

Hello my name is Lisa Akinlabi (MacFadyen)

I am a life-long Burlington resident; I have been involved in childcare since my early teens. I have over 40 years of experience working with children and their families in some aspect of child care and development. I worked in residential programs for children with special needs and assisted those families with in-home services, focusing on behavioral issues; as a Developmental Service Worker.

I had volunteered as a Girl Guide commissioner and Sparks leader for over 15 years. I have run recreational programs, including day camps and cultural programs.

In recent years I have worked in the child care sector where I have seen first-hand the deficiencies in some existing programs. I was motivated to open MacFadyen Preschool Academy to offer the community I grew up in, a quality setting where families can be comforted knowing their child is very well taken care of. My goal is to promise and provide programming that is truly emergent and the teachers will actually follow through on what is promised to parents. We will always offer 110% to every family and child that comes into our care.
