

### OBDII Port Challenge

Due 5/1

Take a look at the following video to assist you with finding the OBDII port under the dash

<https://www.youtube.com/watch?v=dKvNft0dLBU>

Assignment one: You will take a picture of the vehicles OBD II port located underneath the dash. This is the port where you would plug in a scan tool to check the MIL light (check engine light). All you need to do is take a photo of it or just point to it.

Please send the picture to [jtarbet@amphi.com](mailto:jtarbet@amphi.com) for credit (20 points).

### Fuse Box Challenge

Due 5/1

Assignment two: You will take a picture of the vehicles fuse box that may be located underneath the dash or under the hood of the vehicle. The fuse box may be open (showing all fuses) or it may be closed (a cover over the fuses). If you cannot find the fuse box, refer to the owner's manual that should be located in the glove box of the vehicle. All you need to do is take a photo of it or just point to it. Please send the picture to [jtarbet@amphi.com](mailto:jtarbet@amphi.com) for credit (20 points).

### Radiator cap Challenge

Due 5/1

Take a look at the following video to see the danger of opening a radiator cap when the vehicles engine is warm: [https://www.youtube.com/watch?v=C-Gz91p\\_aNQ](https://www.youtube.com/watch?v=C-Gz91p_aNQ)

Assignment 3: You will take a picture of the vehicles radiator cap. This cap is located under the hood of the vehicle. All you need to do is take a photo of it or just point to it. Do not open the cap if the car has been run recently or the vehicle is warm. Please send the picture to [jtarbet@amphi.com](mailto:jtarbet@amphi.com) for credit (20 points).
