Padlocks with a different operating key for each lock, and with a single key that opens all locks for supervisory access. Contact us for additional information.

#### Removable Cylinder:

Permits replacing the key and cylinder without requiring a new padlock.

## MAXIMUM SECURITY

Solid steel padlocks offer the highest protection of hardened steel. Our padlocks come in a wide range of widths, with shackle lengths and diameters to fit any application --great for outdoor protection of commercial buildings, industrial plants and perimeter, remote and unattended properties and high risk areas.

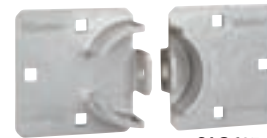

### MASTER LOCK HIDDEN SHACKLE PADLOCKS & HIGH SECURITY HASPS (REKEYABLE)

The hockey puck-style lock design completely surrounds the 3/8" dia. shackle for high-security pry and cut resistance. Our industrial-strength padlocks are keyable and have replaceable cylinders and shackles.

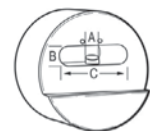

- These padlocks offer maximum protection against drilling, sawing, prying, crowbar, dent pullers and hammers
- 6-pin tumbler cylinders provide superior pick resistance, with tens of thousands of key changes available
- Secure vans, trucks, gates, garages, storage buildings and vending machines
- Locks come with two keys. For keyed alike options and master keying, please call us today
- Combined with high-security hasps (SAO687); designed to completely surround the lock; it make the locks virtually impervious to physical attacks

## COMBINATION PADLOCKS

Master Lock has reinvented the combination padlock with our new Blockguard™ technology. This patent-pending "Anti-Shim" technology deters shimming a padlock - shimming is a method of violating a lock by inserting a specially designed tool into its latch mechanism. Blockguard™ has unique flat latch technology that blocks typical shimming tools from opening the locks and thus deterring break-ins.

- These combination padlocks feature the new Blockguard™ anti-shim technology
- Double-reinforced stainless steel case with cold-rolled steel construction shields locking mechanism from physical attack
- Hardened steel shackles resists cutting and prying
- 40 number, 3-number dialing provides thousands of possible combinations available
- Dial automatically locks under shackle tension to prevent "feeling out" the combination and automatically scrambles when closed to prevent accidental opening
- Fits lockers with a padlock eye of at least 5/16" (8 mm) in diameter

## HOW TO ORDER CUSTOM TAGS

### STEP 1: MESSAGE, DESIGN

Develop your tag – provide message, layout, design and color.

### STEP 2: SELECT MATERIAL AND SIZE

Consider tag placement, intended application, and environment.

### STEP 3: FINISHING OPTIONS

Determine how you will install the tag. Call us for available options.

### STEP 4: DECIDE ON QUANTITY

No need to order huge quantities – You can order as few as 25.

Call, e-mail, or fax us to place your order!

### SIZES:

4 1/4" x 2 1/8"

5 3/4" x 3 1/4"

8 1/2" x 3 7/8"

Other sizes upon request

### PF-CARDSTOCK TAGS

Tear-resistant and waterproof tags last longer than standard cardstock tags.

Tags are pulp-free – no wood pulp or paper content – unlike regular cardstock. They are pliable, yet will not rip or breakdown in moisture.

Tags do not tear readily when tugged on. Ideal for indoor use and short term outdoor exposure. The scuff-resistant, matte surface is easy to write on.

- 10-mil polyolefin-based material
- Thin and flexible
- Top has 3/8" plain hole

### RP-PLASTIC TAGS & HS-LAMINATE TAGS

Durable tag withstands pulls and tears in dirt and grease environments.

Plastic tags are water-resistant – to withstand weather conditions.

The rigid plastic is flexible, yet will not readily break down over a wide temperature range. Good for indoors and outdoors use. Writable surface is abrasion resistant.

- 15-mil rigid plastic material
- Flexible, yet durable – withstands stretching and ripping
- Top has 3/8" hole reinforced with metal grommet to prevent pull off

### HS-LAMINATE TAGS

Tags are designed to withstand tough and abusive conditions.

HS-Laminate is a composite of all poly materials hard sealed on both sides with no edge seams. Matte surface is scratch resistant, yet easy to write on. Waterproof tags are ideal for extreme weather conditions.

