

# Summer Newsletter 2016 Issue 1

## ENGINEERING

The D&B Alumni club has grown by one with the recent retirement of Wayne Whitall, who worked for D&B Engineering for exactly 20 years! We congratulate Wayne upon his retirement at D&B as a Sales Engineer. He joins 6 others who were employed at D&B Engineering for over two decades. As most know, it's a rarity to have many intelligent and dedicated workers retire from the company after lengthy employment timespans. D&B appreciates the hard work of their employees and looks forward to future growth of its Alumni Club.

### MEET MATT PEDECINE:

D&B also celebrates the growth and future of the company. In January 2016, Matthew Pedecine joined the D&B team as a Project Manager. The 26-year-old UConn graduate immerses himself completely from design phase to final commissioning of projects that include D&B supplied equipment. Matt can be reached at [mpedecine@dbnj.com](mailto:mpedecine@dbnj.com).

## D&B IN THE PRESS

The Turtle Back Zoo sought the help of D&B to replicate the weather of Earth's hottest continent for the Zoo's new giraffe exhibit. Two (2) Xetex energy recovery units were provided and have been running successfully since the winter. The Xetex units bring in hot air during the summer and warm up the outside air during the winter months. The Zoo's giraffe exhibit has yielded record attendance since opening.
