World Federation of Trade Unions - Latin America & Caribbean Region

**We, the Federation of Trade Unions in "Nuestra América"(Our Latin America), calls on the people to show our solidarity with Venezuela against the ongoing attacks of imperialism and the oligarchy to answer the call of the United Socialist Party of Venezuela (PSUV)**

**URGENT**

**From the Vice Presidency of the International Affairs of the United Socialist Party of Venezuela (PSUV)**

**The patriotic Venezuelan people are taking to the street to oppose the imperialist onslaught**

The patriotic people of Venezuela has taken to the streets and is currently organizing intense and massive mobilizations to denounce the seditious actions of an extremist sector of the right and the maneuvers by imperialism through the Organization of American States (O.A.S.), which seeks to isolate our homeland.

The U.S. government is imposing a de facto financial siege against our economy, and Mr. Luis Almagro, Secretary General of the O.A.S., is deploying a conspiracy plan to put an end to democracy in Venezuela.

President Nicolas Maduro is promoting a national dialogue among all the political forces, with the cooperation of Pope Francis, and former presidents José Luis Rodríguez Zapatero, Martín Torrijos and Leonel Fernández, and is putting all its efforts into implementing the national production plans and in sustaining and developing the "Social Missions" (social organizations to organize the people to respond to the urgent needs and develop the country) as well as the political stability of the nation.

The Venezuelan right, at the National Assembly, has adopted and is maintaining a position of contempt against the country's Constitution as part of plot to overthrow the government, in addition to incurring [resorting to?] "treason to the homeland", when it demands the application of the Democratic Charter of the O.A.S., and supports Mr. Almagro's violations of all the regulations of that institution for the sole purpose of attacking Venezuela.

**We are sending a warning that a new phase of the ongoing coup is underway, which was unveiled yesterday by the Bolivarian Government. As part of it, the extremist opposition is carrying out dangerous violent actions in different parts of the country, with the clear purpose of promoting a direct military intervention in Venezuela.**

**In this moment of crucial events, we denounce before the international community, the revolutionary and progressive parties, the social movements around the world, the social and cultural organizations, the well-known personalities aware of the situation, the democratic institutions, that the main objective of all these maneuvers by imperialism and the anti-patriotic right is to discredit the country and overthrow the government of President Nicolas Maduro, who has been legitimately and constitutionally elected by the majority of the Venezuelan people.**

**Nothing and no one will stop us in the staunch struggle to defend the Socialist and Bolivarian Revolution against the plans and thirst for power of the national and the international oligarchic elites.**

**We call on our brothers and sisters throughout the world to undertake urgent actions of solidarity with the homeland of Simon Bolivar and Hugo Chavez and to support this struggle to avoid any interference that could harm the precious and non-negotiable sovereignty and independence of Venezuela and the peoples of Our Great Homeland.**

**Long live our independence and socialist homeland!**

**We will live and we will win!**

**The Vice Presidency of International Affairs of the United Socialist Party of Venezuela (PSUV)**

**Caracas, April 6, 2017**
