## **Report On The Financial Statements**

We have audited the accompanying financial statements of Western Metals Corporation, which comprise the balance sheet as of December 31, 2015 and 2014, and the related statements of operations, comprehensive income (loss), cash flows and stockholders' equity for the years then ended, and the related notes to the financial statements.

### Management's Responsibility For The Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Western Metals Corporation as of December 31, 2015 and 2014, and the results of its operations and its cash flows for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

## Western Metals Corporation Notes to Financial Statements

(Dollars in thousands, except share amounts)

## 1—Summary of Significant Accounting Policies

## **Nature of Operations and Summary of Significant Accounting Policies**

## **Nature of Operations**

Western Metals Corporation, formerly known as Coastcast Corporation, (the "Company") is incorporated under the laws of the State of California. The Company's principal business is the ownership and operation of two natural gas wells located in Solano County, California. The Company is not currently engaged in any exploration activities.

Prior to 2005, the Company was a manufacturer of investment-cast golf clubheads, precision investment castings and related engineering for the medical and other commercial and industrial product industries. The Company has ceased its operations in these businesses.

#### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Certain accounting policies involve judgments and uncertainties to such an extent that there is reasonable likelihood that materially different amounts could have been reported under different conditions, or if different assumptions had been used. The Company evaluates its estimates and assumptions on a regular basis. The Company bases its estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates and assumptions used in preparation of the Company's financial statements. The most significant estimates with regard to these financial statements relate to the provision for income taxes, the outcome of pending litigation and other unresolved claims, future development and abandonment costs, and estimates of proved natural gas reserve quantities used to calculate depletion, depreciation and impairment of proved natural gas properties and equipment.

## **Cash and Cash Equivalents**

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. The Company places its temporary cash investments with high credit quality financial institutions. At times, such investments may be in excess of the Federal Deposit Insurance Corporation (FDIC) insurance limit.

#### **Restricted Cash**

In the ordinary course of its business, the Company must make certain financial guarantees to certain regulatory bodies in order to assure those regulatory bodies that the Company will be able to fulfill its contractual and regulatory obligations. The Company secures its guarantees with indemnity bonds issued by a commercial insurer, which bonds in turn are secured by letters of credit issued by a commercial bank. The bank requires the Company to collateralize these letters of credit with cash deposits held in the form of certificates of deposit. As such, in both 2015 and 2014 a portion of the Company's cash balances were restricted for this purpose.

#### Accounts Receivable

The Company's accounts receivable are primarily from the purchaser of its natural gas. This purchaser is a natural gas marketing company which purchases all of the Company's natural gas for purposes of resale into the wholesale natural gas market. This concentration of credit risk has the potential to impact the Company's results of operations. The Company believes it is afforded sufficient credit risk protection due to the short payment terms granted to this customer.

The Company's accounts receivable are recorded at their invoiced amount and do not bear interest.

Accounts receivable have been reduced by an allowance for amounts that may be uncollectible in the future. This estimated allowance is based upon management's evaluation of the collectibility of individual invoices and is based upon management's evaluation of the financial condition of its customers and historical bad debt write-off experience. Write-offs are recorded at the time a customer receivable is deemed uncollectible.

#### **Financial and Derivative Instruments**

The carrying values of cash and cash equivalents, accounts receivable, accounts payable and accrued expenses and other current liabilities approximate their fair values due to the short-term maturities of these instruments.

The Company produces quantities of natural gas and from time to time utilizes various derivative instruments such as regulated futures and regulated options as an economic hedge to reduce the effects of fluctuations in the prices of natural gas. These derivative instruments do not qualify for hedge accounting under the specific guidelines of ASC 815-20-25, *Derivatives and Hedging, Hedging General, Recognition*. While management believes each of these instruments is entered into in order to effectively manage various market risks, none of the derivatives instruments are designated and accounted for as hedges primarily as a result of the extensive record-keeping requirements.

The Company records all derivative instruments at fair value. Fair value is determined by using the closing prices of the derivative instruments on the New York Mercantile Exchange at the end of an accounting period. Changes in fair value of the derivative instruments are recorded in the statements of operations as a component of cost of goods sold. The Company maintains a margin account with a broker to collateralize these derivative instruments.

## Oil and Gas Properties

The Company utilizes the successful efforts method of accounting for its natural gas producing activities. Under this method, all costs associated with the acquisition of mineral interests, productive exploratory wells and productive or nonproductive development wells are capitalized while the costs of nonproductive exploratory wells are expensed. Support equipment and other property and equipment are depreciated over their estimated useful lives.

