

Why We're Better.

TANK LEGS

Heavy tank legs and rubber feet decrease vibration and sliding

ALUMINUM COOLING FANS

Fins on the aluminum pump head efficiently distribute heat

AFTERCOOLER

A braided aftercooler helps absorb vibration, allowing longer lifespan

FLAT FREE TIRE

A foam-rubber compound eliminates puncturing

NORGREN REGULATOR

Hi-flow "Norgren" regulators are designed for surge-flow, reducing pressure drops

REINFORCED BELT GUARD

A better, heavier-duty belt guard protects against dents and breakage

THROTTLE

Nylon inserts replace any would-be metal to metal contact

OIL LEVEL SIGHT GLASS

Check the pump oil level at a glance

BALL VALVE

Sturdy, yet easy to open ball valves are on each cylinder

ASSEMBLED IN THE USA

Every J-Air compressor is hand assembled and tested in Johnstown, PA

BELT TIGHTENING SYSTEM

Composed of 3/8" bolt and custom 3/16" belt plate, this system allows on the fly adjustments

J-Air History

Back in 1957, two men from Johnstown, PA began building small air compressors for the construction industry. These machines became the most well-known and reliable portable compressors on the market. Everyone in the industry knew that the blue colored compressor from Johnstown was as reliable as the men, and the Western Pennsylvania work ethic, that built them. Over 50 years later, the blue J-Air Compressors are still assembled in Johnstown and are as reliable and durable as ever.

In 2004, while many companies were moving their manufacturing operations out of the country, J-Air partnered with JWF Industries, a Johnstown-based contract manufacturer, to meet the growing demand for the J-Air product line. In 2009, with quality and service as driving factors, J-Air, incorporated all of its manufacturing, management and distribution operations into JWF's main facility. The 800,000 sq. ft. facility has a cutting-edge engineering department with over 300 certified welders, tubular and sheet lasers, CNC machining and tube bending, and a state-of-the-art powder coating line.

J-Air Compressors Your Best Choice.

Our Compressors are the best performing, most durable and reliable equipment made today. Still assembled in Johnstown, PA our compressors' blue color represents quality and value that other manufacturers can't match.

STANDARD FEATURES:

- Flat Free Tires
- Aluminum Splash Lubricated Pump with Cast Iron Cylinder
- Ball Bearing Crankshaft
- Initial Oil Fill in Crankcase
- Large Oil Level Sight Glass
- Oversized Flywheel for Efficient Pump Cooling
- Automotive Style Bearing Inserts on Connecting Rods
- Heavy Duty 3/16" Deck with Easy Belt Tension Adjustment System
- High Flow Norgren Regulator & 2" Gauge
- 3/8" Discharge Port
- Stainless Steel Braided Aftercooler
- Heavy Duty Air Filter
- 1/4" Ball Drain Valve
- Reinforced Belt Guard- Totally Enclosed
- 130 PSI Operating Pressure
- Idle Down Throttle Control - Reduces Fuel Consumption

J103R4-9P

4.5 Horsepower @ 3450 / 9 Gallon
9 CFM @ 100 PSI
 Runs Approximately:
 • 4-5 Framing/Sheathing Guns
 • 5-7 Roofing Guns

J113H6-9P

6.5 Horsepower @ 3450 / 9 Gallon
13.5 CFM @ 100 PSI
 Runs Approximately:
 • 6-7 Framing/Sheathing Guns
 • 7-9 Roofing Guns

J103H5-9P

5.5 Horsepower @ 3450 / 9 Gallon
9 CFM @ 100 PSI
 Runs Approximately:
 • 4-5 Framing/Sheathing Guns
 • 5-7 Roofing Guns

J114H8-16P

17 CFM @ 100 PSI
 8 Horsepower @ 3450 / 9 Gallon
 Runs Approximately:
 • 7-9 Framing/Sheathing Guns
 • 9-10 Roofing Guns

J113R6-9P

6 Horsepower @ 3450 / 9 Gallon
13.5 CFM @ 100 PSI
 Runs Approximately:
 • 6-7 Framing/Sheathing Guns
 • 7-9 Roofing Guns

J114R9-9P

9 Horsepower @ 3450 / 9 Gallon
17 CFM @ 100 PSI
 Runs Approximately:
 • 7-9 Framing/Sheathing Guns
 • 9-10 Roofing Guns

J113H5-9P

5.5 Horsepower @ 3450 / 9 Gallon
10.8 CFM @ 100 PSI
 Runs Approximately:
 • 5-6 Framing/Sheathing Guns
 • 7-8 Roofing Guns

J780-HC4V

2 Horsepower @ 3450 / 9 Gallon
4 CFM @ 100 PSI
 Runs Approximately:
 • 1-2 Framing/Sheathing Guns
 • 2-3 Roofing Guns

We design and build J-Air Compressors to outperform and outlast every compressor on the market. With a J-Air Compressor, you'll run more guns and you'll get more done.

1. Aluminum Cooling Fins
2. Directional Air Shroud
3. Cold Start Valve
4. Stainless Steel Braided Aftercooler
5. Three Point Reinforced Deck
6. Ball Drain Valves
7. Large Oil Sight Glass
8. Flat Free Tire
9. Heavy-Duty Legs
10. Reinforced Belt Guard