- Tear-proof, weather-proof, chemical-resistant material withstands dirt and grease environments
- Thick laminate stands up to abuse and rough handling
- 3/8" top hole is reinforced with a pull-proof, metal grommet

## MATERIALS

Our comprehensive selection of custom sign materials are designed to meet virtually every application and environmental demand.

Customize the size and materials to fit your need, and add your company logo for added personalization!

### ADHESIVE VINYL:

Self stick sign is for indoor or sheltered areas. Adhere to most flat, clean, dry surfaces. Ideal for basic identification purposes or short term outdoor applications.

- Flexible 4-mil thick vinyl with acrylic adhesive
- Non-glare printed surface
- Impact resistant
- Moisture resistant

### PLASTIC:

Semi-flexible thick plastic sign for standard, medium-duty use. Use long-term indoor and sheltered outdoor locations – or temporary outdoor exposure, such as construction sites.

- 0.055" thick polyethylene plastic
- Non glare finish
- 3/16" mounting holes with rounded corners

### ALUMINUM:

Provides the strength of metal, yet does not rust. Printed image is UV protected by 2-mil, high-gloss polyester overlamine to resist fading. Ideal choice for indoor and outdoor use where a metal sign is required.

- 0.040" thick aluminum
- Withstands washdowns, harsh environments and is abrasion, chemical, and impact resistant.
- Durability warranty to 5 years
- 3/16" mounting holes with rounded corners

### ACCU-SHIELD™:

Highest performance sign with superior construction for extreme conditions - outstanding UV protection, high impact strength, tough under harsh conditions such as chemicals, corrosion, and abrasions, and nearly indestructible to vandalism. Reverse printed image on the underside of the thick face and further protected underneath. Rugged appearance with a thick-edge design and pebble-textured backside.

- 0.152" thick specially-formulated polycarbonate and poly bonded back
- Durability warranty to 15 years
- 1/4" mounting holes with rounded corners

### ADHESIVE DURA-VINYL™:

Dual-layered vinyl that outperforms standard vinyl. Printed image is protected by a high-gloss 2-mil UV resistant polyester over laminate to prevent fading for outdoor use.

- Flexible 6-mil thick poly-composite
- Durability warranty to 5 years
- Abrasion, humidity, chemical, and solvent resistant
- Adheres to smooth, curved and irregular surfaces

### DURA-PLASTIC™:

Polycarbonate plastic offers high impact resistance and durability for outdoor applications and harsh environments. Printed image is protected by 2-mil, high-gloss polyester overlamine with UV resistance to fading.

- 0.060" thick polycarbonate
- Resistant to abrasion, humidity, and chemicals
- Durability warranty to 7 years
- 3/16" mounting holes with rounded corners

### DURA-ALUMALITE™:

High strength, yet lightweight composite aluminum sign. 40% lighter than same thick solid aluminum, yet the same durability, stiffness and rigidity. UV protected by 2-mil, high-gloss polyester overlamine to resist fading and abrasions.

- 0.118" thick - aluminum sheets bonded to both sides of thermoplastic core
- Extremely durable for tough indoor and outdoor conditions from high impacts to vandalism
- Durability warranty to 10 years
- 1/4" mounting holes with rounded corners

# SAFETY SIGNS & IDENTIFICATION

## ACCIDENT PREVENTION SIGNS

The Occupational Safety and Health Administration (OSHA 29 CFR§ 1910.145) provides specifications, design, application and use of header signs. These signs are intended to indicate potential, type and degree of the hazard that may lead to accidental injury or property damage. They define specific hazards by conveying a clear and rapidly understood message.

### ACCIDENT PREVENTION HEADERS

**DANGER** — Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury. This signal word is to be limited to the most extreme situations. The signal word Danger should not be used for property damage hazards unless personal injury risk appropriate to the level is also involved.

**WARNING** — Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury. This signal word should not be used for property damage hazards unless personal injury risk appropriate to this level is also involved.

**CAUTION** — Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury. It may also be used to alert against unsafe practices that may cause property damage.

**NOTICE** — Indicates a statement of company policy directly or indirectly related to the safety of personnel or protection of property. This signal word should not be associated directly with a hazard or hazardous situation.

