

SCIENCE SUPERVISORS ASSOCIATION
November Meeting

Main Presentation: Reengaging the Post-Pandemic Learner

Description: The past few years have been challenging for teachers, but let's consider our learners. In March of 2020, we asked them to mature and become fully independent, ownership-taking adults in an instant. As many of us transition back to our new normal, this session will focus on the developmental (not academic) gaps that the past few years of learning are likely to have caused and provide multiple strategies to address those inequities.

PRESENTED BY RAMY MAHMOUD

Ramy Mahmoud is a lecturer at the University of Texas at Dallas teaching Educational Technology and Curriculum and Instruction in Science, and a National Science Specialist for Savvas Learning Company. As a former high school biology teacher of 16 years, Ramy is passionate about engaging all learners in today's classrooms.

Additional Topics: Update from NYCDOE Science Team, SSA business items
