POWERS' RATINGS

Volume 1 Issue 1 — **Week Zero Issue** — © 2023 BP Sports, LLC

Powers' Picks Star-Rated Plays in CFB/NFL
715-585-26 (55%) All-Time 2015-2022!!!

Football Season is Here!!!

In this issue you will find our **latest CFB power ratings** and our latest bets. Do note we release many of our plays early to VIP customers. With each passing year, we have more influence on markets and if getting the absolute best number is important to you, VIP might be worth your while this season. It is $599. You will receive the picks via email and text. You can sign up today at bradpowerssports.com. If you want to learn more about the differences between our weekly newsletter vs VIP service, refer to the bottom of this page or email brad@bradpowerssports.com

Keep in mind, this year's newsletter will just have data info like logs and power ratings and all the opening bets we made at Circa. **No write-ups or NFL!** If you want CFB picks, but can't afford the $599 VIP, we recommend betting our power ratings on page 4. For the past seven seasons we have posted computer projected lines for every game. **Games where there was of difference of more than 3 points saw our computer lines actually beat the Vegas line at a 468-395-14 (54.2%) clip!** That's pretty solid and actually better than our own handicapping in some seasons. Keep in mind, these computer lines don't take into consideration off-the-field factors like revenge or flat spots or if there are late-week injuries. They are basically a power-rating number difference between the two teams that also takes into consideration the home field advantage.

The next issue comes out Monday, August 28th at 7pm ET!

Sincerely,
Brad Powers and Staff

2023 Season Win Total Projections (Power Ratings Only)

In order to come up with a season win total projection, we take the projected spread of each game and figure out a win percentage chance for that game. If you have a 90% chance to win a game, you get credit for 0.9 of a win. If you have a 20% chance to win a game, you get credit for 0.2 of a win. When you add up the win percentages for all 12 games, you get an early season win total projection.

Below is an example for Georgia this year. The Bulldogs will be favored in all 12 games this year by an average of 29.4 ppg. Does, that mean Georgia's season win total should be 12? Not when you do the correct math as you get a season win total of 11.26 for the Bulldogs.

Week 1 Computer Projected Lines for Every CFB Game

For the past seven seasons we have posted computer projected lines for every game on Wednesday. **Games where there was of difference of more than 3 points saw our computer lines actually beat the Vegas line at a 468-395-14 (54.2%) clip!** That's pretty solid and actually better than our own handicapping in some seasons. Keep in mind, these computer lines don't take into consideration off-the-field factors like revenge or flat spots or if there are late-week injuries. They are basically a power-rating number difference between the two teams that also takes into consideration the home field advantage.

Of the 7 games where our computer is off more than 3 points compared to the Vegas line (highlighted), our favorite team this week to back would be Kent St +37.

The Comp column is the computer projected line and the Diff column is the difference between the Vegas line and the Computer line. "+" numbers in the difference column say back the underdog. "-" numbers in the difference column say back the favorite. Let us know if you have questions.

Betting CFB Openers

Every Sunday in Vegas at 11am PT, Circa Sports is the first book in the world to release CFB lines and we bet them every week. We think it's the best value bets we make all week. 2020 was the first season where we tracked every single bet we made and posted them in the weekly newsletters. We were very pleased with our 119-76-3 (61%) record on these Sunday bets with an average line value of 2.6 ppg. In 2021, we were 224-196-5 vs the Circa openers with an average line value of 1.8 ppg. In 2022, we were 314-262-14 (CLV 417-122-51 +1.65 ppg). Week 1 lines came out in May for all the FBS vs FBS games. Below is some of what we bet already. As of now we've gotten the best of the line on 90-plus percent of our bets by an average of 1.8 ppg.
