Falcon AL

Lightweight Aluminum Traffic Door

Shown w/ 12" round window

The Falcon AL Lightweight Aluminum traffic door is constructed from a solid sheet of anodized aluminum. This door is most commonly used in restaurants, kitchens and hotels.

- ✓ Lightweight solution for controlling traffic flow, and a visual separation of environments
- ✓ Tempered aluminum alloy with a clear anodized finish
- ✓ Reinforced back spine for added strength
- ✓ Clean, smooth surface design
- ✓ Low profile diamond formed leading edge eliminates pinch point
- ✓ Smooth swing double-acting hinge
- ✓ Effortless operation
- ✓ Easy to clean