**SAFETY FIRST, THINK, EMERGENCY** — Indicates general instructions relative to safe work practices, reminds of proper safety procedures and indicates the location of safety equipment.

### ACCIDENT PREVENTION SIGN CONTENTS

#### Header

A specific or "signal" word (or words) to designate a degree or level of safety alerting, always located in the uppermost portion of the sign. Intended to capture and direct attention to the potential hazardous situation.

#### Legend

The specific short message conveys the need to pay attention to a potential hazard or hazards, or take a necessary action to avoid such hazard(s).

Many signs consist of just header and legend — Signs can also contain a symbol...

#### Symbol

Pictorials are graphic representations to clearly convey a specific alerting message compatible with and supplemental to the legend message. Universal in design, many are standardized to be easily understood.

### MATERIALS

#### ADHESIVE VINYL (VS)

For light-duty applications. The ideal choice for indoor and sheltered outdoor marking needs. Mounts to all curved areas such as pipes, poles and secondary containers.

- 4-mil thick surface printed matte surface
- Permanent acrylic adhesive
- Moisture-resistant
- Service temperature range: -20°F to 140°F
- Durability: 2 years outdoors
- Square corners and scored backing for quick peel-off and application

#### PLASTIC (VP)

Semi-flexible, economical and appropriate for medium-duty use - ideal for indoor and sheltered outdoor environments.

- Ideal for flat surfaces with enough flex to mount on slightly curved areas
- 0.055" thick with good impact resistance and surface image with non-glare finish
- Contains UV inhibitors
- Service temperature range: -90°F to 168°F
- Durability: 2 years outdoors
- Rounded corners and 3/16" mounting holes

#### ALUMINUM (VA)

Get the strength of metal, without the rust. Superior abrasion and chemical resistance for indoor and outdoor environments.

- Printed image on rigid 0.040" aluminum backing
- Protected by 2-mil high-gloss UV polyester over-laminate film
- Service temperature range: -20°F to 140°F
- Withstands splashes and washdowns
- Endures outdoor environmental conditions
- Durability: 5 years outdoors
- Rounded corners and 3/16" mounting holes

# SAFETY SIGNS & IDENTIFICATION

## CANADIAN STANDARDS ASSOCIATION IDENTIFICATION SAFETY SIGNS

Communicate regulatory, warning, or informational messages in a symbol to employees and visitors in the workplace. Use Canadian Standards Association (CSA) Z321 symbols designed to be easily understood for specific safety and/or health hazards. Symbols are divided into three classifications with each containing two sub-groups - for a combination of six colours and three shapes.

### 1. REGULATORY

**1.1 PROHIBITION**  
Forbids an Action  
(red and black  
on white)

**1.2 MANDATORY**  
Requires/Obligatory  
Action  
(white on black)

### 2. WARNING

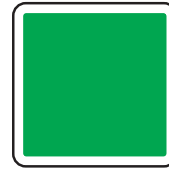

**2.1 CAUTION**  
Potential Hazard  
(black on yellow)

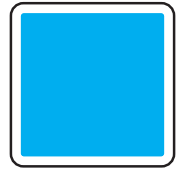

**2.2 DANGER**  
Definite Hazard  
(white on red)

### 3. INFORMATION

**3.1 EMERGENCY**  
First Aid, Health, Fire  
Protection, Fire Fighting, and  
Emergency Equipment  
(white on green)

**3.2 GENERAL  
INFORMATION**  
Permission or Public  
Information  
(white on blue)

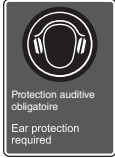

## CSA SIGNS

Safety Signs meet the Canadian Standards Association (CSA) Z321 standard for Signs and Symbols for the Workplace. Signs contain symbol with text to provide flexibility in conveying the sign message. The safety symbol is contained in a geometric shape with accompanying colours. These are uniform designs for an easily understood sign. The particular shape and colour combination distinguish the type of safety classification category. These attention-getting signs communicate the text safety information message. Signs measure 355 mm x 254 mm (14" x 10").

Available in English Only, Bilingual French-English, and French Only formats.

