tightly bound and re-tightened. With ordinary care they should last several seasons.

The prices listed are for the straw back together with a skirted or slip-on oilcloth face in the standard archery colors of gold, red, blue, black and white.

### HOW TO PUT TARGETS ON STANDS

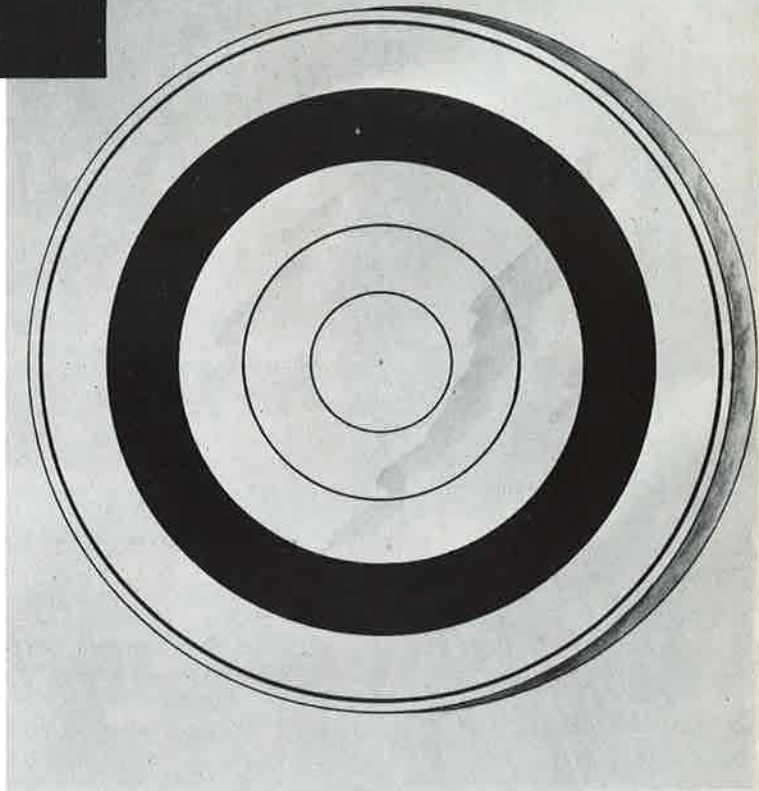

Many years of experience have convinced us that the proper way to put a target on a stand is to hang it from the tripod by means of an adjustable sling. We do not use pegs or extensions because we know that a good puff of wind can blow a target off the stand easily, and the result is a target full of broken arrows. If the target is slung from the stand, the wind cannot blow it off. All of our targets come provided with a rope sling.

### SKIRTED OILCLOTH ARCHERY TARGET FACES

Number .....	24-F	36-F	48-F
Diameter .....	24"	36"	48"

### TARGET STANDS — VARNISHED WOODEN TRIPODS

For Targets .....	24" Dia.	36" Dia.	48" Dia.
Number .....	ST-40	ST-50	ST-60

**PAPER TARGET FACES.** Printed in gold, red, blue, black and white. May be mounted on several thicknesses of corrugated paper board to make a practical small target.

- No. P-16. 16" Diameter.
- No. P-24. 24" Diameter.
- No. P-36. 36" Diameter.
- No. P-48. 48" Diameter.
- No. P-24-SK. 24" Diameter, Paper, with Vinyl SKIRT.
- No. P-36-SK. 36" Diameter, Paper, with Vinyl SKIRT.
- No. P-48-SK. 48" Diameter, Paper, with Vinyl SKIRT.

# TARGETS BOOMERANGS SLINGSHOT

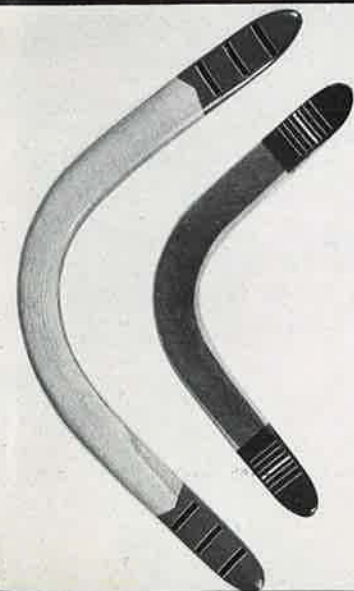

**No. RH-24.** An All-weather Target. Three layers of RUBBERIZED SIZAL. The 24" Face in Standard Archery Colors is made of OILCLOTH with a Vinyl Bind Band. Rain isn't going to hurt this target.

Showing construction of No. RH-24 Target

**No. BX-24.** A low priced Practice and Field Target, printed in the regulation archery colors. Made in box form of 200 lb. test corrugated. Rye straw filler. Size 24" x 4" thick. Minimum Standard Pack — six (6) to a shipping carton.

**No. KD-24.** The same target as BX-24, but in knock-down form. For those who want to do-it-themselves. Target carton is printed in the standard archery colors on white. To be filled with straw, hay, paper, etc. Sealing tape furnished. Standard Pack — twelve (12) to a shipping carton.

**No. 4-B.** Australian type boomerang made of plywood. Fifteen inches (15") across wings, 1 3/4" wide. Nicely finished and decorated in colors. Instructions on back.

**No. 5-B.** Australian type boomerang made of select, steam-bent ash; a solid, one piece boomerang. Twenty inches (20") across wings and 2" wide. Beautifully finished and decorated.

# SHOOT ANIMAL FACES

**No. AT-15. ANIMAL TARGET FACES.** On heavy paper. Black and white drawings of deer, bear, rabbits, fox, ducks, etc., about life size; deer and bear half size. These may be colored and then mounted on cardboard or corrugated box paper. Excellent for a roving or field course. Seventeen (17) figures to the set.

**No. SL-1. THE WOODSMAN.** "Slingshot for ADULTS." What the pistol is to the rifle, the "slingshot" is to the bow and arrow. Our slingshots are designed by an expert; one who has used this simple weapon from boyhood. They are powerful weapons, ideally suited for small game and "varmints". Very close shooting may be done with them. A supply of ball ammunition and an extra rubber is included. Boxed, with instruction pamphlet.
