

Universal Design for Learning

Universal Design for Learning (UDL) & Accessibility in K-12 Education: Designing Learning to Serve All Students

In this archived webinar, the presenters provide an overview of digital accessibility and UDL principles and practices in K-12 education. Discover how to apply the UDL framework to create universal access—to fully address the educational needs and abilities of students with disabilities. Learn how to ensure digital learning resources are accessible to all students and parents, and that learning experiences are designed through a UDL lens. <https://goo.gl/Sn5uj8>

A Seven-Step Process to Creating Standards-based IEPs

This post presents a seven-step process for developing IEPs that are aligned with state academic grade-level content standards. Each step is followed by guiding questions for the ARD committee to consider in making data-based decisions. This process can help school personnel to: (a) consider each student's strengths and needs to develop goals focused on closing the gaps between the student's levels of academic achievement and grade-level standards; and (b) use data to make decisions, including selecting the most appropriate assessment option. The goal is to support ARD committees to develop documents that, when implemented, provide access to the general curriculum and enable students to demonstrate academic achievement linked to grade-level content.

Professional Development

Free Professional Development Solutions for Teachers

Succeed with any tool, any platform, any software. Today's classrooms are full of technology, and as a teacher, you have more tools and options than ever for engaging your students and delivering personalized instruction. To advance student achievement, it's critical to develop deep competencies around digital teaching and learning. Capella's PD courses are powered by Sophia. Explore our unique learning environment:

- Courses can be accessed anywhere, anytime so you can learn when it's convenient for you.
- You can choose a video tutor who matches your style.
- You'll be engaged throughout the program with contextualized questions, hints, and multiple attempts to answer formative assessments.
- You can monitor your progress throughout the course.
- You may choose to earn optional graduate credit through an additional project and small fee.
