

204-1322S

HDMI to VGA Converter

This HDMI to VGA converter allows you to connect any item having an HDMI output to a VGA monitor, VGA TV or VGA projector. The input can be a games console, such as the Xbox 360 or PS3, or any other source equipment such as a satellite receiver or DVD player.

The 204-1322S uses the latest low power circuitry and can be powered through the HDMI cable using the power supply facility built into most standard HDMI output connections. Yet, a USB socket is built into the converter allowing the use of an external power supply if necessary. The input connection on this device is a standard full size HDMI socket. The output is a standard 15 pin VGA connector and a 3.5mm stereo audio socket for audio. Audio can be connected to a suitable external amplifier or to earphones

FEATURES

- Compatible HDMI 1.3, automatic detection HDCP
- No need any software, plug and play
- All the hardware conversion processing, with images of high definition, good brightness, high image quality
- Portable & mini-size design
- VGA output socket with 3.5mm jack for audio
- USB power cable supplied
