

STRUCTURES INSPECTION FLORIDA'S TURNPIKE, EXTENSION AND SAWGRASS EXPRESSWAY

Client: Florida Department of Transportation - Turnpike District (8)

Constructioneer Corporation recently completed a 2-year project performing structures inspections on 200 miles of Florida's Turnpike, the Sawgrass Expressway, and Turnpike Extension covering over nine counties. The projects included 339 bridges (plus 4 tunnels), 2 emergency bridge inspections, 50 repaired/rehabilitated bridges, 210 overhead signs, 25 initial overhead signs, 198 light poles, and 98 (initial) culverts. This project included underwater inspections, penetration diving, maintenance of traffic, load analyses, special equipment (snooper & lift trucks). Constructioneer hired a major international engineering firm (Parsons Brinckerhoff...) to provide specialized services. The Turnpike Bridge Inspection work was completed in 1995. We have adequate staffing to provide maintenance structures inspection services adhering to state and federal guidelines.
