

# Hydration Meets Wearable Technology

Introducing the first hydration monitoring wearable

**Revolutionary**—the world's first non-invasive photonic wearable sensor

**Smart Hydration**—Access your data seamlessly on smartphone

**Instant Feedback**—Instant hydration data without any delay at any time, continuously throughout day and night

**Hydration Analysis**—Tracking hydration level during daily routines, athlete and military training

**Versatility**—Flexible form factor, either wearable or smart phone attachable

**Custom Solution**—Customizable alert message when reaching critical hydration level

Wearable technology for hydration monitoring
