

## The Dharma Horses and Their Stories

# Luna

Luna came to us after a confiscation from an abuse situation. She was three years old and starved nearly to death. The mare that had been with her did not survive.

Before

Now, at Dharmahorse

We later learned that she had also been rescued as a one year old from a starvation (again, nearly dying) and the man who saved her had later had to place her in a “good home”, in good faith believing she was safe. She is now.

Our task is to save her health and strengthen her deprived body systems while also nourishing her spirit. Her emotions were also abused. But she is healing!
