Finest Archery
Equipment for
The Sportsman Hunter
The Tournament Archer
And Family Fun.

imperial

A tradition of greatness. That's the story behind the Imperial for 1970. For nearly a half century the name YORK has meant better archery equipment — better design, better quality and, therefore, more shooting satisfaction. This bow is certainly a part of that tradition.

The Imperial is exactly right for the real competitor, the archer who is serious about the sport and appreciates maximum performance. This is a tournament bow with a feel that builds confidence.

A bow of unusual beauty, the Imperial has inherent design characteristics necessary for consistent accuracy and flat trajectory. It really delivers and with stability and smoothness you'll find hard to believe. Available for both right and left handed archers.

No. SWR-1 AMO length 68 in. . . . \$140.00. Pulling weights to 50 lbs. For arrows to 32 in. Weighed at 28 in. draw. Recommended brace height: Approx. 8½ in.

No. SWR-2 AMO length 64 in. . . . \$140.00. Pulling weights to 50 lbs. For arrows to 30 in. Weighed at 28 in. draw. Recommended brace height: Approx. 8 in.

The Imperial is equipped with a stabilizer connector and comes with the No. PBC bowcase.

Coronet

The Coronet is unique among fine bows. You will first appreciate its beauty, symmetry and fine woods. Shoot it and then you will know this is a tournament caliber bow at a remarkably low price. You'll watch the arrow hit the target and scarcely know it has left the bow. Only YORK could develop a bow with so much going for it.

The handle section of exotic imported hardwoods has double overlays on both the face and back and the limbs are made with the finest fiberglass supporting select maple laminations. Available for both right and left handed archers.

No. DRR-1 AMO length 66 in. . . . \$85.00. Pulling weights to 50 lbs. For arrows to 32 in. Weighed at 28 in. draw. Recommended brace height: Approx. 8½ in. The Coronet is equipped with a stabilizer connector.

Super Crest

The Super Crest provides exceptional shooting qualities and outstanding features of design at a very low price. Its handle section of harmonious laminations of White Holly and exotic imported hardwoods makes this a bow of unusual beauty.

With longer limbs and the forward placed balance projections the Super Crest shoots smoothly and with a lot of cast. It has particular appeal for target and field archers. Available for both right and left handed shooters.

No. WRZ AMO length 66 in. . . . \$65.00. Pulling weights to 55 pounds. For arrows to 32 in. Weighed at 28 in. draw. Recommended brace height: Approx. 7½ in.

Crest

The Crest is a precisely designed, moderately priced bow with the versatility for hunting, target or field shooting. Combining YORK custom quality with exotic imported hardwoods provides beauty as well as cast and consistently dependable performance. The Crest has rugged stamina and the fine shooting qualities demanded by the experienced archer. Available for both right and left handed shooters.

No. RRS-1 AMO length 64 in. . . . \$49.50. Pulling weights to 55 lbs. For arrows to 30 in. Weighed at 28 in. draw. Recommended brace height: Approx. 7½ in.

Crescent

Here's a value packed, budget priced composite bow that is rugged, dependable and gives real shooting satisfaction too. The Crescent is a reflexed, modified recurve with smoothness, accuracy and graceful beauty far beyond its modest price. It is an excellent first bow for the adult. Available for both right and left handed archers.

No. GBF-1 AMO length 64 in. . . . \$39.50. Pulling weights to 55 lbs. For arrows to 30 in. Weighed at 28 in. draw. Recommended brace height: Approx. 7 in.

Cadet

The Cadet is a handsome, hard hitting bow that is light in the hand and a pleasure to shoot. It's perfect for beginners — a quality composite bow at a remarkably low price. Available for both right and left handed archers.

No. BFB AMO length 60 in. . . . \$29.50. Pulling weights to 40 lbs. For arrows to 28 in. Weighed at 28 in. draw. Recommended brace height: Approx. 6½ in.

Clipper

The Clipper is perfect for team and school archery programs. With an arrow rest on both sides it can be used by either right or left handed shooters. It's a rugged, dependable bow, backed and faced with fiber glass and made with select woods. The Clipper is light in the hand and packed with power.