## CSA PICTOGRAM SIGNS

Pictogram signs are easily recognizable and understood symbols for communicating safety without words. Using the CSA Z321 colour symbol scheme, the signs are specific in shapes and colours to distinguish the type of message. Pictograms are ideal for conveying a message across any language barrier.

## DESIGN YOUR OWN CUSTOM CSA PICTOGRAM SIGN!

FOR OTHER CSA PICTOGRAM SIGNS, PLEASE CONTACT US AND SPECIFY SYMBOL, SHAPE, SIZE AND LET US DO THE WORK.

## ISO SAFETY LABELS

- Communicate safety using internationally recognized labels as set forth by the International Organization for Standardization (ISO)
- Shapes and colours distinguish the type of safety
- Symbols communicate the specific safety message
- Adhere to documents, machinery, packaging and other areas requiring safety symbol messages
- Compliant to ISO 7010:2011 standard

High-performance, self-adhesive vinyl with overlaminated graphics for long wear and durability. Available in two sizes — specify when ordering.

ISO labels are available in three categories distinguishable by their shape and colour format:

**Mandatory** - take action to avoid the hazard.

**Prohibition** - forbid an action to avoid the hazard.

**Warning** - identify the hazard to avoid.

# SAFETY SIGNS & IDENTIFICATION

Post traffic signs to safely direct and regulate the flow of vehicles and pedestrians in and around parking areas, dock areas, and roadways. Keep driveways, throughways, and curbs free of vehicles and direct to designated parking locations with proper signs.

- Heavy-duty, 0.080" aluminum signs will not rust
- Reflective sign face provides added visibility in low-light conditions
- UV-resistant inks prevent fading during long-term outdoor use
- Supplied with top and bottom centre holes for post- or fence-mounting

## MATERIAL

**High Intensity (HP)** – High intensity prismatic sheeting is over three times brighter than standard engineer-grade sheeting.

**Aluminum (AL)**: Lightweight 0.032" aluminum with enamel non-reflective finish

## PIPE MARKERS – WHAT YOU NEED TO KNOW

The proper marking of contents and flow direction in pipes and piping systems is a vital component of a thorough safety and identification program.

A13.1 – 2007 scheme for the identification of piping systems... A uniform system for the identification of piping contents has been established to warn personnel when the piping contents are inherently hazardous... This standard has been prepared to specify the identification of the contents of piping systems on the basis of legends, it also suggests the use of colour as a supplementary means of identifying the type of hazard of the material contained in the system.

Pipe markers are designed to meet or exceed ASME (ANSI) A13.1-2007 recommendations for size, colour and visibility.

Pipe markers are quick visual cues, providing immediate identification information of pipe contents for emergency responders and workers to safely carry out their responsibilities when working in and around piping systems.

The legend or wording on the pipe marker is to be the primary means of naming the contents of the pipe. The name is to be brief, yet complete or in understood abbreviated format. Arrows are to accompany the legend to indicate the directional flow of the contents. Additional information may be necessary to identify the content details such as pressure and temperature.

### Installation recommendations:

- Above or below centre visual line of pipe
- Frequent intervals on straight pipe runs (visible from any point along the length)
- Close to valves
- Near branches and T's in piping
- Any change in direction of piping
- Near points before and after pipe going through walls, ceilings, and floors

29 CFR 1910.253 Oxygen-fuel gas welding and cutting (d)(4)(ii) Aboveground piping systems shall be marked in accordance with the American National Standard Scheme for the identification of piping systems, ANSI A13.1

1910.261 Pulp, paper, and paperboard mills (a)(3)

General incorporation of standards. Establishments subject to this section shall comply with the following standards:

1910.261(a)(3)(ii) Scheme for the identification of piping systems, A13.1

1910.262 Textiles

1910.262(c)(7) Identification of piping systems. Identification of piping systems shall conform to American National Standard A13.1

## LETTER HEIGHT & PIPE MARKER SIZES

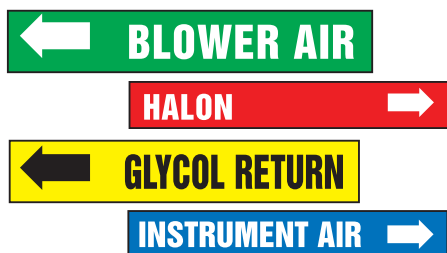

The outside diameter of the pipe determines the letter height and background field length of the marker.

