

How a Tax Company Can Help

We Care About Drivers Like You Do

Jim O'Donnell— CEO and Founder Trucker Tax Service

Jim spotted this unique opportunity to help drivers while working for a tax service company. “With my previous experience dealing with the truck stop industry”, says Jim O'Donnell, “and my meetings and conversations with truck stop operators, I confirmed the need for a virtual tax service for the drivers. “I want to help drivers become more educated about their business and provide them with valuable tools to help them be successful and profitable.

Revision Date 1/15

Educating drivers is one of the most important thing Trucking Associations can do for the industry. Finding sources of reliable and much needed information can be challenging.

Trucker Tax Service (TTS) can help you get the word out to the drivers. TTS can provide seminars to help them understand their taxes and how to be profitable. Jim O'Donnell, the Founder, is published and is a much sought after speaker for events and engagements. His entertaining style and down home approach to tax planning and preparation are refreshing and of interest to all.

We also can recommend easy to use technology to help manage the drivers finances by giving them an immediate look at their profit per mile on one trip or multiple ones. It tracks income, expense, and provides profit statements, all of which, in real time. All from a smart phone.

Give us a call and let's talk about how we can help.