On the sale or retirement of a complete unit of proved property, the cost and related accumulated depreciation, depletion and amortization are eliminated from the property accounts, and the resultant gain or loss is recognized. On the retirement or sale of a partial unit of proved property, the cost is charged to accumulated depreciation, depletion and amortization with a resulting gain or loss recognized in income.

On the sale of an entire interest in an unproved property for cash or equivalent, gain or loss on the sale is recognized, taking into consideration the amount of any recorded impairment if the property has been assessed individually. If a partial interest in an unproved property is sold, the amount received is treated as a reduction of the cost of the interest retained.

Oil and gas properties are displayed net of accumulated depletion of \$1,517 and \$1,432 at December 31, 2015 and 2014, respectively. Depletion expense is provided for utilizing the units of production method and amounted to \$85 and \$65 for the years ended December 31, 2015 and 2014, respectively.

## **Long-Lived Assets**

The Company evaluates the carrying value of long-lived assets when events or changes in circumstances indicate that the carrying value may not be recoverable. Such events and circumstances include, but are not limited to, significant decreases in the market value of the asset, adverse changes in the extent or manner in which the asset is being used, significant changes in business climate, or current or projected cash flow losses associated with the use of the assets. The carrying value of a long-lived asset is considered impaired when the total projected undiscounted cash flows from such assets are separately identifiable and are less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair value of the long-lived asset. For long-lived assets to be held for use in future operations and for fixed (tangible) assets, fair value is determined primarily using either the projected cash flows discounted at a rate commensurate with the risk involved or appraisal. For long-lived assets to be disposed of by sale or other than sale, fair value is determined in a similar manner, except that fair values are reduced for disposal costs.

#### **Future Abandonment Costs**

Future abandonment costs include costs to dismantle and relocate or dispose of the Company's production equipment, gathering systems and related structures and restoration costs of land, including plugging and abandonment of wells. The Company has estimated these costs for its operating properties based upon relevant factors, including geographic location, type of production structure, well depth, applicable state regulations and currently available procedures through ongoing consultation with petroleum engineering consultants. Because these costs typically extend many years into the future, estimating these future costs is difficult and requires management to make judgments that are subject to future revisions based upon numerous factors, including changing

technology and the applicable regulatory environment. The Company reviews its assumptions and estimates of future abandonment costs on an annual basis.

The Company has established a liability for its future abandonment costs. This liability represents the discounted fair value of the asset retirement obligation. The Company records liabilities of this sort in the period in which they are incurred and the corresponding costs capitalized by increasing the carrying amount of the related long-lived asset. The liability is accreted to its present value at the Company's estimated credit-adjusted, risk free interest rate each period, and the capitalized cost is depreciated over the useful life of the related asset.

#### **Income Taxes**

Income taxes are accounted for using the asset and liability method. Under this method, income tax assets and liabilities are recognized for temporary differences between financial statement carrying amounts of assets and liabilities and their respective income tax basis. A future income tax asset or liability is estimated for each temporary difference using enacted and substantively enacted income tax rates and laws expected to be in effect when the asset is realized or the liability settled. A valuation allowance is established, if necessary, to reduce any future income tax asset to an amount that is more likely than not to be realized.

The financial statements of the Company reflect expected future tax consequences of uncertain tax positions presuming the taxing authorities' full knowledge of the position and all relevant facts, but without considering time values.

#### **Environmental**

Environmental expenditures are expensed or capitalized, as appropriate, depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations, and that do not have future economic benefit, are expensed. Liabilities related to future costs are recorded on an undiscounted basis when environmental assessments and/or remediation activities are probable and the cost can be reasonably estimated.

## **Revenue Recognition**

Since there is a ready market for natural gas, the Company sells its product soon after production at which time title and risk of loss passes to the buyer. Revenue is recorded when title passes based on the Company's net interest in the produced natural gas. The Company records its share of revenues based on production volumes and contracted sales prices. The sale prices for natural gas are based on prevailing market prices.

It is the Company's policy to calculate and pay royalties on natural gas in accordance with the particular contractual provisions of the lease and/or applicable state law. Royalty liabilities are recorded in the period in which the natural gas is produced.

## **Earnings Per Share**

Basic earnings per share is computed by dividing net income (the numerator) by the weighted average number of outstanding shares (the denominator) for the period. Diluted earnings per share are calculated in accordance with the treasury stock method to determine the dilutive effect of any warrants or options, if applicable. The computation of diluted earnings per share include the same numerator, but the denominator is increased to include the number of additional common shares from the exercise of warrants and options that would have been outstanding if potentially dilutive common shares had been issued.