No. STB AMO length 60 in. . . . \$24.50. Pulling weights to 35 lbs. For arrows to 28 in. Weighed at 28 in. draw. Recommended brace height: Approx. 6½ in.

Thunderbolt

This is the short hunter that has shown the way. York introduced the Thunderbolt in 1959 and it has since become the standard of the industry. Although others have followed you'll not find another short hunting bow that performs like the Thunderbolt. This one draws smoothly without "stack" and shoots with real authority. It has become a favorite weapon among bowhunters. And now for 1970 the Thunderbolt is better than ever. Look at the rare beauty in the handle section. Placed where it adds strength as well as eye appeal, the high compression phenolic is combined with exotic imported hardwoods. It is carefully contoured for a natural, comfortable feel. This is a high performance bow. Try it. Available for both right and left handed archers.

No. RRH AMO length 54 in. . . . \$65.00. Pulling weights to 70 lbs. For arrows to 30 in. Weighed at 28 in. draw. Recommended brace height: Approx. 7 1/2 in.

Tracker

The Tracker is a 60" hunting weapon that has the stamina and exceptional shooting qualities you'll want for a lot of rugged days in the field. This is a versatile, power packed bow that will deliver shot after shot with precision and comfort.

YORK custom quality and design are combined with exotic imported hardwoods and the finest fiber glass facing and backing. Available for both right and left handed archers.

Trophy

The Trophy hunter is a bow that will put you in the field with satisfying shooting power and dependability at a budget price. This bow will surprise you with its smooth draw, exceptional cast and a minimum of shooting vibration. The beautiful, American Walnut handle section is especially contoured for comfort and stability. Available for both right and left handed shooters.

TRACKER
No. RRS-2 AMO length 60 in. . . . \$49.50. Pulling weights to 55 lbs. For arrows to 30 in. Weighed at 28 in. draw. Recommended brace height: Approx. 7 in.

TROPHY
No. GBF-2 AMO length 60 in. . . . \$39.50. Pulling weights to 55 lbs. For arrows to 30 in. Weighed at 28 in. draw. Recommended brace height: Approx. 7 in.

