

Recommendations

Unicor Data/Call center

"Reva was awarded the contract with a short lead time to start work and a very tight schedule, in which was completed on time. During the course of the project, Reva, offered many Value Engineering cost saving initiatives, saving UNICOR thousands in dollars. Their work has been excellent both from a construction/technical standpoint as well as meeting budget and schedule constraints. I can highly recommend Reva Murphy Associate for future projects and contracts."

John Jenkins, Sr. Construction Project Manager, UNICOR

[Beale AFB](#)

"[The] execution of our Distinguished Visitors Quarters Renovation project was extraordinary. The cooperation, professionalism, and support we have received from your firm have been second to none. The result has been timely completion with equitable price and quality, the three areas an owner is most concerned about. I look forward to more partnering relationships between Beale AFB and Reva Murphy Associates, Inc.

Sandra L. Turzak, Director of Contract Operations

[Wawona](#)

The seismic rehabilitation of the Main Building of the Wawona Hotel was an important project for the park performed on a highly significant historic structure. Reva Murphy Associates is a firm very capable of performing in sensitive situations involving the requirements of working around day-to-day hotel operations and special events. The administration of work was performed at a high level of reliability and without question the quality of construction was outstanding. It was a pleasure to have Reva Murphy Associates working in the park.

Michael J. Tollefson, Superintendent, National Park Service

[Alcatraz Island Power Plant](#)

I want to get it on record how impressed I am with the job Reva Murphy Associates did out on Alcatraz Island on the Power Plant roof. They swarmed out there and completed that job in record time, dealing with the inherent difficulties of transporting men, materials and equipment to the island on barges and ferries, at early hours, through Fisherman's Wharf and Island Visitor traffic **and** all within the time constraints of the impending Bird Season! They provided the necessary manpower, equipment, materials and expertise to complete this job in an exemplary fashion.

Steve Turpie, Project Manager, GOGA Mani/Eng