The Company had no warrants or stock options in existence in either 2015 or 2014.

## **Comprehensive Income (Loss)**

Comprehensive income is comprised of net income and other comprehensive income ("OCI"). Comprehensive income comprises all changes in stockholders' equity from transactions and other events and circumstances from nonowner sources. The Company's OCI is comprised of unrealized gains and losses resulting from its investments in certain marketable securities classified as available for sale (see Note 2). For the year ended December 31, 2015, the Company recorded other comprehensive loss of \$317 on those securities. For the year ended December 31, 2014, the Company recorded other comprehensive income of \$500 on those securities. In the years ended December 31, 2015 and 2014, the Company reclassified a portion of its unrealized losses related to certain of its available-for-sale securities from OCI to a component of net income/(loss) as a result of recording an other than temporary impairment. These reclassifications totaled \$267 and \$40 in 2015 and 2014, respectively.

## **Commitments and Contingent Liabilities**

In the ordinary course of business, the Company enters into purchase and sales contracts as deemed commercially desirable. Purchase contracts are used to ensure the availability of necessary products and services used in the natural gas production process. Sales contracts are utilized to ensure the future sale of produced natural gas.

The Company and its operations from time to time may be parties to or targets of lawsuits, claims, investigations and proceedings including product liability, personal injury, contract, environmental health and safety and environmental matters which are handled and deferred in the ordinary course of business. The Company accrues a liability for such matters when it is probable that a liability has been incurred and the amount can be reasonably estimated. When a single amount cannot be reasonably estimated but the costs can be estimated within a range, the Company accrues the minimum amount.

## **Segment Reporting**

The Company identifies its operating segments when separate financial information is available that is evaluated regularly by its chief operating decision maker in assessing the performance of those segments and in determining how to allocate resources. The Company has determined that it has one reportable segment - natural gas operations.

## **Subsequent Events**

Management has evaluated subsequent events through December 12, 2016, the date which the financial statements were available for issue.

## 2—Marketable Securities

At December 31, 2015 and 2014, the Company had investments in certain equity instruments, preferred stocks, and trust preferred securities. At December 31, 2015, the Company also had investments in and exchange traded debt. These investments are classified as current assets in the balance sheet. The Company has designated these securities as being available-for-sale. Accordingly, they are recorded at fair value, with the unrealized gains and losses, net of taxes, reported as a component of stockholders' equity. These securities were comprised of the following at December 31:

		2015						
	_		Unre	ealized	Unre	ealized		
	Adjusted Cost		Gains		Gains Losses		Fai	r Value
Equity instruments	\$	1,212	\$	-	\$	(45)	\$	1,167
Preferred stock		3,011		97		-		3,108

	622		35				657
\$	4,604	\$	452	\$	(43)	\$	5,013
	Adjus	2,151 622	Adjusted Cost \$ G \$ 1,831 \$ 2,151 622	Adjusted Cost Gains  \$ 1,831 \$ 327  2,151 90 622 35	Adjusted Cost         Unrealized Gains         Unrealized Log           \$ 1,831         \$ 327         \$           2,151         90         622         35	Adjusted Cost         Unrealized Gains         Unrealized Losses           \$ 1,831         \$ 327         \$ (43)           2,151         90         -           622         35         -	Adjusted Cost         Unrealized Gains         Unrealized Losses         Fair           \$ 1,831         \$ 327         \$ (43)         \$           2,151         90         -         -           622         35         -         -

2014

The aggregate fair value of investments with unrealized losses totaled \$759 and \$2,420 at December 31, 2015 and 2014, respectively. As of December 31, 2015 the Company had \$135 invested in marketable securities that were in an unrealized loss position for a greater than 12-month period. As of December 31, 2014 the Company had no investments in marketable securities that were in an unrealized loss position for a greater than 12-month period.

In 2015 and 2014, respectively, the Company recategorized \$318 and \$(55) from accumulated other comprehensive (loss)/income to a component of net income/(loss) in 2015 and 2014, respectively.

## 3—Impairment

Largely as a result of changes in and depletion of estimated reserves, in 2015 the Company determined that the carrying value of its oil and gas properties exceeded their projected future undiscounted cash flows. Additionally, the Company determined that the carrying value of its oil and

gas properties exceeded their fair value, with fair value being determined using the projected cash flows of these assets discounted at a rate commensurate with the risk involved. As a result, in 2015 the Company recorded an impairment charge on its oil and gas properties totaling \$709. No such impairment charge was recorded in 2014.

