<b>Health Priorities</b>	4
<b>1. Adverse Childhood Experiences</b>	5
<b>2. Mental Health</b>	6
<b>3. Affordable Housing</b>	7
<b>4. Prevent/Reduce Obesity</b>	8

## BACKGROUND

### WHAT IS KITSAP COMMUNITY HEALTH PRIORITIES

Kitsap Community Health Priorities (KCHP) is a collaborative, community-driven process to improve health and well-being in Kitsap County. The process involves broad participation of diverse sectors of the community in setting community health and well-being priorities, taking action on those priorities, and monitoring progress. KCHP began in December 2010 and is intended to be a cyclical, dynamic, and long-term process.

### GOALS

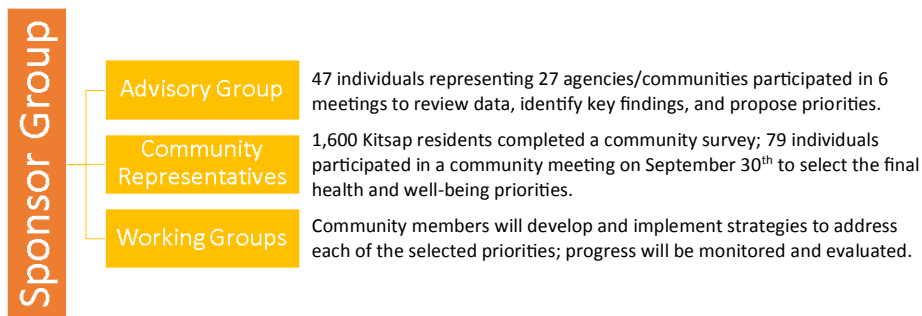

- ◆ Improve health and well-being status and opportunities for all.
- ◆ Improve collaboration and planning among community agencies.
- ◆ Increase public awareness of and engagement around improving health and well-being.
- ◆ Increase access to and use of data.

## TIMELINE

## PARTICIPANTS

KCHP is led by a Sponsor Group comprised of three founding members: Kitsap Public Health District, Harrison Medical Center, and United Way. Two additional members joined in 2014: Kitsap Community Foundation and Kitsap County Human Services Department. The Sponsor Group defines and monitors the KCHP process and provides financial support. Participation in KCHP is open to any county residents and individuals working within the county. The distribution list includes over 250 individuals, many of whom serve as primary contact for community organizations/agencies. Levels for participation for the 2014 KCHP process were as follows:

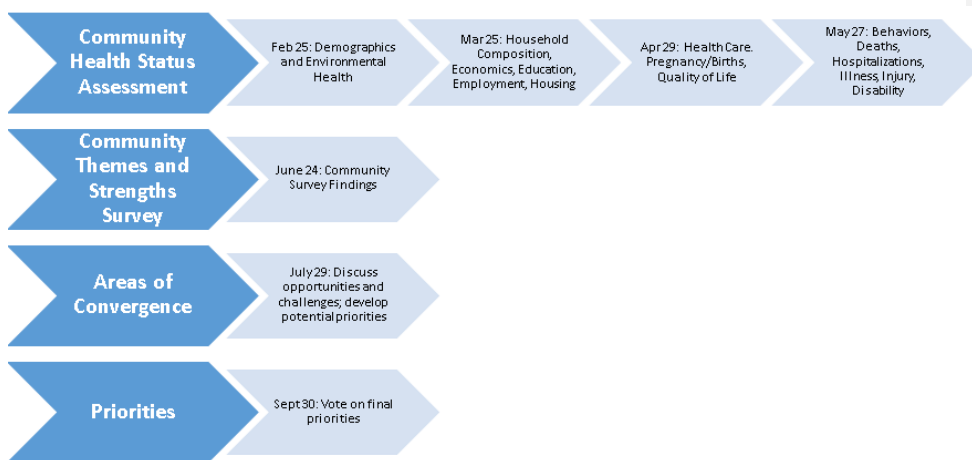

## DATA REVIEW AND PRIORITIZATION PROCESS

The 2014 KCHP data review process was based on a modification of the National Association of County and City Health Officials (NACCHO) Mobilizing for Action through Planning and Partnerships (MAPP)

7/1/2015  
4/1/2016  
8/9/2017  
In progress  
2018

model.<sup>1</sup> The KCHP process included review of findings from a Community Health Status Assessment and Community Themes and Strengths Survey and input on forces of change and the community capacity in the public health, health care, and social services systems. Kitsap Public Health District Epidemiologists presented assessment findings to the KCHP Advisory Group in a large group format which was followed by discussions in small groups to identify key findings, forces of change, system capacity, and missing data. Key findings were summarized into “Areas of Convergence” from which Advisory Group members identified potential priorities. Final priorities were selected by Community Representatives from the list of potential priorities.

