

ALIEN SWASTIKAS OF THE INDIANS

The purpose of this illustration is to present the evidence that the geometric ley-lines of the following Swastika configuration in the Southwest of the USA, New Mexico are related to those utilized in Asia, mainly the Hindus. This cultural link gives evidence that the Native Americans are more culturally, linguistically and racially akin to the Asiatic races. The giant Swastika symbols are located to the east of Roswell, New Mexico, the site of the 1947 famous UFO crash. There are believed to be over 20 such sites discovered due to GoogleEarth imagery. Not only are the different symbols of Swastikas prevalent but they are surrounded by other gigantic geometric structures. The design of the Swastika in modern history has a negative connotation due to the Nazi occultism that did seek an Aryan link to the ancient Hindu races, etc. It was supposed to bring the ancient powers of the Aryan Spirits to enslave all others. The design is also used in Alien worship in the New Age movement. due to its proximity to Roswell. The Swastika is also referred to as a 'Gammadion', which is one of the oldest and most widespread symbols on planet Earth.

This motif appears to have been a common source worldwide universal symbol, perhaps even before the Flood of Noah as the symbol is found in nearly every known civilization in every content.

Pertaining to the Native Americans of the U.S. Southwest, it is believed that the Swastika design relates to the migration and gathering of the various tribes. For example the Navajo Hataalii called 'Medicine Men' use it for ritual ceremonial enchantments. There appears to be no consistent or core meaning other than it has meant the Feathered Serpent, the 4 Cosmic Cardinal Points of directions, migrating to the center, a Sun symbol, a whirling or vortex. In the Navajo tradition, it occurs in the Nightway Chant, the Feather Way, and the Chiricahua Wind Way ceremonies. The Swastika also takes on the concept of the complete depiction of a human lifespan, or generation. The 4 points of the symbol thus represents birth, youth, old age and death. Others believe the Native Americans or those before them used the Swastika signs to communicate with the 'Aliens'.

The English word for swastika comes from Sanskrit svástica or svasti स्वस्तिक, meaning well-being. It is an equilateral cross with its arms bent at right angles. There are two types of Swastikas. It is either left-facing or right-facing. There is the right facing or clockwise direction Swastika and Left facing or counterclockwise direction Swastika. The left facing or counterclockwise direction Swastika is also called the Sauvastika.

Others define the left-facing (卍) Swastika as 'wanzi' or manjii. The right-facing (卐) Swastika is called a 'hanecruz'. The occult Nazi Swastika was counterclockwise. It is a widely-used sacred symbol in Dharmic religions and they often decorate the Swastika with a dot in each of the 4 quadrants.