## 4—Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consisted of the following at December 31, 2015 and 2014:

	20	)15	2014		
Accrued workers' compensation	\$	41	\$	17	
Other		18		20	
Total	\$	59	\$	37	

The Company remains obligated for certain workers' compensation claims associated with injuries or conditions allegedly incurred by certain workers of its former golf club head manufacturing facility in California. The primary liability is borne by the Company's former insurers under policies covering the years in which the injuries allegedly occurred, but the Company is obligated for a contractual percentage of such claims incurred until the underlying compensation claims are resolved. The Company has estimated its obligations with regard to such claims to total \$41 and \$17 at December 31, 2015 and 2014, respectively.

## 5—Future Abandonment Costs

The following table summarizes accrued obligations for future abandonment costs for the years ended December 31:

	2015		2	014
Balance at January 1	\$	179	\$	147
Impact of a revision in timing		54		29
Accretion expense		4		3
Balance at December 31	\$	237	\$	179

Without taking into account any estimated effects from inflation, the total undiscounted future abandonment costs of the Company total \$181 at December 31, 2015 and 2014.

# 6—Income Taxes

The following table summarizes the provision for income taxes:

	2015		2	014
(Loss)/income before taxes – U.S.	\$	(704)	\$	131
Provision/(benefit) for income taxes:	-			_
Current	\$	-	\$	-
Deferred		-		-
State and other				
Current		-		-
Deferred		-		-
Total	\$	-	\$	-

Differences between the provision for income taxes computed using the U.S. federal statutory income tax rate were as follows:

	2015		2	014
Amount computed using the statutory rate of 15%	\$	(106)	\$	20
State taxes, net		(53)		10
Dividends received deduction		(12)		(10)
Change in valuation allowance, inclusive of				
expiration of NOL carryforwards		171		(20)
Provision for income taxes	\$	-	\$	_

The significant components of deferred tax assets and liabilities were as follows as of December 31, 2015 and December 31, 2014:

	2015			2014	
Deferred tax assets					
Allowance for doubtful accounts	\$	2	\$	2	
Capital loss carryover		-		13	
Accrued workers' compensation		9		4	
Future abandonment costs		31		29	
Available for sale securities		69		-	
Depletion		493		353	
Other		1		5	
U.S. federal tax loss carry forward		3,102		3,125	
State tax loss carry forward		104		333	
Total deferred tax assets		3,811		3,864	
Deferred tax liabilities					
Available for sale securities		(21)		(83)	
Partnership basis differential		(2)		(10)	
Total deferred tax liabilities		(23)		(93)	
Valuation allowance		(3,788)		(3,771)	
Net deferred tax liabilities	\$	-	\$	-	
		+	. ===		

The valuation allowance increased by \$17 and decreased by \$307 in 2015 and 2014, respectively.

The amounts and expiration dates of the Company's U.S. federal tax loss carry forwards were as follows as of December 31, 2015:

	2015		
Year of expiration			
2023	\$ 9,912		
2024	2,408		
2025	6,911		
2027	926		
2029	478		
2030	1		
2032	42		
Total	\$ 20,678		

The Company did not recognize a significant change in liability for uncertain tax positions as a result of its implementation of the accounting standards governing the accounting for uncertain tax positions. The Company has no unrecognized tax benefits.

The Company does not expect its unrecognized tax benefits to change significantly over the next 12 months.

The Company records interest and penalties net as a component of income tax expense. As of December 31, 2015 and 2014, the Company had no accrual for interest or tax penalties.

The Company is no longer subject to federal, state, and local income tax examinations by tax authorities for years before 2013. However, to the extent utilized, the Company's net operating loss carryforwards arising in such years remain subject to examination.

# 7—Related Party Transactions

The Company's Chairman, Paul A. Novelly, and its President, G. Louis Graziadio III, also are the chairman and president, respectively, of LOTO Energy II, LLC, the Company's largest shareholder. Together Messrs. Novelly and Graziadio constitute one half of the Company's Board of Directors. One of the Company's other directors, William R. Lang, is a business associate of Mr. Graziadio and the president of a company owned by Mr. Graziadio and his siblings. The Company's other director, Richard Lonquist, is a petroleum engineer whose firms periodically perform engineering services for the Company and other businesses owned or controlled by Messrs. Novelly and Graziadio. The Company incurred expenditures to Mr. Lonquist's firms of \$6 and \$2 in 2015 and 2014, respectively. In 2015 and 2014, the Company paid affiliates of Messrs. Novelly and Graziadio a total fee of \$100 for management services provided to the Company. This expense was recorded as compensation expense in the statement of operations.

