	B3300	N/A	100/cs

Sterile Cap

Breather cap for male Luer slips, locks and spin Luers.

	ITEM #	HCPCS	SOLD BY
	CAP1	N/A	100/cs

I.V. SECUREMENT DRESSINGS

ZEFON (ZEF)

Grip-Lok®

Catheter stabilization device that is strong enough to lock catheters securely in place, yet versatile enough for almost any securement situation. The adhesive on Grip-Lok® will adhere and secure PICC hubs made from silicone, PVC and other plastic compounds. Latex-free and packaged in individual sterile units, allowing use close to a wound site or right in the sterile field.

	ITEM #	HCPCS	SOLD BY
Medium, wide adhesive	3300MWA	N/A	100/bx
Universal	3300M	N/A	100/bx

BARD MEDICAL (VE)

StatLock® PICC Plus

Sutureless securement can secure PICC lines in place, eliminating the need for suture or tape, and significantly reducing the incidence of catheter-related bloodstream infections, dislodgment and other complications. Helps eliminate the risk of accidental needlesticks.

	ITEM #	HCPCS	SOLD BY
Crescent sliding post	VPPCSP	N/A	ea
Crescent fixed post	VPPDFP	N/A	ea

3M HEALTH CARE (88)

PICC/CVC Securement Device + Tegaderm I.V. Advanced Securement Dressing

Sutureless securement device silicone adhesive holds securely yet allows for gentle, alcohol-free removal. Application of the device is aided through absence of mechanical doors or wings. The device utilizes a water-resistant, soft-cloth material that is perforated for additional breathability. The Tegaderm I.V. Advanced securement dressing transparent film provides continuous site observation as well as a waterproof, sterile barrier to external contaminants. Adhesive-free tabs minimize potential for the product to stick to gloves or to itself, and allow for one-handed delivery of the securement tape strip. A reinforced stabilization border maximizes dressing securement, breathability and wear time. A pre-printed tape strip helps users document dressing changes. The system accommodates the majority of PICC and short-term CVC catheters up to and including 12 fr. Sterile, latex-free and can be worn up to seven days.

	ITEM #	HCPCS	SOLD BY

CLEANING ROOM SUPPLIES

USP 797 was developed to reduce or prevent harm to patients that could result from microbial contamination and excessive bacterial endotoxins, large content error and incorrect ingredients from compounded sterile products. USP 797-compliant pharmacies will be required to wipe down every bottle, syringe and vial that enters the clean room; clean and sanitize all buffer room carts, equipment, hoods, walls, surfaces and floors; document all compounding activities; sanitize gloves; conduct sterility and bacterial endotoxin testing for high risk compounding. Label in compliance with storage requirements; clean and sanitize the cleanroom, anteroom and shelving.

AMD RITMED INC. (AMD)

Safe-Mask Premier Earloop Mask

Ideal for sensitive skin. Latex- and fiberglass-free. Highest level of protection with fluid-repellent inner and outer layers.

	ITEM #	HCPCS	SOLD BY
Yellow	2117	N/A	50/bx

CONNECTICUT CLEAN ROOM (CTC)

PolyTack Entrance Mats

Made from an incinerable polyethylene film with special anti-microbial agent. Provides long-lasting protection against bacterial growth. Removes foot-borne particulate before entering the cleanroom. Seamless one-piece construction. Numbered tabs provide easy identification and sheet separation. Easy mobility for carts and wheeled machinery. 30 sheets/mat.

SMITH & NEPHEW (54)

IV3000® Transparent Adhesive Film Dressings

IV3000® was the first transparent dressing designed specifically for I.V. site care. Patented REACTIC® film is three to eight times more permeable to water vapor than standard film dressings. Under most situations, the unique film allows the I.V. site to remain dry. The risk of catheter-related infections may be reduced, unscheduled dressing changes are minimized and patient comfort is enhanced. Available in one-hand and tape handle delivery.