Outside Diameter of Pipe"	Length of Pipe Marker Colour Field"	Size of Letters"
3/4 to 1 1/4	8	1/2
1 1/2 to 2	8	3/4
2 1/2 to 6	12	1 1/4
8 to 10	24	2 1/2
Over 10*	32	3 1/2

\*Available as custom pipe markers

## LEGEND

The legend on the marker gives the name of the contents in full or abbreviated form. Arrows should be used to indicate direction of flow.

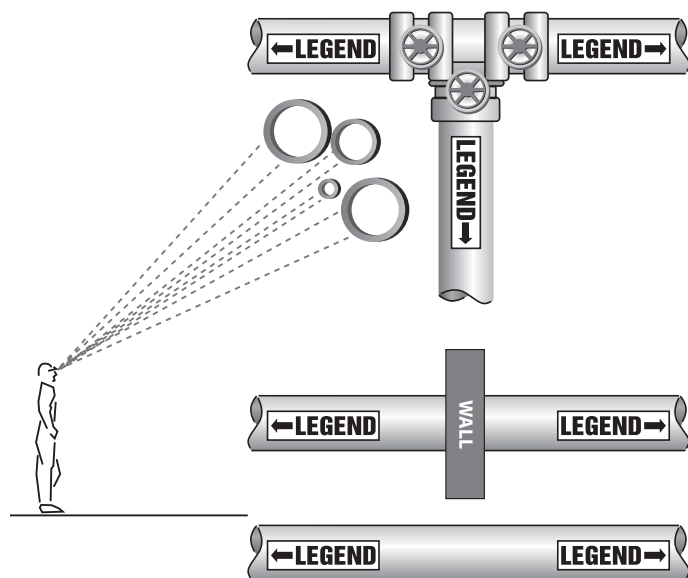

## COLOURS

Colours identify the characteristic hazards of the contents of the piping system.

Contents of the Pipe	Colour
Fire Quenching Fluids	WHITE ON RED
Toxic And Corrosive Fluids	BLACK ON ORANGE
Flammable Fluids	BLACK ON YELLOW
Combustible Fluids	WHITE ON BROWN
Potable, Cooling, Boiler Feed, And Other Water	WHITE ON GREEN
Compressed Air	WHITE ON BLUE

## VISIBILITY & LOCATION

Where pipe lines are located high or low, place the lettering below or above the horizontal centerline of the pipe. Affix markers onto piping close to valves or flanges and adjacent to changes in direction, branches, and where pipes pass through walls or floors; and at 25' to 50' intervals on long straight pipe runs.

Pipes installed at a distance may make pipe markers difficult to read (refer to the distance reading chart). We can provide larger, legible pipe markers to meet your requirements. Please contact us for solutions.

## CGSP PIPE MARKERS

MARK PIPES TO IDENTIFY AND LABEL HAZARDOUS AND NON-HAZARDOUS SUBSTANCES CONTAINED IN PIPING SYSTEMS BY USING COLOUR, LEGEND, AND PICTOGRAM.

Create pipe markers based on the Canadian General Standard Board CAN/CGSB-24.3-92

The combination of text with Workplace Hazard Materials Information System (WHMIS) symbols provides an impact and quick understanding of the pipe contents.

Comply with the guidelines in marking pipes by providing workers and emergency personnel the ability to easily identify contents of pipes in the event the contents could release into the environment.

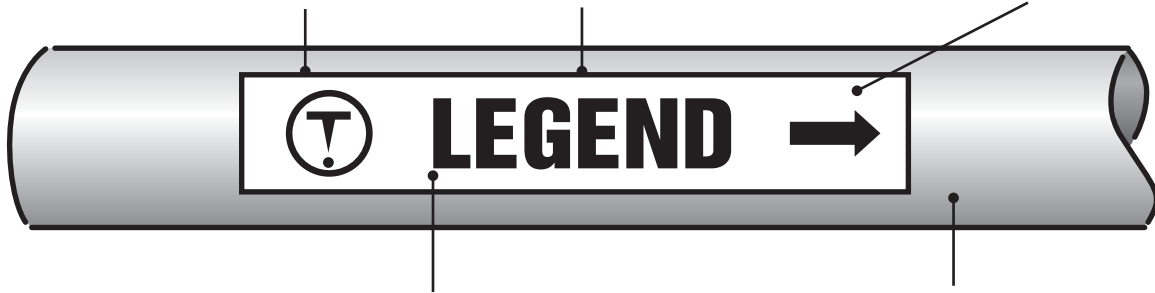

When WHMIS controlled substances are contained in piping systems, the appropriate WHMIS symbol(s) are to be included on the pipe marker with the legend.

