

Planning for 2022 and beyond

- Planning and modeling to determine benefits and conditions necessitating additional actions
- Develop plans to design, mitigate, permit and install northern barrier(s) in conjunction with WFR barrier
 - Begin stakeholder discussions (e.g. NDWA, landowners and Reclamation Districts)
 - Monitoring and actions like temporary pumps to allow Delta diverters to continue to operate.
 - Levee encroachments and evaluations
- Mitigation measures for potential fish issues as result of blocking Sutter and Steamboat Slough migratory pathways
- Possible 2022 installation depending on drought conditions

Sutter/Steamboat Sloughs and West False River Alternative
