Volume 8 Issue 5 August Issue © 2020 BP Sports, LLC POWERS' PICKS #1 NEWSIETTER LAST 5 YEARS!!!

Updated Ratings, Projected Lines and Sch

Will there be a college football season?

Nearly five months after most sports were shutdown, we have recently seen MLB, the NBA and the NHL return in the last couple of weeks. Still, we are living in times of great uncertainty. First and foremost, our thoughts are with all of you as we hope you stay safe and healthy in the coming weeks and months.

With regards to our business (mainly football), we're still not sure if college football is going to be played or not this season. As we're typing this on August 5th, Connecticut became the first FBS team to cancel their entire 2020 football season and the lower levels of Division II and Division III teams also cancelled their entire seasons. On the other end of the spectrum, the ACC and Big Ten just announced their updated schedule dates in the last 24 hours which gives us some hope. We do think the NFL will find a way to play this season and that's why we have split out the newsletter and VIP prices (see page 2).

One thing we do know is that unlike a lot of our competitors you won't see us handicapping Korean baseball, Russian table tennis, golf, UFC, European soccer or Nascar just to earn some quick money and pass the time away. We're not experts on those sports! We never have been and we're not going to pretend like we have an edge just to take your money. **BP Sports is a football service first and foremost!** We also handicap basketball in the football off-season. Therefore, we might dive into a little of the NBA playoffs which start in two weeks!

What we have been working on the last four months is football prep and in the last 3-4 issues you should be more than ready for the upcoming season. If you didn't see these issues yet, check your email or just go to bradpowerssports.com and download them. Quite frankly, we don't think there is a single service or handicapper that has put in more time and effort this football off-season.

For those of you that are already signed up for the upcoming football season, again we hope that this season will be played. If for some reason it is not, then we will handle refund options at that time. We're going to be real candid...if there is no 2020 football season, BP Sports is going to take a major hit financially. We won't go out of business, but let's just say the company will have seen better days.

Since we are a "mom and pop" type of business, we are happy to announce that any customer that is already signed up or will sign up for 2020 football (newsletter or VIP) will be automatically enrolled in our "grandfather" program. The "grandfather" program means that no matter what price inflation rates are in the coming years and decades that we are in business, you will never pay more than what you paid this year for our services. For example, if you paid \$79 for this year's newsletter. That will be the cost of the newsletter next year. It will be the cost of the newsletter for you in 2025, 2035 and even the year 2045 as long as we're still here and in business.

Again, our thoughts and prayers are with all of you out there. Stay safe and healthy and we will be talking to you very soon. The next issue will be sent Wednesday, August 26th as there are football games schedule right now on Saturday, August 29th.

Sincerely,

Brad Powers and Staff

Brad Powers

A special email will be sent to current and past subscribers on Monday, August 10th detailing their 2020 customer status!

2020 Position-By-Position "Up/Downs" for all 130 FBS teams!

to go through all 130 FBS teams team with a fine tooth comb for the upcoming college football season.

One of the methods we use in coming up with some initial power ratings for each team are our position-by-position "Up/Downs." Basically, we go through every position of every team and give a value of "-3 to +3" for QBs, RBs, WR/TE, OL, DL, LBs, DBs, Special Teams, Coaches and Intangibles.

A team with a "+2.5" for a single position means that we have that position power-rated up 2.5 points from the previous season. A good example for this year would be Miami (FL)'s offensive line. Last year they lost three starters (just 30 career starts) and four of Miami's starters were underclassmen. The Hurricanes allowed a program-record 51 sacks! Now this year Miami returns five starters (114 career starts) and they should be much improved.

A team with a "-3" for a single position means that we have that position power-rated down three points from the previous season. A good example for this year would be Texas St's linebackers. Last year they returned their entire two-deep. But this year they lose everyone. Bryan London would set the school-record with 459 career tackles and the Bobcats also lose multiple-year starters in Frankie Griffin (258 career tackles) and Nikolas Daniels (254 career tackles). That's 971 career tackles lost!

With 10 different categories, the maximum value a team can be up or down from the previous season is 30. That +30 or -30 points rarely, if ever, happens and the only example we can give you in the last 10 years of a team being nearly 4 TD's different (power ratings wise) from the previous sea-

Since we don't handicap baseball, the summer months give us ample time son is UCF in 2015. The Knights went 0-12 (-24 ppg) in 2015 following a 9-4 season where they were +9 ppg. We had them power-rated 27 points lower by the end of the season. The next closest was Louisville who went from 8-5 in 2017 (+11 ppg) to 2-10 (-24 ppg) in 2018. We had them power-rated down about 24 points from the beginning of the season.

> Below are our "Up/Downs" for every position on every team. For the coach's category (CCH), new coaches can sometimes be downgraded because they are new to that program and don't know the strengths and weaknesses of the players yet. Also they could be installing new schemes on offense and/or defense and the current players might not fit their styles of play.

> Finally, the intangibles category covers a broad range of categories including Close Wins/Losses from the previous year, Strength of Schedule (is it weaker or stronger from last year?), Turnovers, Injuries (were they healthy or banged up last year), etc. A team like Northwestern was graded "+3" in that category because they were -10 in TO's, suffered two close losses, play an easier schedule and are coming off an historically poor season (worst record since 2002).