Quality Craftsmanship in Fiber Glass Bows

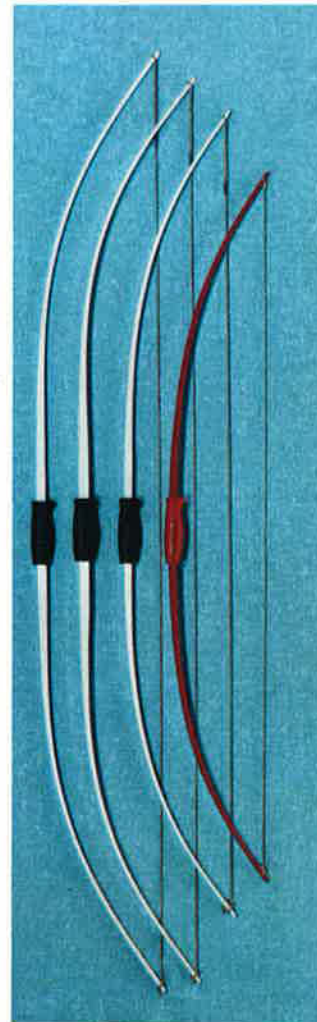

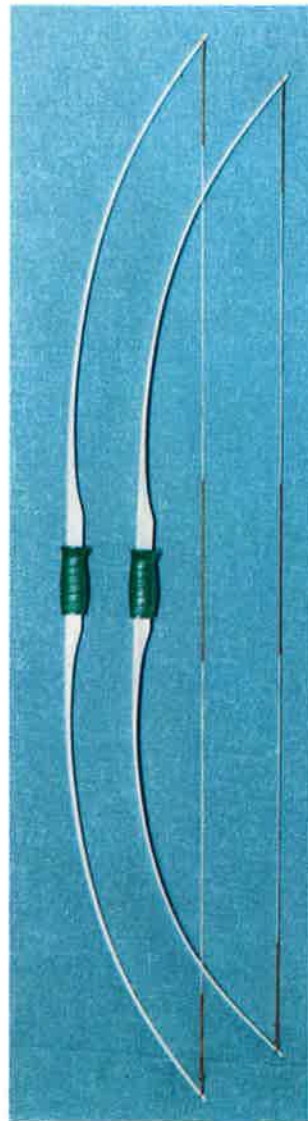

A complete selection of lengths and styles make YORK's fiber glass bow line a perfect choice for beginning archers, school archery programs and budget minded bowhunters. Guaranteed unbreakable, these bows have molded saddle-type handles and offer dependability and value beyond compare.

Perfect choice for beginning archers, school Archery classes! Bows in YORK'S Satellite Series are made of tough, durable fiber glass with recurved ends, flat contoured limbs, molded saddle-type handles and built-in arrow rests. Each streamlined beauty is built to precision for perfection in detail, finished in rich, glowing colors. Weather conditions will not affect the performance nor mar the beauty of these hard-shooting bows. Dollar for dollar, feature for feature, you won't find a better bow anywhere!

No. **RG-50** 5 ft. Recurved. Dual arrow rest. 20, 25, 30, 35, 40, 45, 50, 55 lb. pulling weights at 28 in. draw ea. **\$15.95**

TARGET STANDS

Made of soft wood so as not to damage arrows. Brackets on outside legs on which to place targets.

- No. T-50 — 5 ft. for 36 inch or or 24 inch targets ea. \$7.25
- No. T-60 — 6 ft. for 48 in. targets ea. \$7.50

No. T-50
No. T-60

PF Series

FF Series

FIELD ARCHERY TARGET FACES

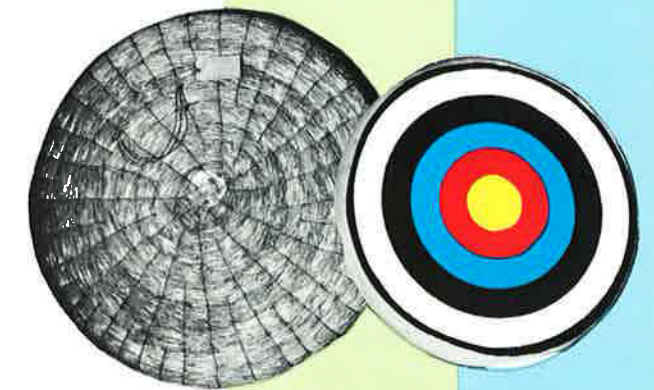

Black and White Roving Field Faces

Printed on heavy white tag board.

- No. FF-24 — 24 inch ea. \$.35
- No. FF-18 — 18 inch ea. \$.20
- No. FF-12 — 12 inch ea. \$.15
- No. FF-6 — 6 inch ea. \$.06

IMPORTANT NOTICE

MG targets are shipped from the factory in Columbus, Nebraska and are considered separate from all YORK items on freight allowances. Target shipments of 100 pounds or more will be given a freight allowance up to \$4.50 per hundred pounds. Target shipments weighing less than 100 pounds must be shipped collect without any allowance being given.

Tournament approved, machine made, hand tied targets of long length Indian Cord grass. Chemically treated for longer life, greater stopping power and resistance to vermin.

- No. MG-48 — 48 in. — 70 lbs. ea. \$36.50
- No. MG-36 — 36 in. — 40 lbs. ea. \$21.50
- No. MG-24 — 24 in. — 20 lbs. ea. \$12.50

Archery ACCESSORIES YORK

York Accessory Display

A complete assortment of bowstrings and other popular accessory items. Each is attractively blister packaged or skin packaged on colorful cards. The display rack, suitable for either counter top or peg board, is free with this standard assortment of items:

- 36 ea. No. DS Bowstrings, Dacron, double-loop. (For the most popular bow lengths)
- 12 ea. No. RS Bowstrings, Dacron single-loop. (For the most popular bow lengths)
- 12 ea. No. DBS Bowstring, braided Dacron, double-loop. (6 for 4'6" bow)
- 6 ea. No. FS-60 Hemp Bowstrings.
- 4 ea. No. FP-35 Fish Arrow Points.
- 4 pr. No. BBL Brush Buttons.
- 4 dz. No. PN-16 Nocks.
- 4 dz. No. PN-11 Nocks.
- 4 pkg. No. HP-4 Hunting Points.
- 4 pkg. No. HP-3 Hunting Points.
- 6 dz. No. SNS-35 Field Points.
- 6 dz. No. BP-30 Target Points.
- 4 ea. No. BW Bowstring Wax.

Cat. No. AD-1 ea. \$108.50

Bowstrings

No. DS Bowstring, Best Quality, double loop. Made of type "B" Dacron with each strand pre-stretched and pre-waxed. Served at loops and at the center. Specify bow length and weight in order.

Please note: The Archery Manufacturers Organization has standardized on bow and bow string lengths. Each bow length is now established by standard procedures which result in a bow string that is 3 inches shorter than the designated length of the bow for which it is intended. For example: a bow marked AMO 60" will require a bow string 57" long, under tension.

When replacement strings are needed for older bows made before the adoption of the Archery Industry standards, the old bow string should be measured and this length specified.

Bow Length	Bow Length
No. DS-59 for 5'9" bow	No. DS-52 for 5'2" bow
No. DS-58 for 5'8" bow	No. DS-50 for 5" bow
No. DS-56 for 5'6" bow	No. DS-48 for 4'8" bow
No. DS-54 for 5'4" bow	No. DS-46 for 4'6" bow
No. DS-52 for 5'2" bow	

ea. \$1.50

NO. RS BEST QUALITY SINGLE LOOP DACRON BOWSTRINGS. Served at the arrow nocking area. When the nock-to-nock bow length cannot be accurately determined, it is sometimes better to order single loop strings because the one plain end permits adjustment. Available in four lengths:

- No. RS-48 for bow 4'8" to 5'
- No. RS-52 for bows 5' to 5'4"
- No. RS-56 for bows 5'4" to 5'8"
- No. RS-60 for bows 5'8" to 6'

ea. \$1.00

NO. DBS DOUBLE LOOP BRAIDED DACRON BOWSTRINGS.

- Available in two lengths for bows not exceeding 35 lb.
- No. DBS-40 for 4' bows
- No. DBS-46 for 4'6" bows

ea. \$.60

NO. FS-60 LOW-PRICES HEMP BOWSTRINGS. Braided, single loop. One size, for bows to 6 feet in length. ea. \$.45

No. M-45 Tapering Tool, for 5/16" or 11/32" shafts. Cuts 5° taper for broadheads, and 11-1/2° taper for nocks. ea. \$4.50

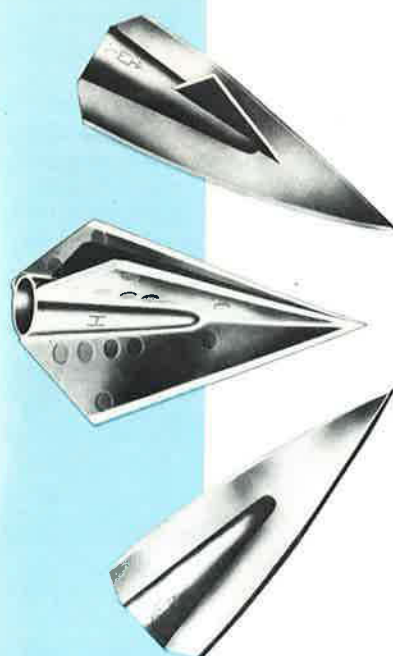

No. M-15 Sharpener. 3 overlapping cutting wheels, made of special alloy steel, tempered to a very high degree of hardness. Sharpens 2 and 3 blade broadheads as well as knives to a razor edge. Compact and sturdy. . . ea. \$2.50