**COMMUNITY HEALTH STATUS ASSESSMENT**

The Community Health Status Assessment (CHSA) included over 260 indicators of health and well-being. Indicators were derived from standard quantitative public health data sources. Rates or percentages were presented for Kitsap County with a trend over time and comparison to Washington State. When possible, Kitsap rates or percentages were presented for sub-groups: sub-county areas, age groups, gender, race/ethnicity, income level, education level, among others. The CHSA was compiled by Epidemiologists at the Kitsap Public Health District and presented in topical modules to the Advisory Group at 4 meetings.

 4/1/2016  
 8/9/2017  
 In progress  
 2018

### COMMUNITY THEMES AND STRENGTHS SURVEY

The Community Themes and Strengths Survey (Survey) included 31 questions and a participant demographics section. The survey was a convenience sample obtained through wide dissemination of both electronic and paper surveys. In total, 1,897 surveys were completed of which, 1,600 were used for analysis based on participant reported Kitsap County zip code. Questions were designed to collect information beyond the CHSA indicators and include qualitative input. Epidemiologists at the Kitsap Public Health District administered and analyzed the survey and presented findings to the Advisory Group.

### INPUT ON FORCES OF CHANGE AND COMMUNITY CAPACITY

The Advisory Group identified and provided input on key issues including differences by sub-groups, missing data or other information that would be important to know, community capacity to address the issue, opportunities/factors/events/barriers in the community that may affect the issue.

### AREAS OF CONVERGENCE AND POTENTIAL PRIORITIES

Fourteen “Areas of Convergence” resulted from the overlap in key findings identified by Advisory Group small groups at each data review meeting. Each Area of Convergence included relevant data from the CHSA and Survey. To establish the list of potential priorities, the Advisory Group reviewed the Areas of Convergence and then each individual wrote down their top 10 priority issues on sticky notes which they placed on a topic-specific poster. On each poster and between posters, sticky-notes with similar issues were consolidated. Advisory Group members were given 5 sticky dots to vote on the consolidated issues – they could place all dots on one issue or divide them up. Using this method, 6 potential priorities were identified.

### FINAL PRIORITIES

For each of the six potential priorities, data, disparities and impact were presented to Community Representatives by the Kitsap Public Health District Epidemiologist. Following an Advisory Group led small group discussion of the process and findings, Community Representatives were given 3 sticky dots to vote on the final priorities – they could place all dots on one issue or divide them up. Using this method, 4 final community health and well-being priorities were selected.

AREAS OF CONVERGENCE (14)	POTENTIAL PRIORITIES (6)	FINAL PRIORITIES (4)
Adverse Childhood Experiences	Adverse Childhood Experiences	<b>Adverse Childhood Experiences (ACEs):</b> Prevent ACEs and reduce the negative impact of ACEs
Aging Population		
Bremerton (as an outlier)		
Education		
Food Access/Insecurity*		
Housing/Homelessness	Affordable Housing	<b>Affordable Housing:</b> Increase affordable housing and make homelessness a one-time brief event
Living Wage Jobs, Workforce Education/Training	Living Wage Jobs	
Mental Health/Emotional Well-Being/Stress	Mental Health	<b>Mental Health:</b> Ensure mental health care is accessible, available, and timely for all
Overweight/Obesity/Chronic Disease	Obesity	<b>Prevent/Reduce Obesity:</b> Make it easy for all residents to be physically active and ensure all residents have healthier food options
Parenting		
Physical Activity/Active Living*		
Prenatal Care		
Substance Use	Youth substance use/abuse	
Transportation		

\*Integrated into obesity potential and final priority

## PRIORITIES

### ADDRESSING HEALTH AND WELL-BEING PRIORITIES

Working groups comprised of community representatives will work on strategies to address the priorities. Progress will be monitored and evaluated from objectives that are specific, measurable, attainable, relevant, and time-bound (SMART). Annual work plans for the four priorities are detailed on the pages that follow.