> As you can see Georgia Tech and Houston who both had first-year coaches last year and suffered historically bad seasons have the highest "plus" grades. Also both teams have 19 returning starters and are among the most experienced teams in the country. Defending national champ LSU with only 8 starters back (tied for fewest in the country) and lose the Heisman Trophy winner Joe Burrow, their leading rusher, 4 of their top 5 tacklers and both coordinators is at the bottom of the chart.

Point Spread Value of All 130 Starting Quarterbacks in CFB One of the questions we get asked often in our media appearances is "how much is a player worth to a Vegas point spread? Obviously, the quarterback position is by far the most valuable position in football and the only position that will move the needle consistently. Very few non-QB's can move a point spread more than a point in CFB. In all of our years of handicapping and betting, we've never come across a person or service that has listed the point value for all 130 CFB QB's. Obviously, this year is a bit difficult for quantifying those new starting QB's as we didn't get to see them in spring practice. However, here is our preliminary list of what each starting QB is worth to a point spread in CFB. Remember, there are two parts to this: One is the quality of your starter and two is the quality of your backup. Some might be surprised that Clemson's Trevor Lawrence is worth only 7 points to the spread but remember, his backups are highly touted 5-star recruits. Lawrence would be worth 10 or more points if he had an average CFB backup.

	,	s backups are ni									
Team	Starter	Backup	Value		Starter	Backup	Value		Starter	Backup	Value

ield Advantage for all 130 College Football Teams in 2020

One of the questions we get asked often in our media appearances is "how much is homefield advantage worth in college football? The answer in most seasons is around 3 points. However, if recent years homefield has not meant nearly as much as it did 20 years ago. You could make a case that homefield is arguably closer to 2.5 points now as compared to 3.5 or 4 points in 2000. Regardless, this year is going to be very unique in that there will likely be no fans or a very limited percentage of fans in the stands due to COVID-19. Obviously, a big part of homefield advantage is crowd noise. So we did have to downgrade homefield this season by a little over 1-point on average. However, notice that we downgraded Penn State's homefield much more than a team like Eastern Michigan. Having a sold-out crowd of 100,000 people at night is far different than 10,000 people in a half-empty stadium during the day. Below are our normal and adjusted homefield numbers for every college football team. Notice there are some subtleties to the numbers. So if you're wondering how a team like Wyoming can have the same homefield advantage as a team like Notre Dame, note that Wyoming plays in 7,200 feet of elevation which is unique with or without fans. Finally, we will update these numbers if schools are allowed to pump in crowd noise or if there are a few schools that are allowing fans in the stands. Right these numbers are based on little to no fans.

there are a lew	here are a rew schools that are anowing rans in the stands. Aight these numbers are based on inthe to no rans.

#

Player

Mond is a dual-threat QB with 7,379 career pass yards, 1,314 career rush yards and 70 career total TD's. Mond has improved his completion % each year. Texas A&M is a Top 10 caliber team this season with a beneficial schedule that could see them start the season at least 9-1. Washington Redskins	5.5 (Under -130)	5 (Over -130)

Top 5 NFL Season Win Total/Division Bets 1. Cincinnati Bengals UNDER 6 Wins (-110 at Draft Kings), Now 5.5 (Under +120)

Cincinnati was only 2-14 last year and were dead last in yards per play differential (-1.2). Yes, they are much improved but they still have a rookie QB in Joe Burrow, an unproven coach in Zac Taylor and they're playing in a division with 3 playoff contenders. We project Cincinnati to be favored in only one game and our win total projections are only calling for 4.5 wins. 2. Chicago Bears UNDER 8 Wins (+105 at South Point), Now (-130)

Yes, the Bears won 8 games last year but they were +3 in net close wins. We're not buying QB Mitch Trubisky or Nick Foles and we didn't think the Bears upgraded themselves via the Draft. We only have them favorites in 5 games and our win total projections (using percentages) are only calling for 7.3 wins. **3. N.Y. Jets UNDER 7 Wins [-120 at West Gate]**, Now 6.5 [Under +110]

If you look at our projections on the next page, you'll see that we only have the Jets favored in one game! Obviously, we think they'll win more than that but our win total projections are only calling for 6.1 wins. They play our 5th toughest schedule and while the Jets won 7 last year, they were +4 in net close wins. **4. Las Vegas Raiders UNDER 7.5 Wins (-105 at BetMGM), Now (-120)**

There's going to be a lot of distractions for the Raiders in their new city. Having to move your family during the COVID-19 shut-down has to be stressful. The Raiders won 7 games a year ago but were -6.6 ppg and were +3 in net close wins. We have Las Vegas projected to be a favorite of more than 3 points in only one game this season and they play our 2nd toughest schedule. 5. Tampa Bay Buccaneers UNDER 10 Wins (-120 at Circa), Now 9.5 (Even)

We think the Bucs will be one of the most over-hyped teams in the NFL coming

into the 2020 season. Heck, we have Tampa Bay power-rated as the 6th best team but doing our win total projections (using percentages), we only have them winning 9.1 games. Tom Brady is going to be 43 years old, and we thought he was average at the end of last season.
