- Invest in our future success in

building a sustainable business with customer satisfaction, retain our proven reputation within the industry this we believe is best served by measured competence and efficiency.

**Mission** - To consistently provide superior security solutions using the most modern technology, well trained and motivated staff to make us the most sought after Security Company in Nigeria.

**Vision** - To remain the number one provider of professional security solutions in Nigeria, using competent personnel and superior resources.

## BACKGROUND CHECKS / PRE-EMPLOYMENT

At RootSearch Security Nigeria Limited, we do everything needed to ensure the quality of protection you and your family receive is of the highest calibre. Background checks have become a routine but integral part of the recruitment and hiring process.

Employers use these checks to vet potential workers and to ensure that the information applicants provide is truthful. Background checks protect the interest of the organization and the safety of other employees. The majority of employers -- including small businesses -- are using background checks to ensure they make wise hiring decisions. Because we integrate all of our services, we're able to deduce the most accurate picture of what's happening in the life of the individual in question.

We at RootSearch go deep into the last 3 years of an individual whether it be a domestic staff or a professional. We send our trained psychologist and detective to wherever it's needed to confirm detail and verify information that has been provided to us by our clients.

## EVENT SECURITY

When organizing an event, an important factor is to ensure the safety of the invited people and their property. No matter what type of event our customers are organizing, RootSearch Security can provide trained security personnel who are reliable and experienced.

Prior to the commencement of any event, RootSearch Security team members will visit the prospective venue to undertake a FULL FREE security survey. All events security personnel

communicate via two-way radio or its equivalent, so any minor issues can be dealt with in a fast and efficient manner causing minimal disruption of any event. Our event Security Personnel can take on many roles such as:

- Ticket checking
- Personal check
- Crowd control
- Car parking and traffic management.

(Uniformed serving Armed Forces personnel available on request)

## DATA GATHERING

Data Gathering is important as it helps us to collect, study and record information, make decisions about important issues as well as to pass information on to others. It enables us to provide information regarding a specific topic or area of study. We at RootSearch Security Nigeria Limited, aim to amass one of the largest databases of its kind in Nigeria. This Data will be used in a variety of ways, which will ultimately protect citizens.

With our network of partner companies as well as government agencies, we aim to bring you the customer the most current and up to date information on an individual.

We act in the fullest confidential remit possible and keep a small circle of people who have access to such sensitive material.

## **PRIVATE EYE / SURVEILLANCE**

RootSearch Security can provide private investigators, private detectives as well as security services for public, commercial and corporate clients. In addition, RootSearch Security can also provide private investigators and private detectives for cases, which potentially could result in criminal / civil proceedings. This includes, matrimonial or family disputes, unlawful insurance claims or legal matters surrounding employees.

In addition, RootSearch Security Nigeria Limited Investigation Department has extensive experience in carrying out international assignments. All staff, both male and female, are highly experienced, professional, and come from a military background. Whatever your circumstances, RootSearch Security will provide you with a discreet, professional, efficient and confidential service. We are flexible and competitively priced to suit all requirements and budgets.

No matter how big or small the job is, RootSearch Security guarantee a high level of diligence in its approach to all work, in order to achieve a result for the client. Surveillance and observations are well-used tools in the security industry for evidence/ intelligence gathering and prevention/ detection of crime and offenders. Surveillance can keep your business one step in front of your competitors and can also maintain a close eye on your workforce and sub contractors. Domestic surveillance can provide evidence required to assist clients and their legal cases where instigated. We can provide all forms of surveillance, including conventional, rural and electronic surveillance and have dedicated surveillance teams, which are strategically placed in order to offer the very best of services to our clients. Our highly experienced surveillance operatives are selected from the military services with many years of experience; they utilize state of the art equipment and technology. These include sophisticated global tracking systems, high-powered photographic and covert video equipment. Electronic surveillance, both audio and visual, can be a useful tool to monitor suspects and employees who are contravening company policy. It is often used to identify individuals acting corruptly or passing on company intelligence. Counter surveillance methods can be used to ensure that your company or employees are not the subjects of surveillance themselves.

## **CPU-CLOSE PROTECTION UNIT**

Using some of the world's finest Close Protection Officers, we are able to provide you and your staff with an individual or a team to safeguard life.

*RootSearch Security Nigeria Limited* is recognized as a premier provider of top quality Personnel protection in conjunction with the provision of its security services.

All of our operators have served in the Prestigious Nigerian Army or been trained by ex service men of the Nigerian Army.

*RootSearch Security Nigeria Limited* deploys either experienced individuals or bespoke experienced teams in support of specialist operations, on either long or short-term assignments. Our Teams have extensive experience in Supplying security services to Diplomats, High Net Worth Individuals, VIPs, corporate Clients and conglomerates.

## **CCTV / Alarm Installation & Maintenance**

CCTV is widely recognized as one of the most effective means of both deterring and detecting crime. RootSearch Nigeria Security Limited offers affordable CCTV installation for business premises as well as the home environment. At RootSearch Nigeria Security Limited we believe in specifying and installing the best CCTV equipment available, at the best possible price for each client. We feel that this is critical in giving our client's the most long-term cost effective security solutions. We refuse to compromise our standards and our client's interests by using inappropriate or inferior equipment.

The CCTV systems we install range from the single camera application to multiple cameras and multiple sites, which can be monitored and controlled from a single point.

Additionally, we offer other solutions such as a simple domestic CCTV and security lighting system, through to a simple networked camera that can connect to your broadband (and can be viewed from anywhere in the world and turn your home PC into a fully operational digital video recorder). RootSearch Nigeria Security Limited excels in the identification of appropriate CCTV systems and in offering installation at the right price, be it a simple home CCTV system to a fully operational digital CCTV system with fully functional speed domes that are used for both safety and security purposes.

Whatever your CCTV requirements, no matter how big or small, we are able to provide a CCTV solution for you no matter what budget. RootSearch Nigeria Security Limited prides itself on the service it provides. We consider this to be the most important part of our business. Our clients have come to expect a rapid, efficient response from well-trained and competent engineers. We offer a range of service agreement options and can look after the most complex of systems, including Intruder alarms and fire alarms, external alarm and all types of CCTV and Access Control Systems.