### WHMIS SYMBOLS:

### HOW TO ORDER:

1. SPECIFY WHMIS HAZARD SYMBOL(S) – IF NECESSARY.
2. SPECIFY LEGEND OF PIPE CONTENT.
3. SPECIFY DIRECTIONAL ARROW – IF NECESSARY.

4. POINT OUT COLOUR COMBINATION.

Contents of the Pipe	Colour
Hazardous	BLACK ON YELLOW
Low Hazard Material	WHITE ON GREEN
Low Hazard Gas	WHITE ON BLUE
Fire Protection	WHITE ON RED

5. CHOOSE SIZE BASED ON PIPE SIZE.

Outside Diameter of Pipe Marker	Length Colour Field	Size of Letters
19 to 32 mm (3/4" to 1 1/4")	200 mm (8 inches)	13 mm (1/2")
38 to 51 mm (1 1/2" to 2")	200 mm (8 inches)	19 mm (3/4")
64 to 150 mm (2 1/4" to 6")	300 mm (12 inches)	32 mm (1 1/4")
200 to 250 mm (8" to 10")	600 mm (24 inches)	64 mm (2 1/2")
Over 250 mm (Over 10")	800 mm (32 inches)	89 mm (3 1/2")

6. SELECT PIPE MARKER TYPE BY PART NUMBER ALONG WITH QUANTITY.

#### SELF-STICK VINYL MARKERS

One legend is printed on the 4-mil flexible vinyl marker. Install on clean, smooth surface. Peel off liner backing and affix to the pipe with the high tack adhesive back. Marker withstands various environmental conditions. Arrow is provided for proper directional flow indication.

Fit Pipe Diameter	Marker Size
19 to 32 mm (3/4" to 1 1/4")	25 x 200 mm (1" x 8")
38 to 51 mm (1 1/2" to 2")	38 x 200 mm (1 1/2" x 8")
64 to 150 mm (2 1/4" to 6")	64 x 300 mm (2 1/2" x 12")
200 to 250 mm (8" to 10")	100 x 600 mm (4" x 24")

#### SNAP TITE™ MARKERS

Pre-coiled design 'snaps' back around to fit around the pipe. 20-mil rigid vinyl is printed repeatedly with the legend and directional flow arrow, upright and upside-down, around the marker for universal direction fit and visibility. Ideal for warm and cool pipes – easily install on and remove from pipes that are insulated, unpainted, and less perfection conditions.

Fit Pipe Diameter	Marker Size
19 to 32 mm (3/4" to 1 1/4")	150 x 200 mm (6" x 8")
38 to 51 mm (1 1/2" to 2")	229 x 200 mm (9" x 8")

## SELF-STICK VINYL PIPE MARKERS

Adhere self-stick pipe markers to clearly identify the pipe contents and flow direction.

- Bold, single legend on contrasting colour
- Included arrow\* provides proper directional flow marking
- 4-mil flexible vinyl marker has UV-resistant polyester overlaminated with high-tack, acrylic adhesive back
- Durable, protective gloss surface withstands fading, abrasions, splashes, grease, dust, and dirt that wipes off
- Easy to install by peeling off back liner, apply to a smooth, clean pipe surface - align and press firmly into place.
- Service temperature is -40° to 176°F

Available per each.

\*Directional flow arrow tapes are also available (sold separately) to increase the visibility by banding around the pipe and hold the marker in place.

## SNAP TITE™ PIPE MARKERS

It's a 'SNAP' to wrap around and identify contents in pipes with the flow direction. Snap Tite™ is pre-coiled to install quickly and easily - simply uncurl over the pipe, release it, and it 'SNAPS' into place.

