

Sri Pavan Nagpal Memorial Lecture

Indian Ceramic Society, Bangalore Chapter

In Remembrance...

- Both as a ceramist and as a person, late Sri Pavan Nagpal embodied someone who had never ending curiosity about technology and everything in the world that surrounds us.
 - A graduate of the prestigious St. Georges College, Mussoorie and the equally prestigious IIT, Kanpur he inspired everyone to achieve their highest potential in thought and action.
 - His influence was especially inspirational to the youth, school and college students, with whom he partnered on numerous projects of discovery and learning.
 - Amongst his numerous accolades, he was awarded the prestigious national FIE Foundation Award (1989) for his work in developing the Process-Inline Furnace Controller (PIC) and the presidential DSIR National Award for R&D efforts in Industry (2006) for developing the revolutionary DEPA software.
 - Above all, he is dearly missed because he deeply touched the lives everyone who knew him in a profound way.
 - We sincerely thank you for this honor bestowed in his memory
-

Lecture Goals

- We wish the Pavan Nagpal lecture series discuss new ideas generated in academia and new products in the industry showing the immediate potential to vastly improve the ceramics spectrum.
 - We wish that the lecture series cover new innovative topics in ceramics stimulating new thought with an emphasis on a practical hands on approach.
 - We wish to recognize and highlight the accomplishments of the invited speaker in the field of Ceramic Research or Innovative Product Development.
 - We wish that the lecture become an important networking event of the Indian Ceramics Society Bangalore Chapter where all members past and present are invited to share an evening with us.
-
