Appendix C. Project Area Photos and Historic Maps

1. Exterior view of the water works canal facing east into Griffin Pipe Company.

2. Exterior view of the water works canal facing north.

3. Exterior view of the water works canal facing southeast.

4. North view on top of the control gate of the water works canal.

5. Interior view of the water works canal facing northwest.

6. Closeup interior view of the water works canal facing northwest.

7. East view of the water works canal from the top of the control gate.

8. Northeast view of the horseshoe-shaped (water works) section of the dam. Note the complete inundation of the small island downstream from the dam.

9. North view of the Scott's Mill Dam from the top of the water works canal.

10. West view of Scott's Mill ruins.

11. South view of Scott's Mill ruins.

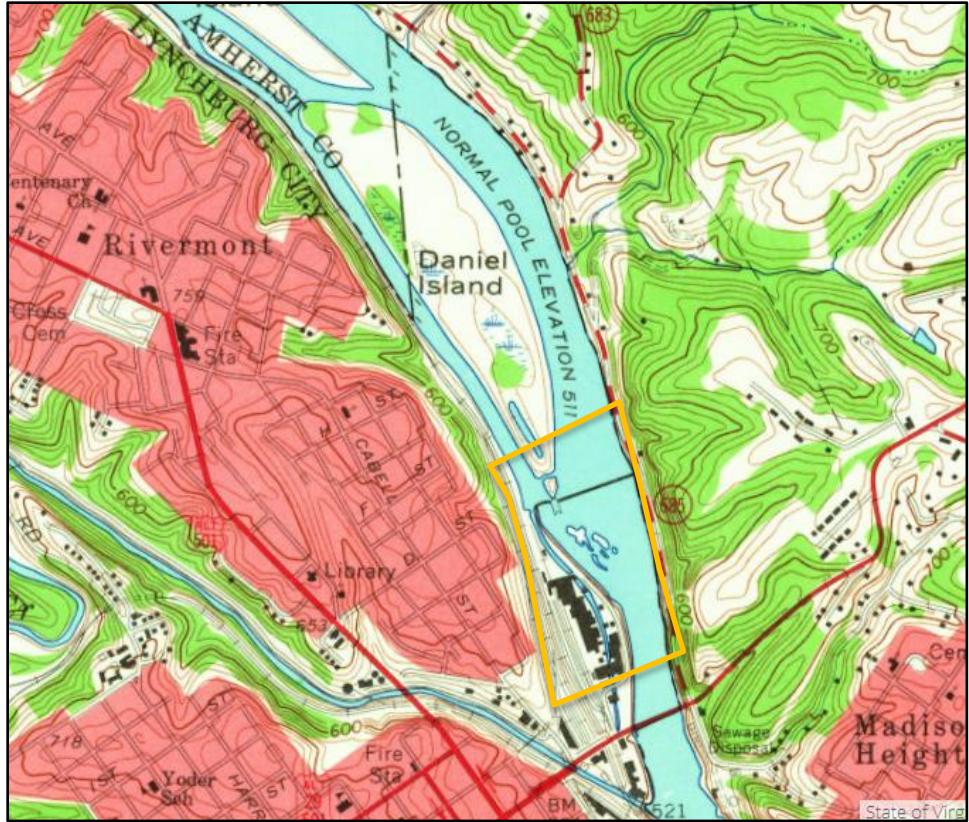

12. Southeast view of Scott's Mill ruins.

13. East view of Scott's Mill ruins.

14. 1864 Gilmer Map with the preliminary APE depicted in yellow. Note the separation between the waterworks canal on the right and the James River and Kanawha Canal guard locks on the left. At that time only the water works section of the dam appears to have been constructed (Library of Congress).

Lynchburg (1963), 1:24000 Topographic Quadrangle Map (USGS) with the preliminary APE depicted in yellow