The Company's other operating officers are employees of a company controlled by Mr. Novelly and family trusts established by Mr. Novelly.

## 8—Commitments and Contingencies

The Company has contingent liabilities with respect to lawsuits and claims arising in the ordinary course of business. In management's opinion, the ultimate outcome of these contingencies will not have a material adverse effect on the financial condition or results of operations of the Company.

## 9—Stockholders' Equity

The Company's capital stock consists of its no par common stock, 20,000,000 shares authorized, of which 13,369,326 shares were issued and outstanding as of December 31, 2015 and 2014. The Company also has authorized 2,000,000 shares of preferred stock, issuable in successive series as may be determined by the Board of Directors, none of which preferred shares are issued and outstanding.

#### 10—Fair Value Measurements

Fair value accounting pronouncements define fair value as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. Fair value accounting pronouncements also establish a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the factors market participants would use in valuing the asset or liability developed based upon the best information available under the circumstances. The hierarchy is broken down into three levels. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability. Categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The following table provides information by level for assets and liabilities that are measured at fair value on recurring basis.

		Asset/(Liability)								
			Fair Value Measurements Using							
	Fair Value			Inputs Considered as						
	December 31, 2015		Level 1		Level 2		Level	3		
Marketable securities	\$	5,451	\$	5,451	\$	-	\$	-

		2014	Level 1		Level 2		Level	3		
Marketable securities	\$	5,013	\$	5,013	\$	-	\$	-		

# 11—Supplemental Unaudited Information, Year Ended December 31, 2015 and 2014

Capitalized costs, December 31:

	2015		2014	
Oil and gas properties	s properties			
Proved	\$	1,905	\$	2,560
Unproved		-		-
Capitalized costs for oil and gas properties		1,905		2,560
Less: accumulated depletion		1,517		1,432
Net capitalized costs	\$	388	\$	1,128

Costs incurred for oil and gas producing activities, for the year ended:

	2	2014		
Property acquisition costs				
Proved	\$	-	\$	-
Unproved	\$	-	\$	-
Exploration costs	\$	-	\$	-
Development costs	\$	-	\$	-
Amortization rate per unit produced	\$	1.92	\$	1.25

Results of operations for oil and gas producing activities for the years ended December 31:

	2	015	2014		
Oil and gas sales	\$	171	\$	339	
Production costs		(79)		(160)	
Depletion		(85)		(65)	
		7		114	
Income tax expense		-		-	
Results of operations for oil and gas producing					
activities (b)	\$	7	\$	114	

(b) Excludes corporate overhead, financing costs and impairment charges.

Reserve information at December 31, 2015 and 2014:

The following estimates of net proved and net proved developed reserve quantities and related standardized measure of discounted net cash flow are estimates only, and do not purport to reflect realizable values or fair market values of the Company's reserves. The Company emphasizes that net reserve estimates are inherently imprecise and that estimates of new discoveries are more imprecise than those of producing oil and gas properties. Accordingly, these estimates are expected to change as future information becomes available. All of the Company's reserves are located in the United States.

Net proved reserves are estimated net reserves of crude oil (including condensate and natural gas liquids) and natural gas that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. Net proved developed reserves are those expected to be recovered through existing wells, equipment, and operating methods.

In January 2010, the Financial Accounting Standards Board updated *Extractive Industries - Oil and Gas* (ASC Topic 932) regarding oil and gas reserves estimation and disclosure requirements. For the Company, the principal change in the new guidance is the requirement to use a price based on a 12-month average for reserve estimation and disclosure instead of a single end-of-year price.

The standardized measure of discounted future net cash flows is computed by applying a trailing 12-month average price of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves, less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, less estimated future income tax expenses (based on year-end statutory tax rates, with consideration of future tax rates already legislated) to be incurred on pretax net cash flows less tax basis of the properties and available credits, and assuming continuation of existing economic conditions. The estimated future net cash flows are then discounted using a rate of 10% a year to reflect the estimated timing of the future cash flows.

	2015			2014			
	Net Oil		et Gas	Net Oil		et Gas	
<u>-</u>	(bbls)	(	(Mcf)	(bbls)	(	Mcf)