- 360° coverage encircles the pipe for marker to be seen from virtually any angle
- Bold legend and directional flow arrow on contrasting colour is repeated upright and upside-down, for universal direction fit and visibility
- Heavy gauge 20-mil rigid vinyl plastic is lightweight, yet durable to withstand tough industrial environments
- Fits over pipes with dirty, greasy, or rough surfaces – even over insulation or other less than perfect surfaces, and easy to remove and reapply
- Service temperature range is -4° to 158°F

Available per each.

Not recommended for hot pipes.

## THE GLOBALLY HARMONIZED SYSTEM (GHS)

The Globally Harmonized System of Classification and Labeling of Chemicals (GHS) is an international system established by the United Nations to replace pre-existing classification and labeling methods. GHS presents a unified code to eliminate discrepancies in labeling conventions from one country to another. Using a harmonized standard reduces the chance of misinterpretation or confusion, thereby increasing safety regardless of the language spoken or even the level of literacy of those working with the substances.

It covers the following:

- Classification of physical health and environmental hazards
- Labeling environments
- Universal symbols and pictograms
- Hazard warning statements, aspiration hazards
- Signal word for type of hazard
- Safety data sheet format

The risk of chemical exposure lurks at any stage; be it production, transport, handling or use. Incomplete or ambiguous data can be not only dangerous but have a negative impact on productivity. As such, GHS is designed to protect the environment as well as workers, consumers, transport workers, and emergency responders.

One of the other aims of GHS is to improve and expand international knowledge of the chronic health hazards of chemicals and thereby reduce, eliminate and/or replace these chemicals. Due to the complex nature of this domain, the GHS is constantly being modified and revised. Effective date is proposed to be two years after publication of final rule passage by Congress.

## WHMIS REQUIREMENTS

The Workplace Hazardous Material Information System (WHMIS) is enforced nationwide. It was developed as a way of protecting workers from the adverse effects of hazardous materials in the workplace. WHMIS gives both the employers and employees the right to know about hazards associated with chemicals they work with. This is accomplished through the use of Material Safety Data Sheets (MSDS), proper labelling and training.

### Material Safety Data Sheets must:

1. Accompany every shipment of hazardous material.
2. Be kept on file and be accessible to all employees.
3. Be updated and revised every 3 years.

### Must contain the following information (as a minimum):

- Hazardous ingredients
- Preparation information
- Product information
- Physical data
- Fire or explosion data
- Reactivity data
- Toxicological properties
- Preventative measure
- First aid measures

### Supplier label must:

1. Be supplied by the manufacturer of the chemical.
2. Be applied to every container of hazardous material.
3. Have the distinct Hash border.

### Must contain a total of 7 pieces of information:

- Product identifier
- Supplier identifier
- Hazard symbol
- Risk phrase
- Precautionary measures
- First Aid measures
- Reference to MSDS

### Workplace labels are required:

1. When the supplier label has been damaged or fallen off.
2. When transferring chemical from the original container to a smaller one.
3. To contain at least 3 pieces of information:
  - Product identifier
  - Precautionary measure
  - Reference to MSDS

### Training is an important part of WHMIS.

#### Training must cover such things as:

- How to read and understand labels and MSDS
- Procedures for safe use, storage, handling and disposal of hazardous material
- Procedures to be followed in case of emergency

Every employee who comes in contact with hazardous material must be trained

## WHMIS AFTER GHS

The original WHMIS is not being replaced but rather updated to align as closely as possible with the United States and other key trading partners. The new WHMIS will be called "WHMIS 2015".

## CUSTOM GHS LABELS

CREATE YOUR OWN LABELS TO CONVEY HAZARD CLASS INFORMATION.

### How to Order:

1. Specify label size and material by part number
2. Send us your chemical or material information Refer to "Required Label Elements" guide
3. Provide guidance on label design if different from examples
4. Contact us with your request; we'll send you a proof (upon request)

### MATERIAL CHOICES

**Adhesive-poly sheet** - Flexible 2.6-mil thick vinyl has self-adhesive back. Peel-off liner and pressure-sensitive back permanently adheres to smooth, curved and irregular surfaces. Moisture resistant with outdoor durability

**Adhesive coated paper** - Economical, self-adhesive label is durable for limited use. 60-lb. coated paper with acrylic adhesive back. Peel off liner and permanently adhere to smooth, curved and irregular surfaces.

