

Stepping Stone Accounts

Stepping Stone Accounts was started in response to the needs of small businesses and non-profits in the Western Massachusetts for accounting, bookkeeping and database support. Our goal is to assist those businesses in fully utilizing their accounting and database systems. Accurate and timely information presented in an understandable manner is crucial in business planning, decision making, and reporting obligations.

I have lived and worked in Western Massachusetts most of my life, including almost twenty years as the Business Manager at the Academy at Charlemont and three years as the treasurer of the Greater Shelburne Area Business Association. I believe the most important drivers of our local economy are the many independent small businesses and non-profits that serve our communities. The mission of **Stepping Stone Accounts** is to support those businesses toward realizing their goals by helping them manage their data.
