

# Boys & Girls Clubs

## COVID-19 Policy & Procedures (Revised 9/17/2021)

The following outlines procedures in the event a Boys & Girls Club of Elko, Spring Creek, or Wells employee, member, or guest that has COVID-19 symptoms, has been exposed to someone who may/does have COVID-19, and/or tests positive for COVID-19. All Boys & Girls Clubs in Elko, Spring Creek, and Wells sites and programs must adhere to this document.

**Possible Exposure/Exposure Defined:** Any individual that has had close contact with a confirmed infected individual within the past 6 days. The Elko County Health Department and the Boys & Girls Club has the authority to define exposure on a case by case basis.

**Contact Defined:** Contact is defined as sharing a work space, living at the same household, sharing a vehicle, interaction with a family member, any direct physical contact with another individual, playing on the same sport team, in the same school class or within 6' of an individual indoors for 15 minutes or more. The Elko County Health Department and the Boys & Girls Club has the authority to define contact on a case by case basis.

1. Any member, program/sport participant, staff, parent, or guest that has tested positive for COVID-19 has two options before that infected individual may return to any Boys & Girls Club facility or program.

**Option I:** The infected individual must obtain and present a test negative before returning.

**Option II:** The infected individual must quarantine away from the Club and its programs for at least 10 days after receiving a positive test result and show none of the COVID-19 symptoms listed above for at least three consecutive days (72 hours) before returning to the Club. The infected individual must also have had at least three consecutive days (72 hours) without a high fever (over 100°) that is NOT kept in check through the use of fever-reducing medications.

2. A member, staff, program/sport participant, parent, or guest that has been exposed to COVID-19 has one option before returning to the Club or its programs.

**Option I:** The individual must quarantine for at least 7 days after the last day that the individual was exposed to COVID-19. The individual themselves must also show no COVID-19 symptoms for at least three consecutive days (72 hours) and have no fever (over 100°) that is NOT kept in check through the use of fever-reducing medications for at least three consecutive days (72 hours) before returning to the Club or its programs.

3. A member, staff, parent, program/sport participant or guest that has any member living in the household that has contracted COVID-19 has two options before returning.

**Option I:** The member, staff, parent, program/sport participant or guest will be required to quarantine away until a test negative from the infected household individual/Individuals and the member, staff, parent, program/sport participant or guest has been obtained. The member, staff, parent, program/sport participant or guest test must be administered after the household members test-negative result date.

**Option II:** The individual must quarantine for at least 12 days after the date that the individual/individuals in the household received a positive test result. The individual must also have had at least three consecutive days (72 hours) without COVID-19 symptoms or have a high fever (over 100°) that is NOT kept in check through the use of fever-reducing medications.

**Sickness other than COVID-19:** Any form of sickness can be detrimental to the health of our members and families. Members and program/sport participant are asked to quarantine away from the Boys & Girls Clubs and/or its programs for at least 36 hours after they or the household member shows no sickness symptoms and has no fever (over 100°) that is NOT kept in check through the use of fever-reducing medications.
