

Gepetto's Magic Toy Shop

The stage is filled with the sight of a sparkling ice castle with archways made from candy canes and toy soldiers standing eight feet tall. It is here that Gepetto has created some fantastic holiday treats using magic and illusion.

During this forty minute fantasy Gepetto will transform a tiny rag doll into a life size living doll. She will float in midair and vanish before your very eyes. Gepetto will demonstrate how he can create a new toy by allowing the audience to pick pieces from four separate toys and then watch it magically come to life.