Sizes available in 3" x 4", 4" x 6", 6" x 8", 9" x 12", 10" x 14".

\*9" x 12" and 10" x 14" (or larger) labels are recommended when DOT label pictogram is included to maintain the required 4" x 4" (100 mm x 100 mm) size.

**ACETONE**

**DANGER**  
Highly flammable liquid and vapor.  
Causes severe eye irritation.

Keep away from heat, sparks, open flames and hot surfaces. Keep container closed when not in use. Use only in a well-ventilated area. Wear appropriate personal protective equipment. Flush eyes with water for at least 15 minutes while holding eyelids open.

Keep away from heat, sparks and flame - No smoking. Take precautionary measures against static discharge. Keep from direct sunlight. Keep container closed when not in use. Store in a cool/low temperature, well-ventilation place away from heat and ignition sources. Use only in a well ventilated area. Avoid contact with eyes, skin and clothing. Wear appropriate personal protective equipment, avoid direct contact. Flush eye with water for at least 15 minutes while holding eyelids open.

Format 2

Actual label design and layout may vary and are subject to the discretion of the competent authority.

### REQUIRED LABEL ELEMENTS

1. **Product Identifier** - Should match the product identifier used on the Safety Data Sheets.
2. **Signal Word** - Indicates the relative level of the hazard's severity. "Danger" and "Warning" are the GHS signal words.
3. **Pictograms** - Graphic compositions intended to convey specific hazard information.
4. **Hazard Statements** - A phrase assigned to a hazard class and category that describes the nature of the product hazards.
5. **Precautionary Statements** - Describe recommended measures to minimize or prevent adverse effects resulting from exposure.
6. **Supplier Identification** - The name, address and telephone number of the manufacturer or supplier.

**Note:** You are required to provide all necessary information specific to your hazardous chemical or material, to complete an accurate and safe label for your premises.

### Supplier label must include the following:

**Product identifier** - the brand name, chemical name, common name, generic name or trade name of the hazardous product.

**Initial supplier identifier** - the name, address and telephone number of either the Canadian manufacturer or the Canadian importer\*.

**Pictogram(s)** - hazard symbol within a red "square set on one of its points".

**Signal word** - a word used to alert the reader to a potential hazard and to indicate the severity of the hazard.

**Hazard statement(s)** - standardized phrases which describe the nature of the hazard posed by a hazardous product.

**Precautionary statement(s)** - standardized phrases that describe measures to be taken to minimize or prevent adverse effects resulting from exposure to a hazardous product or resulting from improper handling or storage of a hazardous product.

**Supplemental label information** - some supplemental label information is required based on the classification of the product. For example, the label for a mixture containing ingredients with unknown toxicity in amounts higher than or equal to 1% must include a statement indicating the percent of the ingredient or ingredients with unknown toxicity. Labels may also include supplementary information about precautionary actions, hazards not yet included in the GHS, physical state, or route of exposure. This information must not contradict or detract from the standardized information.

## 3M™ SCOTCHLITE™ DIAMOND GRADE™ CONSPICUITY SHEETING SERIES 983

- Series 983 sheeting features superior reflective qualities. It is also DOT-C2 certified and guaranteed to meet or exceed all NHTSA requirements. Series 983 sheeting offers the following:
- **Brightness**—six times brighter than conventional sheeting. Maintains its superior conspicuity with a bright white appearance during the day and high reflectivity at night
  - **Angularity**—reflects well at angles up to nearly 90°
  - **Outlining Capabilities**—helps identify vehicle size and type
  - **Durability**—resists weather, dirt and aging
  - **Seven-year warranty**—strong performance backed by more than 50 years of experience in reflective technology

Available in pre-cut strips and 50-yard rolls in solid white or alternating pattern. Alternating patterns conspicuity material with 7" white and 11" red, designed for balanced retroreflectivity between the two colours, or conspicuity material designed for more versatile applications with the 6" red and 6" white colour in 12" increments. Pre-cut strips are cut at the colour change for faster application. 100 strips per case.
