#### Section 2: Hazard Identification

United States (US)

According to: OSHA 29 CFR 1910.1200 HCS

### Classification of the substance or mixture

OSHA HCS 2012 Reproductive Toxicity 1B Combustible Dust

Hazards Not Otherwise Classified - Health Hazards - Metal fume fever

Label elements

OSHA HCS 2012

**DANGER** 

Hazard statements • May damage fertility or the unborn child.

May form combustible dust concentrations in air.

**Precautionary statements** 

Prevention • Obtain special instructions before use.

Do not handle until all safety precautions have been read and understood. Wear protective gloves/protective clothing/eye protection/face protection.

**Response** • IF exposed or concerned: Get medical advice/attention.

Storage/Disposal • Store locked up.

Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

# Other hazards OSHA HCS 2012

• Under United States Regulations (29 CFR 1910.1200 - Hazard Communication Standard), this product is considered hazardous.

### Section 4: First-Aid Measures

#### **Description of first aid measures**

Inhalation

• IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Give artificial respiration if victim is not breathing. If signs/symptoms continue, get medical attention.

Skin

 In case of contact with substance, immediately flush skin with running water for at least 20 minutes. If irritation develops and persists, get medical attention.

Eye

• In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. If eye irritation persists: Get medical advice/attention.

Ingestion

• Do NOT induce vomiting. Obtain medical attention immediately if ingested.

# Most important symptoms and effects, both acute and delayed

• Refer to Section 11 - Toxicological Information.

# Indication of any immediate medical attention and special treatment needed

Notes to Physician

 All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

### **Section 5: Fire-Fighting Measures**

### **Extinguishing media**

Suitable Extinguishing Media • LARGE FIRE: Water spray, fog or regular foam.

SMALL FIRES: Dry chemical, CO2, water spray or regular foam.

**Unsuitable Extinguishing** 

Media

No data available

### Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards

Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the
presence of an ignition source is a potential dust explosion hazard.

Hazardous Combustion Products

· Metal Oxide.

# Advice for firefighters

Wear positive pressure self-contained breathing apparatus (SCBA).
 Structural firefighters' protective clothing will only provide limited protection.

#### Section 6 - Accidental Release Measures

### Personal precautions, protective equipment and emergency procedures

**Personal Precautions** 

 Ventilate enclosed areas. Do not walk through spilled material. Use appropriate Personal Protective Equipment (PPE)

**Emergency Procedures** 

• ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Keep unauthorized personnel away.

### **Environmental precautions**

Avoid run off to waterways and sewers.

# Methods and material for containment and cleaning up

Containment/Clean-up Measures

· Avoid generating dust.

Use clean nonsparking tools to collect material.

Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).

# Section 7 - Handling and Storage

# Precautions for safe handling

Handling

Use only with adequate ventilation. Keep away from heat, sparks, and flame. Minimize
dust generation and accumulation. Routine housekeeping should be instituted to
ensure that dusts do not accumulate on surfaces. Dry powders can build static
electricity charges when subjected to the friction of transfer and mixing operations.
Provide adequate precautions, such as electrical grounding and bonding, or inert
atmospheres. Avoid breathing dust. Avoid contact with skin, eyes or clothing. Wash
thoroughly with soap and water after handling and before eating, drinking, or using
tobacco.

# Conditions for safe storage, including any incompatibilities

Storage

• Keep container closed. Store in a cool, dry, well-ventilated place. Keep dry. Melting wet zinc may contribute to explosion hazard.

#### **Exposure controls**

# Engineering Measures/Controls

Ensure that dust handling systems (such as exhaust ducts, dust collectors, vessels
and processing equipment) are designed in a manner to prevent the escape of dust
into the work area (i.e., there is not leakage from the equipment). It is recommended
that dust control equipment such as local exhaust ventilation and material transport
systems involved in handling of this product contain explosion relief vents or an
explosion supression system or an oxygen-deficient environment. Use only
appropriately classified electrical equipment.

#### **Personal Protective Equipment**

Respiratory

 For limited exposure use an N95 dust mask. For prolonged exposure use an airpurifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134. Use a NIOSH/MSHA approved respirator if exposure limits are exceeded or symptoms are experienced.

Eye/Face

Skin/Body

Wear safety goggles.

Wear appropriate gloves. Wear long sleeves and/or protective coveralls.

Environmental Exposure Controls

Controls should be engineered to prevent release to the environment, including
procedures to prevent spills, atmospheric release and release to waterways. Follow
best practice for site management and disposal of waste.

# **Section 10: Stability and Reactivity**

# Reactivity

· No dangerous reaction known under conditions of normal use.

# **Chemical stability**

· Stable under normal temperatures and pressures.

# Possibility of hazardous reactions

· Hazardous polymerization will not occur.

### **Conditions to avoid**

· Avoid generating dust. Keep away from heat, sparks and flame.

### Incompatible materials

· Acids and alkalis react to evolve hydrogen gas.

### Hazardous decomposition products

· Oxides/fumes from metals.

# Potential Health Effects Inhalation

Acute (Immediate)

 Exposure to dust may cause irritation. Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance dust may affect the lungs but reactions are typically reversible.

**Chronic (Delayed)** 

· No data available

Skin

Acute (Immediate)

• Exposure to dust may cause mechanical irritation.

**Chronic (Delayed)** 

· No data available

Eye

Acute (Immediate)

 Exposure to dust may cause mechanical irritation. Excessive concentrations of nuisance dust in the workplace may reduce visibility and may cause unpleasant deposits in eyes.

**Chronic (Delayed)**

Carcinogenic Effects

 This material contains a component that may cause cancer, however based on regulatory criteria this material is not classified as a carcinogen.

Carcinogenic Effects				
	CAS	OSHA	IARC	NTP
Cadmium (pyrophoric)	7440-43-9	Specifically Regulated Carcinogen	Group 1-Carcinogenic	Known Human Carcinogen
Lead, powder	7439-92-1	Not Listed	IC-roun ZA-Pronanie Carcinogen	Reasonably Anticipated to be Human Carcinogen

#### Reproductive Effects

Repeated and prolonged exposure may cause reproductive effects.

#### Other information

 Heating above the melting point releases metallic oxides which may cause metal fume fever which is an influenza like illness. Symptoms include headache, metallic taste in the mouth, cough, thirst, throat irritation, shortness of breath, fever, sweating and pain in the limbs. This illness is not permanent and recovery usually occurs within 24-48 hours after onset.
