

A message to my Aerolite friends,

I finally got the website updated. It needed it so badly but I apparently needed to wait until they could make web designing idiot proof for old farts like me. I hope you like what I have done.

Notice I used first names only to protect the innocent. Not so sure that applies to all of you, LOL. So if you do not want you name or picture used please contact me ASAP via email or phone.

I know some of these pictures may be out of date. You may have sold your plane or bought a used one. If there are any changes that need to be made shoot me an email or call me, also if you have new pictures or are new to having an Aerolite please send your picture (preferable with you and your plane in it) not of your girlfriend and I will add it to the slide show. The purpose of this is to support and to acknowledge the people that have supported me.

Thank you for entrusting me as you go to for parts. As many of you know I can make or replace just about every part on you plane. I try to keep the common stuff in stock like landing gear legs, spindles and nose forks. I can do booms, struts and tail booms and have occasionally replaced entire fuselages as well as wings. As the old saying goes....Stuff Happens! And I will be there for you when it does!

Also note that the parts list will be expanding. There are a lot of accessories that I have made that retro-fit from the Phoenix to the Aerolite such as disk brakes, flap handle and yoke fork just to mention a few.

Well that's all for now. Keep the blue sky up and keep her safe!

Thank you,

Mark W Klotz
