TOM'S PROGRAM FOR RETURNING STUDENTS!

My new program is for students who have taken my workshop "Watercolor Secrets Revealed" within the last three years. It is "an advanced workshop within a workshop". This is a customized program that will provide you with the following:

- * A review and evaluation of your artwork prior to the workshop;
- * A customized painted prelim of your subject.

This way you can continue from where you left off after your last workshop with me and continue to advance further with your personalized plan. You will have the opportunity to start right off doing a finished painting. I will set aside a special place for you and other returning students. If you hear something that interests you that I'm teaching the new students, you are free to join us. Otherwise, I will come visit you at your table and will offer any help needed. I have tested this technique and received rave reviews. I hope you can join me again! I wish you a wonderful year of painting. I hope to see you soon!
