

Client Settings for Mac - Video Tab

- Skip to step 4 if the **preferences** Window is open
- Skip to step 5 if the **Preferences** window is open and the **Video** tab is selected.

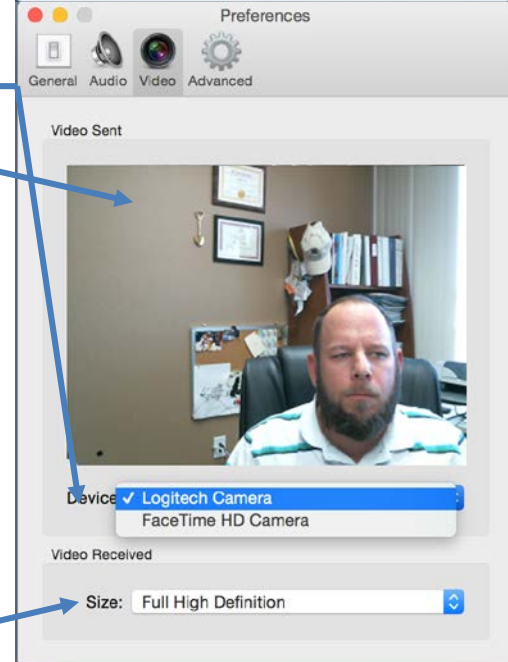

1. Start the **SCOPIA Desktop Client**
2. Click **SCOPIA Desktop** pull down menu on the upper left.
3. Click **Preferences**

4. Click the **Video** tab to access the Video settings

5. Use the **Device** pull-down menu under Video Sent to select your webcam (*Logitech Camera* is the only option available in this case)

6. Test your video by looking at the picture under Video Sent. You should see whatever video your webcam is shooting

7. Use the **Size** pull down menu under Video Received to select the size of the video you want to receive (★ **Full High Definition** is selected)

It is recommended that you select the highest size your network and computer will both support. Please see the Technical Requirements at www.3cmenow.org for further information.

8. Contact your campus IT video conferencing representative if you are unsure which size your campus bandwidth supports.