No. M-30 Rhode Junior Feathering Tool. A precision fletcher with sturdy construction. Supplied with 3 feather indexing unit. Accepts arrow shafts of any size ea. \$7.95

No. GB - Selected barred Full-Length Feathers - Ground Bases ... doz. \$1.00

No. GD - Selected Dyed-Barred Full-Length Feathers - Ground Bases . doz. \$1.25

No. M-25 Fletching Cement. Made by Easton especially for aluminum shafts. All purpose - also for wood, glass, leather, cloth, china. 1 1/2 oz. tube. ea. \$.75

HP-4 Four Blade Broadhead Hunting Point. Blade of mill tempered spring steel, can be hand honed to razor sharpness. Barbless. For 11/32 inch shaft. Pkg. of 3 \$1.50

HP-3 "Hi Precision" Three Blade Broadhead with fused-on point reinforcement of hammer steel. Barbless. For 11/32" shafts. Pkg. of 3 \$1.50

HP-2 Two Blade Broadhead Hunting Point. Blade of mill tempered spring steel, can be hand honed to razor sharpness. Barbless. For 11/32 inch shaft. Pkg. of 3 \$1.25

No. NS-35 Special Non-Skid field points, 11/32" bore. . doz. \$.90
No. NS-30 Same as above but 5/16" bore. doz. \$.90

No. SNS-35 Special Non-skid blunt nosed field points, 11/32" dia. 5° taper bore. doz. \$.90

No. SNS-30 Same as above but 5/16" dia. 5° taper bore doz. \$.90

No. PP-50 Parallel Arrow Point. 5/16 inch diameter. . doz. \$.75

No. BP-30 Bullet-Type Arrow Points. 5/16 inch diameter doz. \$.50

No. PN-11 Plastic arrow nocks, 11/32 inch diameter doz. \$.50

No. PN-16 Plastic arrow nocks, 5/16 inch diameter doz. \$.50

No. PN-32 Plastic arrow nocks, 9/32 inch diameter doz. \$.50

No. PN-14 Plastic arrow nocks, 1/4 inch diameter doz. \$.50

No. PBT Bow Tip Protectors of tough vinyl plastic. Protect bowtips and hold string in place \$.20 pr.

No. WBQ Hushhh Bow Quiver, featuring the EZE-OFF clip. Easy to install on your bow. No tape, clamps or screw required. Holds 4 arrows. . . . pair \$2.95

AR Arrow Rest. A horizontal feather rest that is ready to apply in seconds with pressure sensitive tape. ea. \$.75

No. BBS BRUSH BUTTONS. Small size. Slipped onto bowstring ends, they prevent bowstring and bow limb intersection from hanging on brush in hunting. pr. \$.90

BBL Same as above but larger size. . . Pr. \$1.00

No. BS Bowstringer. For safely and easily bracing any bow up to 70 pounds without danger of twisting limbs. Blister packaged on card ea. \$3.00

No. STN Nocking Points. Shrinks easily and securely to bowstring with application of heat. Provides positive nocking point. Pkg. of 4 \$.75

No. BW - Bowstring wax. 1/2-oz. cake. ea. \$.25

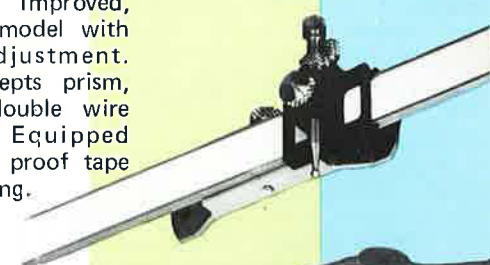

ACCESSORIES

No. M-10 Calibrated Bowsight with wind-age and elevation adjustment. . ea. \$1.50

No. M-50 Reynolds Bowsight. Improved, removable model with double adjustment. Sight accepts prism, pins or double wire aperture. Equipped with water proof tape for calibrating. ea. \$11.25

No. NBS Silencer. Light weight, weather resistant neoprene silencers mount concentrically on bowstring and effectively quiet twang. Pr. \$1.00

