

CANADIAN DRY BEAN CROP REPORT July 2018

KEVEN SAWCHUK
Senior Merchandiser
Viterra, Inc.

Essential ingredients. Global success.

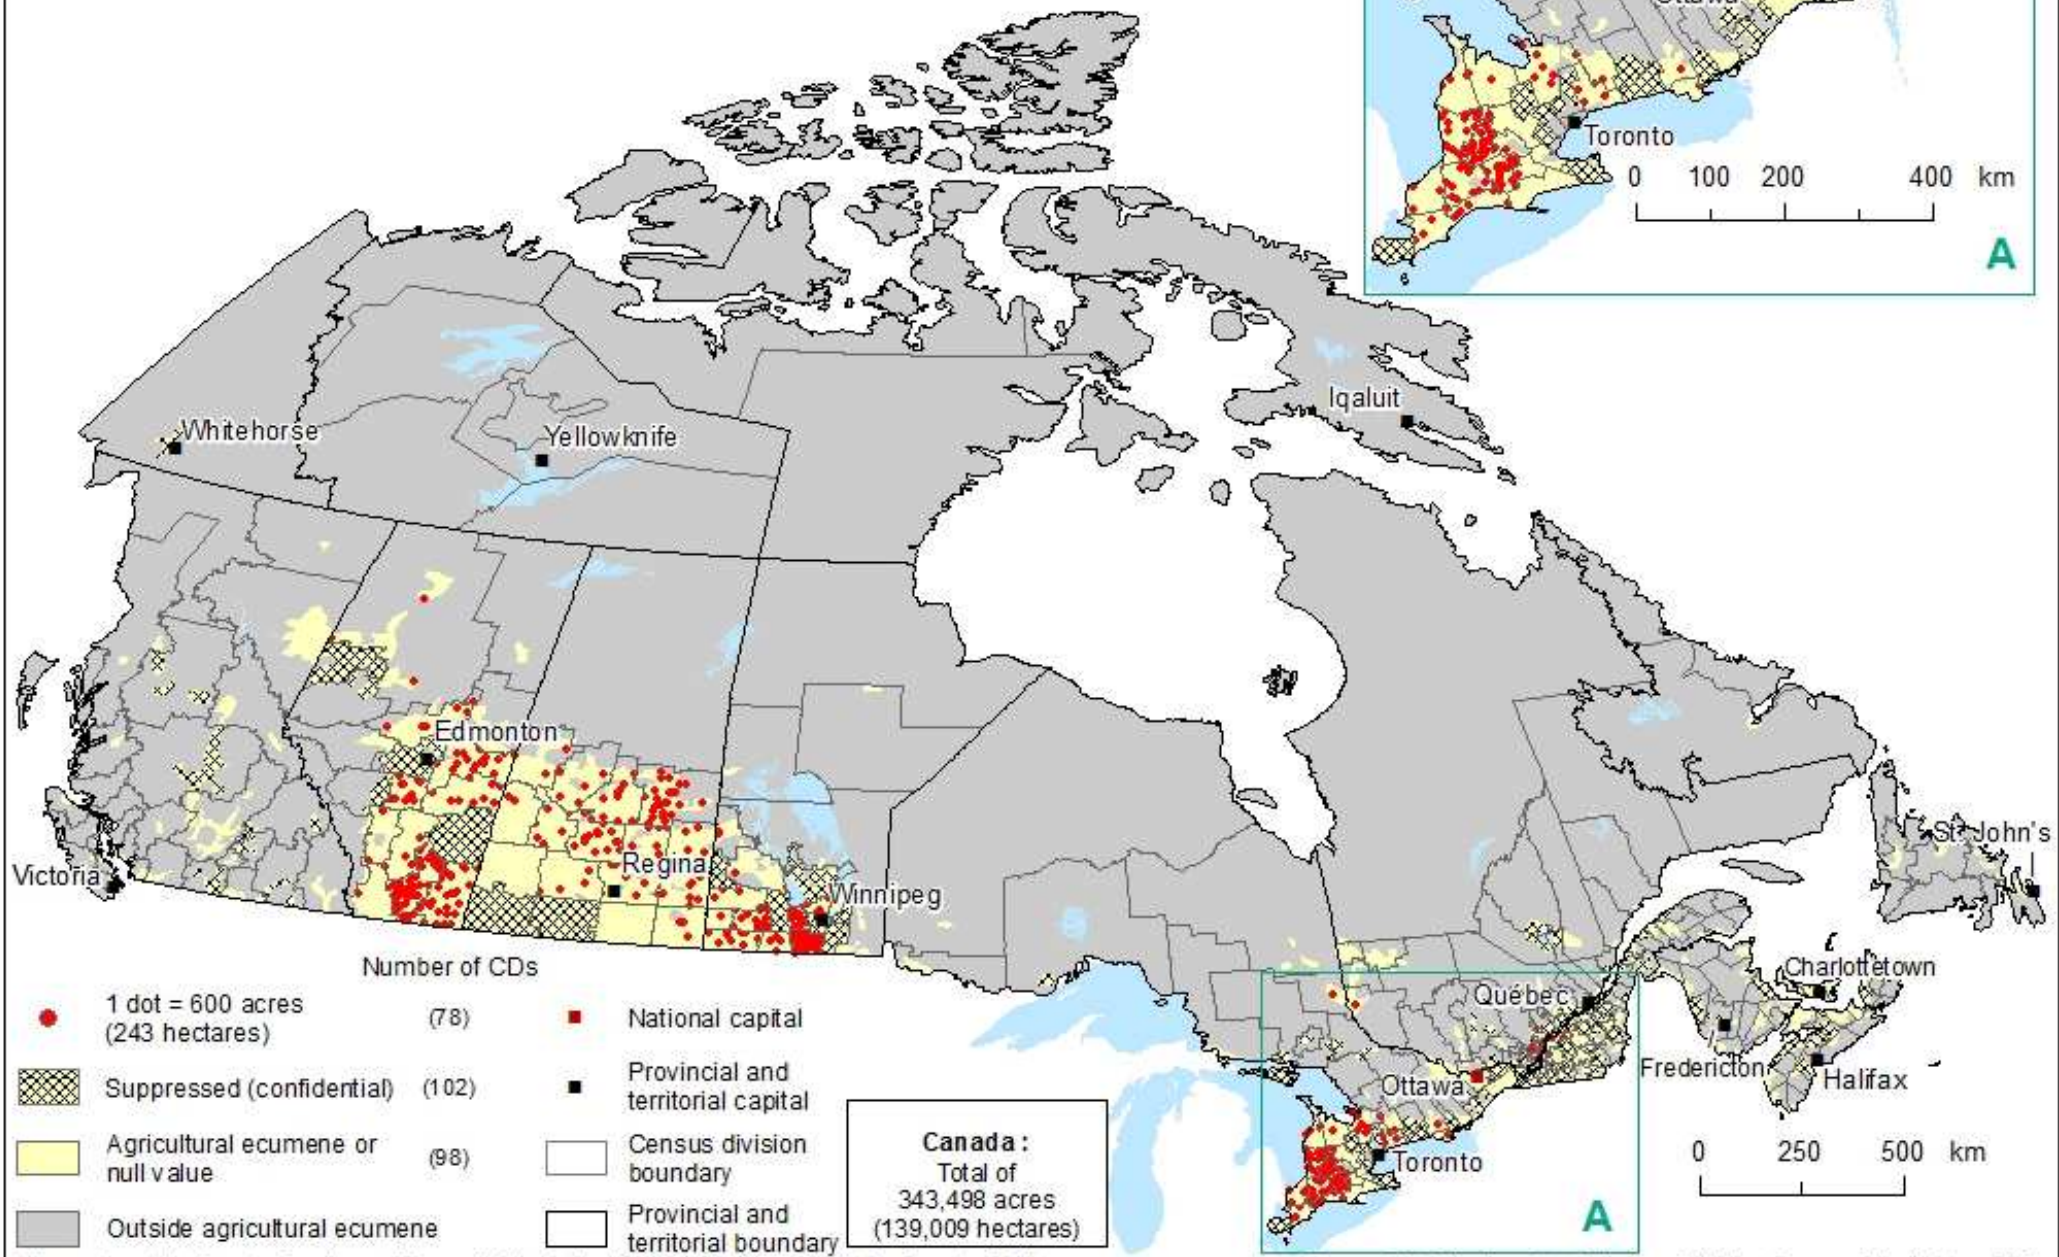

Spring trends 2018 planting

- Pea and Lentil acres reduced due India slow down
- Oilseeds and Garbanzo increased
- Dry bean plantings down 2% vs previous year
- Dry bean and Garb carry in near zero

CANADA

Other dry bean area by census division (CD), 2016

Map produced by Remote Sensing and Geospatial Analysis, Agriculture Division, Statistics Canada, 2018.

Source: Statistics Canada, Agriculture Division, Census of Agriculture, 2016.

Chick Peas (Garbanzo)

- 2018 acres more than triple previous year
- 145,000 – 2017 / 470,000 - 2018
- Mostly Kabuli types 8-10mm

470,000 acres x 15cwt yield = 7,050,000cwt
