With the support of:

Auction of Champions –Fund a Need Benefactors

Heiman Holsteins

Pittsville Fire Co.

National Farm Medicine Center

Life Link III

General Information

Rescue personnel responding to farm or industrial accidents will often be entering environments more dangerous to them than other calls to which they normally respond. The goal of the program is to increase first responders' awareness of farm hazards, how to preplan those responses, and use specialized equipment and techniques. Mark your calendars now – Registration materials will be posted in January 2020. Look for more information in state wide journals and social media.
