

Mat Stacks

By P&E Products

Offering a combined wealth of machine design and manufacturing experience that spans over 80 years.

Bruce Rea, President:

Over 40 years of manufacturing and design experience including 28 years with Ford Motor Company as a Controls Engineer. Bruce is experienced with all facets of machine design and automation including vision and bar coding systems, and is the recipient of the 1996 Henry Ford Technology Award for engineering excellence.

Gary Byrne, Sales Engineer:

40 plus years of experience in machine and product design primarily in the dust control industry. Designed and produced **Mat Master** flat mat washing and drying systems for 20 years with Whitewater Industries. Gary developed the ***Mat Hive*** and ***Shelf Shaper*** mat storage systems while selling mat rolling machines for PDPI. He developed numerous other processing and mat handling products over the course of 40 years. He also started matrollerbelts.com to provide reasonably priced replacement parts for PDPI rollers.