A Guide for Selecting Proper Equipment

ARROWS

If the beginner in Archery is to experience the progress which makes for lasting interest and maximum enjoyment of the Sport, he must begin with properly fitted equipment. Skilled and accurate shooting is dependent upon the consistency with which each successive arrow is shot. Consistency is dependent upon the degree of accuracy with which arrows are matched in weight and spine (stiffness) and upon the accuracy with which arrows are fletched (feathered). **For consistent shooting it is also very essential that the pounds of force or thrust behind each arrow be exactly the same.** The "pounds of pull" of a bow is an expression of the pulling force required to draw that bow (pull the bowstring back) to a fixed distance. If the thrust behind each arrow is to be consistent, it will be readily understood that the distance the bow is drawn must be the same for each shot. In Archery the arrow is the gauge which regulates this pulling distance.

AMO Nomenclature

To correctly measure the arrow length most suitable for you, place the nock of an arrow in the center of your chest about six inches below the chin. Hold the point end between the palms of your hands. With the arms extended to their full reach, straight in front of you, the point of the arrow should extend to the tips of your fingers. (See Fig. 2). This is the proper method of equipping the archer with target arrows.

For selecting proper length arrows of other types refer to Fig. 1. Select each type of arrow so that the tips of the fingers extend to that point on the arrows indicated by the dotted line.

By all means be sure that you shoot the correct length arrows because the development of real skill depends on this factor and, in addition, unnecessary length adds weight that robs you of velocity.

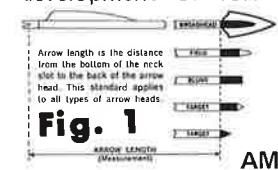

Fig. 1

AMO Nomenclature

Now — whether you anchor under your chin (generally preferred by target archers using bow-sights) or with the first finger at the corner of your mouth (for instinctive shooting and hunting) — you have a gauge to regulate your pulling distance. When shooting target arrows you will know that you have reached full draw for each shot when the point is flush with the back of the bow (the bow surface farthest from the eye). Hunting and field arrows will extend from the back of the bow but, when you have the proper length, a part of the instinctive skill quickly developed will enable you to easily gauge the full draw point.

Fig. 2

Determining Arrow Length

BOWS

In choosing any bow do not make the mistake of becoming "over-bowed". Choose one that you can pull to full draw and hold without shaking or straining too much and you will be able to develop proper shooting habits and progress more rapidly than if your bow is too heavy for you. A little tremor or shaking is all right; the muscles used for drawing a bow will develop quite rapidly with routine practice. But, in shooting, it is best to lay the bow down for a while if it becomes difficult to draw and hold for precise aim. It is easy to develop bad shooting habits and you always want to avoid "snap" shooting.

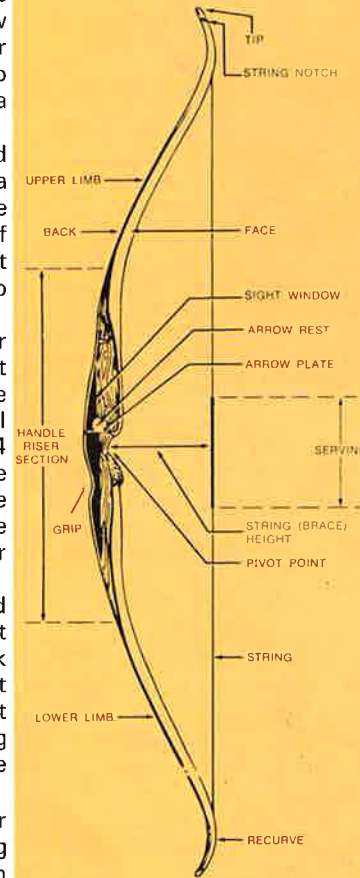

For many beginners, school archery programs and for budget minded bowhunters the YORK line of solid fiber glass bows offers a complete selection of styles and lengths. Review the specifications on these and note that the various models are available at different maximum pulling weights and that each is "weighed" at a certain draw distance. Choose from these, keeping in mind that each is designed for specific applications. Thus, the very young boy or girl will want a 4 ft. bow while the high school or college age beginner will prefer the SG-50 or SG-54 in the 20 to 30 pound range. The bowhunter will want a 45 to 55 pound bow.

To obtain the maximum enjoyment and pleasure from the Sport of Archery choose a YORK composite bow. Laminated of the finest fiber glass and woods the nature of their design and construction is such that these bows provide the highest degree of limb efficiency and shooting smoothness.

Generally speaking, bows 64 inches or longer are best for any phase of the sport involving continuous shooting. However, those archers who shoot 26 inch arrows or less will want to give serious consideration to bows 64 inches or shorter to take full advantage of the limb efficiency built into their bow. The bowhunter will place a high value on the shorter bows for maximum cast and easier handling in the brush.

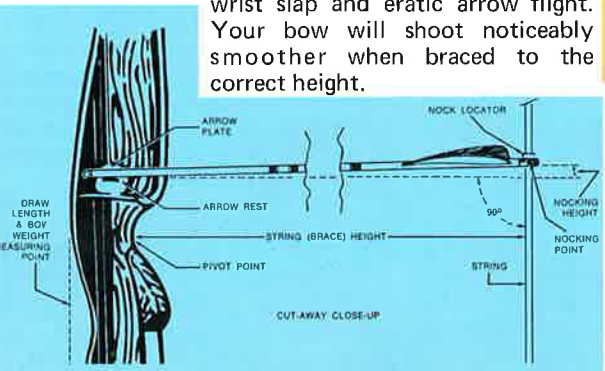

Your composite bow is precision built and deserves fine care. When not in use keep it unstrung and hung vertically or on a bow rack with pegs supporting both limbs. Apply a coat of good furniture wax occasionally to protect the finish. Be very careful while bracing (stringing) your bow to avoid twisting the limbs.

Recommended brace heights are given for each bow as an approximation in the catalog specifications. This distance is measured from the bowstring to the deepest cut in the handle, sometimes called the pivot point. See Fig. 3. Proper brace height for each model will vary with different archers and shooting styles and should be adjusted, by twisting the bowstring, to obtain maximum freedom from string noise, wrist slap and erratic arrow flight. Your bow will shoot noticeably smoother when braced to the correct height.

AMO Nomenclature

Over 40 years of designing experience and production know-how, as well as the most modern materials and technology are behind the YORK equipment you select.

Archery — for family fun and the sportsman hunter — can provide you with many years of recreational pleasure.

The TOTAL Line

Quality Merchandise
Outstanding Design
Superb Packaging

For nearly a half century the name YORK has meant better archery equipment... Better for the archer... Better for the man who sells them.

YORK is the TOTAL line... the complete line with the right equipment for bowhunters, beginners, tournament archers and school programs. And, with beautiful, full-view packaging, it's right for the modern merchandiser.

Backed by York's 48 Year Tradition of Quality Equipment

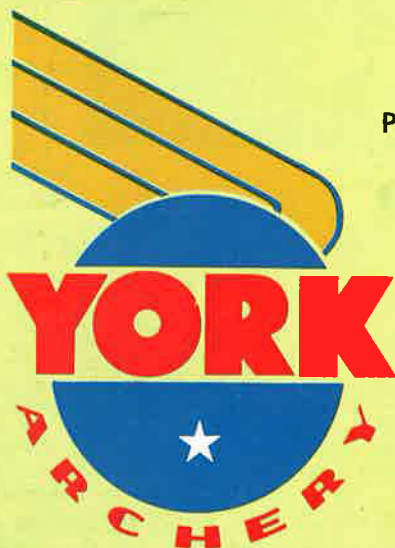

The York Guarantee

Every YORK product is guaranteed to be free from defects in workmanship or materials. The experience of 48 years has developed a team of designing skill and production know-how at YORK that is unsurpassed in the Archery Industry. It is this team that makes the YORK Guarantee possible. Any YORK item which appears defective, and shows no evidence of mishandling or misuse, should be sent prepaid direct to YORK Archery, Independence, Missouri, for replacement or repair.
